B) 1978

C) 1990

D) 1968

Answer: 1986

22. In which year did BIT Chittagong become a full public university, taking the name CUET?

A) 2003

B) 1996

C) 2010

D) 1999

Answer: 2003

23. What is the official motto of Chittagong University of Engineering & Technology?

A) A centre of excellence

B) Knowledge is power

C) Light and learning

D) Truth and service

Answer: A centre of excellence

24. In which upazila of Chittagong District is CUET's campus located?

A) Raozan

B) Hathazari

C) Patiya

D) Anwara

Answer: Raozan

25. Along with CUET, which two other engineering universities form the "CKRUET" combined admission cluster?

A) KUET and RUET

B) BUET and DUET

C) MIST and AUST

D) IUT and NSU

Answer: KUET and RUET

26. What does "RUET," one of Bangladesh's leading engineering universities, stand for?

A) Rajshahi University of Engineering and Technology

B) Rangpur University of Engineering and Technology

C) Rural University of Engineering and Technology

D) Regional University of Engineering and Technology

Answer: Rajshahi University of Engineering and Technology

27. What does "KUET," one of Bangladesh's leading engineering universities, stand for?

A) Khulna University of Engineering and Technology

B) Kushtia University of Engineering and Technology

C) Kingdom University of Engineering and Technology

D) Karnaphuli University of Engineering and Technology

Answer: Khulna University of Engineering and Technology

28. What is the name of Bangladesh's premier engineering and technology university located in Dhaka, established in 1962?

- A) Bangladesh University of Engineering and Technology

- A) Oriental magpie-robin (Doel)
- B) Peacock
- C) Kingfisher
- D) Parrot

Answer: Oriental magpie-robin (Doel)

34. What is Bangladesh's national tree?

- A) Mango tree
- B) Banyan tree
- C) Coconut tree
- D) Bamboo

Answer: Mango tree

35. What is the name of the popular spicy Bangladeshi street food made from puffed rice, vegetables, and tamarind sauce?

- A) Jhalmuri
- B) Fuchka
- C) Chotpoti
- D) Bhelpuri

Answer: Jhalmuri

36. What is the name of the government authority responsible for regulating telecommunications in Bangladesh?

- A) Bangladesh Telecommunication Regulatory Commission
- B) Bangladesh Bank
- C) Bangladesh Computer Council
- D) Bangladesh Standards Authority

Answer: Bangladesh Telecommunication Regulatory Commission

37. What is the name of the Bangladeshi agency responsible for overseeing satellite and space-related activities?

- A) Bangladesh Space Research and Remote Sensing Organisation
- B) Bangladesh Atomic Energy Commission
- C) Bangladesh Telecommunication Regulatory Commission
- D) SPARRSO Institute of Technology

Answer: Bangladesh Space Research and Remote Sensing Organisation

Medium • Segment 3 (Q7–Q9)

1. Who served as Acting President of the Mujibnagar Government while Sheikh Mujibur Rahman was imprisoned in Pakistan during 1971?

- A) Syed Nazrul Islam
- B) Tajuddin Ahmad
- C) Khondaker Mostaq Ahmad
- D) A.H.M. Qamaruzzaman

Answer: Syed Nazrul Islam

2. Into how many operational sectors was the Mukti Bahini organized during the 1971 Liberation War?

- A) 9 sectors
- B) 10 sectors
- C) 11 sectors
- D) 12 sectors

Answer: 11 sectors

- A) Chittagong Armoury Raid
- B) Chittagong Uprising
- C) Chittagong Mutiny
- D) Chittagong Revolt

Answer: Chittagong Armoury Raid

18. Which power plant, with a capacity of 420 megawatts, is situated directly opposite CUET's campus?

- A) Raozan Thermal Power Plant
- B) Ashuganj Power Station
- C) Ghorashal Power Plant
- D) Barapukuria Power Plant

Answer: Raozan Thermal Power Plant

19. Approximately how far is CUET's campus from Chittagong city center?

- A) About 20 kilometers
- B) About 5 kilometers
- C) About 50 kilometers
- D) About 2 kilometers

Answer: About 20 kilometers

20. How many faculties does CUET currently operate under?

- A) Five
- B) Three
- C) Seven
- D) Ten

Answer: Five

21. What is the approximate size of CUET's campus, in acres?

- A) 171 acres
- B) 50 acres
- C) 300 acres
- D) 80 acres

Answer: 171 acres

22. What are CUET's official colors?

- A) Navy Blue and Golden Brown
- B) Maroon and White
- C) Green and Red
- D) Black and Gold

Answer: Navy Blue and Golden Brown

23. Which renowned Bangladeshi physicist and cosmologist chaired the Mathematics department at the University of Chittagong from 1986 to 1988?

- A) Jamal Nazrul Islam
- B) Muhammad Yunus
- C) Abdus Salam
- D) Qudrat-i-Khuda

Answer: Jamal Nazrul Islam

24. What is the name of Bangladesh's premier institution for nuclear energy and research?

- A) Bangladesh Atomic Energy Commission
- B) Bangladesh Council of Scientific and Industrial Research
- C) Bangladesh Space Agency
- D) Bangladesh Nuclear Regulatory Authority

Answer: Bangladesh Atomic Energy Commission

25. What is the name of Bangladesh's apex professional body representing engineers, headquartered in Dhaka?

- A) Institution of Engineers, Bangladesh
- B) Bangladesh Engineering Council

- C) Bangladesh Computer Society
- D) Bangladesh Association of Engineers

Answer: Institution of Engineers, Bangladesh

D) Perfect game

Answer: Clean sheet

25. As of recent tournaments, which two countries are tied for the most Copa America titles, with 15 each?

A) Argentina and Uruguay

B) Brazil and Chile

C) Argentina and Brazil

D) Uruguay and Brazil

Answer: Argentina and Uruguay

26. In cricket, what do we call the wooden structure a bowler aims to hit, made of three stumps and two bails?

A) Wicket

B) Crease

C) Pitch

D) Bail

Answer: Wicket

27. How many wickets does a bowler need to take in a single innings to achieve a "five-wicket haul"?

A) 5

B) 3

C) 10

D) 7

Answer: 5

28. In basketball, how many points is a free throw worth?

A) 1 point

B) 2 points

C) 3 points

D) 0.5 points

Answer: 1 point

29. In basketball, how many points is a successful shot from beyond the three-point line worth?

A) 3 points

B) 2 points

C) 1 point

D) 4 points

Answer: 3 points

30. What is the term for the football position responsible for organizing the defense, usually playing centrally at the back?

- A) Center-back
- B) Winger
- C) Striker
- D) Midfielder

Answer: Center-back

31. In tennis, how many sets must a man typically win to win a best-of-five match at a Grand Slam?

- A) 3 sets
- B) 2 sets
- C) 4 sets
- D) 5 sets

Answer: 3 sets

32. What is the maximum number of players on an ice hockey team on the ice at one time, including the goalie?

- A) 6
- B) 5
- C) 7
- D) 11

Answer: 6

33. In golf, what is the term for completing a hole in the expected number of strokes?

- A) Par
- B) Birdie
- C) Bogey
- D) Eagle

Answer: Par

34. What is the name of the international governing body for cricket?

- A) International Cricket Council
- B) FIFA
- C) IOC
- D) World Cricket Federation

Answer: International Cricket Council

35. What is the term for a cricket fielder standing very close to the batsman on the leg side?

- A) Short leg
- B) Long-on
- C) Third man
- D) Deep cover

Answer: Short leg

36. How many players are on a team in a standard game of rugby union?

- A) 15
- B) 13
- C) 11
- D) 7

Answer: 15

37. How many players are on a team in rugby league?

- A) 13

- B) 15
- C) 11
- D) 9

Answer: 13

38. What is the name of the annual golf tournament played at St Andrews, considered the "home of golf"?

- A) The Open Championship
- B) The Masters
- C) US Open
- D) PGA Championship

Answer: The Open Championship

39. In boxing, what do we call a fight that ends without a winner being declared?

- A) Draw
- B) Tie
- C) No contest
- D) Split decision

Answer: Draw

40. In badminton, what is the basic scoring unit won when a team makes a legal return that the opponent fails to return?

- A) Point
- B) Set
- C) Rally
- D) Serve

Answer: Point

41. What is the standard distance of a marathon race?

- A) 42.195 kilometers
- B) 21 kilometers
- C) 50 kilometers
- D) 35 kilometers

Answer: 42.195 kilometers

42. What is the name of the trophy awarded to Test cricket's top-ranked team on an ongoing basis?

- A) ICC Test Championship Mace
- B) The Ashes
- C) World Test Trophy
- D) ICC Golden Bat

Answer: ICC Test Championship Mace

43. What color is the center of an archery target?

- A) Gold
- B) Red
- C) Blue
- D) Black

Answer: Gold

44. In cricket, what is the term for the marked area of the pitch where the batsman stands to face the bowler?

- A) Crease
- B) Wicket
- C) Popping zone

D) Box

Answer: Crease

45. How many players are on a handball team on the court at one time?

A) 7

B) 6

C) 5

D) 9

Answer: 7

Easy-Medium • Segment 2 (Q4–Q6)

1. Which cricket format, introduced internationally in 2003-05, limits each team to a maximum of 20 overs?

A) Twenty20

B) One Day International

C) Test cricket

D) The Hundred

Answer: Twenty20

2. What is the traditional and most prestigious format of international cricket, played over up to five days?

A) Test cricket

B) One Day International

C) Twenty20

D) First-class cricket

Answer: Test cricket

3. Who captained Bangladesh's cricket team to its first-ever Test match win, against Zimbabwe in 2005?

A) Habibul Bashar

B) Aminul Islam

C) Khaled Mahmud

D) Shakib Al Hasan

Answer: Habibul Bashar

4. Which two Formula 1 drivers are tied for the most World Championship titles, with 7 each?

A) Michael Schumacher and Lewis Hamilton

B) Ayrton Senna and Alain Prost

C) Sebastian Vettel and Max Verstappen

D) Juan Manuel Fangio and Niki Lauda

Answer: Michael Schumacher and Lewis Hamilton

5. What is the name for the swimming stroke in which swimmers move face-down, alternating overhand arm movements?

A) Freestyle

B) Backstroke

C) Breaststroke

D) Butterfly

Answer: Freestyle

6. Which country has won the most Rugby World Cup titles?

A) South Africa

B) New Zealand

- C) Australia
- D) England

Answer: South Africa

7. Which country's cricket team is nicknamed the "Baggy Greens"?

- A) Australia
- B) South Africa
- C) New Zealand
- D) England

Answer: Australia

8. What is the term for a badminton shot hit softly just over the net so it drops quickly on the other side?

- A) Drop shot
- B) Smash
- C) Clear
- D) Lob

Answer: Drop shot

9. What is the term for a fast, short-pitched cricket delivery aimed at a batsman's upper body or head?

- A) Bouncer
- B) Yorker
- C) Googly
- D) Full toss

Answer: Bouncer

10. Which Olympic gymnastics event involves competitors performing on a raised beam only 10 centimeters wide?

- A) Balance beam
- B) Uneven bars
- C) Floor exercise
- D) Vault

Answer: Balance beam

11. What is the term for the extra period played in soccer knockout matches to break a tie, before any penalty shootout?

- A) Extra time
- B) Overtime
- C) Sudden death
- D) Stoppage time

Answer: Extra time

12. Which country has won the most Olympic medals overall in Summer Olympics history?

- A) United States
- B) Soviet Union/Russia
- C) China
- D) Great Britain

Answer: United States

13. What is the name of the annual cycling race, held primarily in France, widely considered the most prestigious in the world?

- A) Tour de France
- B) Giro d'Italia
- C) Vuelta a Espana
- D) Paris-Roubaix

Answer: Tour de France

14. What is the term for the cricket fielding position stationed close behind the batsman to catch thin edges off the bat?

- A) Slip
- B) Gully
- C) Cover
- D) Mid-on

Answer: Slip

15. Which country won the inaugural ICC Twenty20 World Cup in 2007?

- A) India
- B) Pakistan
- C) Australia
- D) South Africa

Answer: India

16. What is the name of the annual golf tournament held at Augusta National, traditionally the first major of the year?

- A) The Masters
- B) The Open Championship
- C) US Open
- D) PGA Championship

Answer: The Masters

17. What is the term for a bowler in cricket dismissing three batsmen with three consecutive deliveries?

- A) Hat-trick
- B) Triple wicket
- C) Golden over
- D) Perfect over

Answer: Hat-trick

- A) Real Madrid
- B) AC Milan
- C) Bayern Munich
- D) Liverpool

Answer: Real Madrid

19. Which player scored a famous overhead "bicycle kick" goal for Real Madrid against Juventus in the 2018 Champions League quarter-final?

- A) Cristiano Ronaldo
- B) Gareth Bale
- C) Karim Benzema
- D) Sergio Ramos

Answer: Cristiano Ronaldo

20. What is the name of South America's premier club football competition, considered the continental equivalent of the Champions League?

- A) Copa Libertadores
- B) Copa Sudamericana
- C) Copa America
- D) Recopa Sudamericana

Answer: Copa Libertadores

21. Which club won the UEFA Champions League in the 2019-20 season, played in a single-venue format in Portugal due to the COVID-19 pandemic?

- A) Bayern Munich
- B) Paris Saint-Germain
- C) Manchester City
- D) Real Madrid

Answer: Bayern Munich

22. Which English club, managed by Pep Guardiola, completed a continental treble (league, domestic cup, and Champions League) in the 2022-23 season?

- A) Manchester City
- B) Liverpool
- C) Chelsea
- D) Arsenal

Answer: Manchester City

23. In rugby union, how many points is a try worth?

- A) 5 points
- B) 3 points
- C) 7 points
- D) 6 points

Answer: 5 points

24. Which snooker player is known as "The Rocket" for his fast playing style?

- A) Ronnie O'Sullivan
- B) Stephen Hendry
- C) Steve Davis
- D) John Higgins

Answer: Ronnie O'Sullivan

25. What is the term for a football match, tied after normal time in a cup competition, proceeding to two 15-minute periods before penalties?

- A) Extra time
- B) Stoppage time
- C) Added time
- D) Golden goal period

Answer: Extra time

26. What is the term for a full-length cricket delivery that lands right at the batsman's feet, making it hard to hit?

- A) Yorker
- B) Bouncer
- C) Full toss
- D) Googly

Answer: Yorker

27. What is the term for a badminton shot hit high and deep to the back of the opponent's court?

- A) Clear
- B) Drop shot
- C) Smash
- D) Net shot

Answer: Clear

28. What is the maximum number of sets played in a badminton match?

- A) 3
- B) 5
- C) 2
- D) 7

Answer: 3

29. In American football, how many points is a field goal worth?

- A) 3 points
- B) 6 points
- C) 2 points
- D) 1 point

Answer: 3 points

30. What is the term for an ice hockey team having more players on the ice than their opponents due to a penalty?

- A) Power play
- B) Fast break
- C) Man advantage play
- D) Extra attacker

Answer: Power play

- A) Away goals rule
- B) Golden goal rule
- C) Silver goal rule
- D) Extra-time-only rule

Answer: Away goals rule

25. Which two English clubs met in an all-English UEFA Champions League final in 2019, won 2-0 by one of them?

- A) Liverpool and Tottenham Hotspur

- B) Manchester United and Chelsea
- C) Manchester City and Arsenal
- D) Chelsea and Arsenal

Answer: Liverpool and Tottenham Hotspur

26. Which country won the first-ever Rugby League World Cup, in 1954?

- A) Great Britain
- B) Australia
- C) France
- D) New Zealand

Answer: Great Britain

27. What is the term for a cricket team requiring the opposition to bat again immediately after being dismissed cheaply?

- A) Follow-on
- B) Second innings
- C) Forced replay
- D) Reverse batting

Answer: Follow-on

28. By how many runs must a team typically lead to enforce the follow-on in a standard five-day Test match?

- A) 200 runs
- B) 100 runs
- C) 150 runs
- D) 300 runs

Answer: 200 runs

29. Which country has won the most Men's Hockey World Cup titles?

- A) Pakistan
- B) India
- C) Netherlands
- D) Australia

Answer: Pakistan

30. What is the term for a basketball violation where a player takes steps without dribbling the ball?

- A) Traveling
- B) Double dribble
- C) Carrying
- D) Goaltending

Answer: Traveling

31. In swimming, what is the term for a relay event in which four swimmers each perform one of the four competitive strokes?

- A) Medley relay
- B) Freestyle relay
- C) Individual medley
- D) Mixed relay

Answer: Medley relay

32. Which three races make up professional cycling's "Grand Tours"?

- A) Tour de France, Giro d'Italia, and Vuelta a Espana
- B) Tour de France, Paris-Roubaix, and Milan-San Remo
- C) Giro d'Italia, Vuelta a Espana, and Tour of Flanders

D) Tour de France, Tour of California, and Vuelta a Espana

Answer: Tour de France, Giro d'Italia, and Vuelta a Espana

33. What are the three weapon disciplines used in Olympic fencing?

A) Foil, Epee, and Sabre

B) Foil, Rapier, and Sabre

C) Epee, Sabre, and Longsword

D) Foil, Katana, and Epee

Answer: Foil, Epee, and Sabre

34. How many events make up the women's heptathlon in athletics?

A) 7

B) 10

C) 5

D) 8

Answer: 7

35. How many events make up the men's decathlon in athletics?

A) 10

B) 7

C) 12

D) 8

Answer: 10

36. What is the term for a cricket delivery that spins from leg to off for a right-handed batsman, bowled by a leg-spin bowler?

A) Leg break

B) Off break

C) Doosra

D) Arm ball

Answer: Leg break

37. What is the term for a leg-spinner's delivery that unexpectedly spins the opposite way to a normal leg break?

A) Googly

B) Yorker

C) Bouncer

D) Slower ball

Answer: Googly

38. In which sport would an athlete perform a "clean and jerk"?

A) Weightlifting

B) Gymnastics

C) Wrestling

D) Judo

Answer: Weightlifting

39. What is the name of the other competitive lift in Olympic weightlifting, alongside the "clean and jerk"?

A) Snatch

B) Deadlift

C) Press

D) Clean pull

Answer: Snatch

40. What is the name of the biennial golf competition between teams from the United States and Europe?

- A) Ryder Cup
- B) Presidents Cup
- C) Solheim Cup
- D) World Cup of Golf

Answer: Ryder Cup

41. What is the name of the biennial golf competition between a United States team and an International team, excluding Europe?

- A) Presidents Cup
- B) Ryder Cup
- C) Solheim Cup
- D) Walker Cup

Answer: Presidents Cup

42. What is the name of the international women's team tennis competition, equivalent to the men's Davis Cup, renamed in 2020 to honor a tennis legend?

- A) Billie Jean King Cup
- B) Federation Cup
- C) Wightman Cup
- D) Hopman Cup

Answer: Billie Jean King Cup

43. What term describes an athlete's best-ever recorded time or result in a given event?

- A) Personal best
- B) Season high
- C) Career mark
- D) Top form

Answer: Personal best

44. Which two disciplines are combined in the winter sport of biathlon?

- A) Cross-country skiing and rifle shooting
- B) Downhill skiing and archery
- C) Ski jumping and rifle shooting
- D) Cross-country skiing and archery

Answer: Cross-country skiing and rifle shooting

45. What is the term for a cricket match format limited to a set number of overs per side, as opposed to unlimited-innings Test cricket?

- A) Limited-overs cricket
- B) First-class cricket
- C) Club cricket
- D) Declaration cricket

Answer: Limited-overs cricket

Medium-Hard • Segment 4 (Q10–Q12)

1. Which club won the UEFA Champions League three consecutive times, from 2016 to 2018?

- A) Real Madrid
- B) Barcelona
- C) Bayern Munich
- D) Liverpool

Answer: Real Madrid

2. Which manager guided Liverpool to Champions League glory in 2019, a year after losing the final?

- A) Jurgen Klopp
- B) Pep Guardiola
- C) Zinedine Zidane
- D) Carlo Ancelotti

Answer: Jurgen Klopp

- A) Extra time, then penalties if still level
- B) The team with more away goals advances
- C) A replay is scheduled
- D) The higher-seeded team advances

Answer: Extra time, then penalties if still level

4. Which stadium, nicknamed the "Theatre of Dreams," is Manchester United's home ground?

- A) Old Trafford
- B) Anfield
- C) Emirates Stadium
- D) Etihad Stadium

Answer: Old Trafford

5. Which country's top football division is known as "Serie A"?

- A) Italy
- B) Spain
- C) Germany
- D) France

Answer: Italy

6. Which country's top football division is known as "La Liga"?

- A) Spain
- B) Italy
- C) Portugal
- D) Germany

Answer: Spain

7. Which country's top football division is known as the "Bundesliga"?

- A) Germany
- B) Austria
- C) Switzerland
- D) Netherlands

Answer: Germany

8. What is the name of France's top professional football division?

- A) Ligue 1
- B) Division 1
- C) Coupe de France
- D) Ligue Nationale

Answer: Ligue 1

9. Which club is nicknamed "The Old Lady" (La Vecchia Signora) in Italian football?

- A) Juventus
- B) AC Milan

- C) Inter Milan
- D) AS Roma

Answer: Juventus

10. Which club, nicknamed "The Reds," plays its home matches at Anfield?

- A) Liverpool
- B) Manchester United
- C) Arsenal
- D) Sunderland

Answer: Liverpool

11. What is the name of FC Barcelona's home stadium?

- A) Camp Nou
- B) Santiago Bernabeu
- C) Wanda Metropolitano
- D) San Siro

Answer: Camp Nou

12. Which country won the first-ever FIFA Women's World Cup, held in 1991?

- A) United States
- B) Germany
- C) Norway
- D) China

Answer: United States

13. Who is cricket's all-time leading wicket-taker in Test match history?

- A) Muttiah Muralitharan
- B) Shane Warne
- C) Anil Kumble
- D) James Anderson

Answer: Muttiah Muralitharan

14. Which cricketer has scored the most centuries in One Day International (ODI) history?

- A) Sachin Tendulkar
- B) Virat Kohli
- C) Ricky Ponting
- D) Rohit Sharma

Answer: Sachin Tendulkar

15. How many times has a bowler taken all 10 wickets in a single Test innings, a feat achieved by Jim Laker and Anil Kumble?

- A) Twice
- B) Once
- C) Three times
- D) Never

Answer: Twice

16. Who captained the West Indies cricket team during their dominant, largely unbeaten run through much of the 1980s?

- A) Clive Lloyd
- B) Viv Richards
- C) Garfield Sobers
- D) Brian Lara

Answer: Clive Lloyd

17. Among men, which tennis player has won the most Grand Slam singles titles, as of recent completed seasons?

- A) Novak Djokovic
- B) Rafael Nadal
- C) Roger Federer
- D) Pete Sampras

Answer: Novak Djokovic

18. Which female tennis player holds the record for most Grand Slam singles titles won in the Open Era (since 1968)?

- A) Serena Williams
- B) Steffi Graf
- C) Margaret Court
- D) Martina Navratilova

Answer: Serena Williams

19. Which gymnast holds the record for most Olympic medals ever won in gymnastics?

- A) Larisa Latynina
- B) Simone Biles
- C) Nadia Comaneci
- D) Vera Caslavskaja

Answer: Larisa Latynina

20. Who holds the record for the most Olympic medals of all time, across any sport?

- A) Michael Phelps
- B) Larisa Latynina
- C) Usain Bolt
- D) Mark Spitz

Answer: Michael Phelps

- A) Rohit Sharma
- B) Virender Sehwag
- C) Sachin Tendulkar
- D) Ishan Kishan

Answer: Rohit Sharma

International

Easy • Segment 1 (Q1–Q3)

1. What is the largest country in the world by land area?

- A) Russia
- B) Canada
- C) China
- D) United States

Answer: Russia

2. What is the smallest country in the world by land area?

- A) Vatican City
- B) Monaco
- C) San Marino
- D) Liechtenstein

Answer: Vatican City

3. Which country has the largest population in the world?

- A) India
- B) China
- C) United States
- D) Indonesia

Answer: India

4. What is the capital of France?

- A) Paris
- B) Lyon
- C) Marseille
- D) Nice

Answer: Paris

5. What is the capital of Japan?

- A) Tokyo
- B) Osaka
- C) Kyoto
- D) Yokohama

Answer: Tokyo

6. What is the capital of the United States?

- A) Washington, D.C.
- B) New York
- C) Los Angeles
- D) Chicago

Answer: Washington, D.C.

7. What is the largest continent by area?

- A) Asia
- B) Africa
- C) North America
- D) Europe

Answer: Asia

8. What is the smallest continent by land area?

- A) Australia
- B) Europe
- C) Antarctica
- D) South America

Answer: Australia

9. Which river is traditionally cited as the longest in the world?

- A) Nile
- B) Amazon
- C) Yangtze
- D) Mississippi

Answer: Nile

10. What is the tallest mountain in the world?

- A) Mount Everest
- B) K2
- C) Kangchenjunga
- D) Denali

Answer: Mount Everest

11. Which country is known as the "Land of the Rising Sun"?

- A) Japan
- B) China
- C) South Korea
- D) Thailand

Answer: Japan

12. What is the capital of the United Kingdom?

- A) London
- B) Manchester
- C) Birmingham
- D) Edinburgh

Answer: London

13. Which desert is the largest hot desert in the world?

- A) Sahara Desert
- B) Gobi Desert
- C) Kalahari Desert
- D) Arabian Desert

Answer: Sahara Desert

14. What is the official currency of the United States?

- A) US Dollar
- B) Euro
- C) Pound Sterling
- D) Canadian Dollar

Answer: US Dollar

15. Which country gifted the Statue of Liberty to the United States?

- A) France
- B) United Kingdom
- C) Spain

D) Netherlands

Answer: France

16. What is the name of the international organization, headquartered in New York, that promotes peace among nations?

A) United Nations

B) European Union

C) NATO

D) World Bank

Answer: United Nations

17. Which country is home to the Great Wall?

A) China

B) Japan

C) Mongolia

D) South Korea

Answer: China

18. What is the capital of Germany?

A) Berlin

B) Munich

C) Frankfurt

D) Hamburg

Answer: Berlin

19. What is the capital of Italy?

A) Rome

B) Milan

C) Naples

D) Venice

Answer: Rome

20. What is the capital of Spain?

A) Madrid

B) Barcelona

C) Seville

D) Valencia

Answer: Madrid

21. What is the capital of Russia?

A) Moscow

B) St. Petersburg

C) Novosibirsk

D) Kazan

Answer: Moscow

22. What is the capital of China?

A) Beijing

B) Shanghai

C) Guangzhou

D) Hong Kong

Answer: Beijing

23. What is the capital of Egypt?

- A) Cairo
- B) Alexandria
- C) Giza
- D) Luxor

Answer: Cairo

24. What is the capital of Mexico?

- A) Mexico City
- B) Guadalajara
- C) Cancun
- D) Monterrey

Answer: Mexico City

25. What is the capital of Turkey?

- A) Ankara
- B) Istanbul
- C) Izmir
- D) Antalya

Answer: Ankara

26. What is the capital of Saudi Arabia?

- A) Riyadh
- B) Jeddah
- C) Mecca
- D) Medina

Answer: Riyadh

27. What is the capital of Indonesia?

- A) Jakarta
- B) Bali
- C) Surabaya
- D) Bandung

Answer: Jakarta

28. What is the capital of Thailand?

- A) Bangkok
- B) Phuket
- C) Chiang Mai
- D) Pattaya

Answer: Bangkok

29. What is the capital of Vietnam?

- A) Hanoi
- B) Ho Chi Minh City
- C) Da Nang
- D) Hue

Answer: Hanoi

30. What is the capital of the Philippines?

- A) Manila
- B) Cebu City
- C) Davao City
- D) Quezon City

Answer: Manila

31. What is the capital of Malaysia?

- A) Kuala Lumpur
- B) Penang
- C) Johor Bahru
- D) Malacca

Answer: Kuala Lumpur

32. What is the capital of the city-state of Singapore?

- A) Singapore
- B) Sentosa
- C) Jurong
- D) Changi

Answer: Singapore

33. What is the capital of Nigeria?

- A) Abuja
- B) Lagos
- C) Kano
- D) Ibadan

Answer: Abuja

34. What is the capital of Kenya?

- A) Nairobi
- B) Mombasa
- C) Kisumu
- D) Nakuru

Answer: Nairobi

35. What is the capital of Argentina?

- A) Buenos Aires
- B) Cordoba
- C) Rosario
- D) Mendoza

Answer: Buenos Aires

36. What is the capital of Chile?

- A) Santiago
- B) Valparaiso
- C) Concepcion
- D) Antofagasta

Answer: Santiago

37. What is the capital of Sweden?

- A) Stockholm
- B) Gothenburg
- C) Malmo
- D) Uppsala

Answer: Stockholm

1. What is the capital of Australia?

- A) Canberra
- B) Sydney
- C) Melbourne
- D) Brisbane

Answer: Canberra

2. What is the capital of Canada?

- A) Ottawa
- B) Toronto
- C) Vancouver
- D) Montreal

Answer: Ottawa

3. What is the capital of Brazil?

- A) Brasilia
- B) Rio de Janeiro
- C) Sao Paulo
- D) Salvador

Answer: Brasilia

4. Which international organization, headquartered in Geneva, focuses on global public health?

- A) World Health Organization
- B) UNICEF
- C) Red Cross
- D) UNESCO

Answer: World Health Organization

5. What is the name of the currency used by most European Union member countries?

- A) Euro
- B) Pound
- C) Franc
- D) Mark

Answer: Euro

6. Which country has the most time zones in the world, due to its overseas territories?

- A) France
- B) Russia
- C) United States
- D) United Kingdom

Answer: France

7. Which strait separates Europe and Africa at its narrowest point?

- A) Strait of Gibraltar
- B) Bosphorus Strait
- C) Strait of Hormuz
- D) Bering Strait

Answer: Strait of Gibraltar

A) United States and Canada

B) Russia and China

C) Brazil and Argentina

D) India and China

Answer: United States and Canada

16. What is the name of the UN's specialized agency responsible for education, science, and culture?

- A) UNESCO
- B) UNICEF
- C) WHO
- D) UNDP

Answer: UNESCO

17. What is the name of the canal, opened in 1869, that connects the Mediterranean Sea to the Red Sea?

- A) Suez Canal
- B) Panama Canal
- C) Corinth Canal
- D) Kiel Canal

Answer: Suez Canal

18. What is the largest ocean on Earth?

- A) Pacific Ocean
- B) Atlantic Ocean
- C) Indian Ocean
- D) Arctic Ocean

Answer: Pacific Ocean

19. What is the smallest ocean on Earth?

- A) Arctic Ocean
- B) Indian Ocean
- C) Southern Ocean
- D) Atlantic Ocean

Answer: Arctic Ocean

20. Which two continents does the Isthmus of Panama connect?

- A) North America and South America
- B) Africa and Asia
- C) Europe and Asia
- D) North America and Asia

Answer: North America and South America

21. What is the longest river in South America?

- A) Amazon River
- B) Parana River
- C) Orinoco River
- D) Sao Francisco River

Answer: Amazon River

22. What is the largest lake in Africa by surface area?

- A) Lake Victoria
- B) Lake Tanganyika
- C) Lake Malawi
- D) Lake Chad

Answer: Lake Victoria

23. Which mountain range runs along the western edge of South America?

- A) The Andes
- B) The Rockies
- C) The Alps
- D) The Atlas Mountains

Answer: The Andes

24. What is the highest mountain in Africa?

- A) Mount Kilimanjaro
- B) Mount Kenya
- C) Mount Stanley
- D) Mount Meru

Answer: Mount Kilimanjaro

25. What is the highest mountain in North America?

- A) Denali
- B) Mount Whitney
- C) Mount Logan
- D) Pikes Peak

Answer: Denali

26. What is the name of the international organization of Portuguese-speaking countries?

- A) Community of Portuguese Language Countries
- B) Lusophone Union
- C) Iberian Alliance
- D) Atlantic Charter Group

Answer: Community of Portuguese Language Countries

27. Excluding Russia, which country is the largest by land area entirely within Europe?

- A) Ukraine
- B) France
- C) Spain
- D) Germany

Answer: Ukraine

28. What is the name of the mountain range separating Spain from France?

- A) The Pyrenees
- B) The Alps
- C) The Apennines
- D) The Cantabrian Mountains

Answer: The Pyrenees

29. What is the world's largest island, excluding continental landmasses?

- A) Greenland
- B) New Guinea
- C) Borneo
- D) Madagascar

Answer: Greenland

30. Which strait separates the Indonesian islands of Sumatra and Java?

- A) Sunda Strait
- B) Strait of Malacca
- C) Makassar Strait
- D) Lombok Strait

Answer: Sunda Strait

31. What is the name of the vast desert covering much of Mongolia and northern China?

- A) Gobi Desert

- B) Taklamakan Desert
- C) Thar Desert
- D) Karakum Desert

Answer: Gobi Desert

32. Which landlocked South American country lies alongside Bolivia?

- A) Paraguay
- B) Uruguay
- C) Ecuador
- D) Guyana

Answer: Paraguay

33. What is the seat of the European Union's main administrative institutions?

- A) Brussels
- B) Strasbourg
- C) Frankfurt
- D) The Hague

Answer: Brussels

34. Which African country was formerly known as Rhodesia?

- A) Zimbabwe
- B) Zambia
- C) Malawi
- D) Botswana

Answer: Zimbabwe

35. What is the name of the currency used in Japan?

- A) Japanese Yen
- B) Japanese Won
- C) Japanese Dollar
- D) Japanese Ringgit

Answer: Japanese Yen

36. What is the name of the currency used in India?

- A) Indian Rupee
- B) Indian Taka
- C) Indian Dinar
- D) Indian Ringgit

Answer: Indian Rupee

37. Which country is the world's largest exporter of coffee?

- A) Brazil
- B) Colombia
- C) Vietnam
- D) Ethiopia

Answer: Brazil

Medium • Segment 3 (Q7–Q9)

1. Which country recognizes 11 official languages, including Zulu, Xhosa, and Afrikaans?

- A) South Africa
- B) Nigeria
- C) Kenya

D) India

Answer: South Africa

2. What is the name of the world's largest coral reef system, located off Australia's coast?

A) Great Barrier Reef

B) Red Sea Coral Reef

C) Belize Barrier Reef

D) Coral Triangle

Answer: Great Barrier Reef

3. Which strait separates Asia from North America?

A) Bering Strait

B) Strait of Malacca

C) Davis Strait

D) Cook Strait

Answer: Bering Strait

4. What is the capital of South Korea?

A) Seoul

B) Busan

C) Incheon

D) Daegu

Answer: Seoul

5. Which mountain range separates Europe from Asia within Russia?

A) Ural Mountains

B) Caucasus Mountains

C) Carpathian Mountains

D) Altai Mountains

Answer: Ural Mountains

6. What is the name of the 1949 treaty organization for collective defense among North American and European countries?

A) NATO

B) Warsaw Pact

C) SEATO

D) ANZUS

Answer: NATO

7. Which African country is the most populous?

A) Nigeria

B) Ethiopia

C) Egypt

D) South Africa

Answer: Nigeria

A) Antarctic Desert

B) Gobi Desert

C) Arctic Desert

D) Patagonian Desert

Answer: Antarctic Desert

9. Which country has the most natural lakes in the world?

- A) Canada
- B) Russia
- C) Finland
- D) United States

Answer: Canada

10. What is the name of the group of European countries that use the Euro as their official currency?

- A) Eurozone
- B) European Union
- C) Schengen Area
- D) European Economic Area

Answer: Eurozone

11. Which country is the only one to border both the Atlantic and Indian Oceans on the African continent?

- A) South Africa
- B) Mozambique
- C) Namibia
- D) Kenya

Answer: South Africa

12. What is the name of the imaginary line at 0 degrees longitude that passes through Greenwich, England?

- A) Prime Meridian
- B) Equator
- C) Tropic of Cancer
- D) International Date Line

Answer: Prime Meridian

13. Which country has more pyramids than Egypt?

- A) Sudan
- B) Libya
- C) Mexico
- D) Peru

Answer: Sudan

14. What is the smallest country in the world by population?

- A) Vatican City
- B) Tuvalu
- C) Nauru
- D) San Marino

Answer: Vatican City

15. Which sea, bordering Jordan and Israel, is the saltiest large body of water in the world?

- A) Dead Sea
- B) Red Sea
- C) Caspian Sea
- D) Black Sea

Answer: Dead Sea

- A) The Greatest Journey
- B) Path to Glory
- C) Flame of Unity
- D) Winter's Light

Answer: The Greatest Journey

18. What is the term for OpenAI's GPT-5, marking the company's first model to combine fast conversational replies with deep reasoning in one system?

- A) Unified model
- B) Hybrid model
- C) Multimodal model
- D) Composite model

Answer: Unified model

19. Which company's LLM-based Siri overhaul, reportedly code-named "Linwood," was planned for release around spring 2026?

- A) Apple
- B) Google
- C) Samsung
- D) Amazon

Answer: Apple

20. Which Chinese AI company's GLM-5.2 model sparked debate in 2025-2026 about China catching up to the US in the AI race?

- A) Z.ai
- B) Baidu

- C) Alibaba
- D) Tencent

Answer: Z.ai

21. Which social media platform faced a lawsuit from AI companies including OpenAI and Google over data-scraping restrictions in 2025?

- A) Reddit
- B) Twitter/X
- C) Facebook
- D) LinkedIn

Answer: Reddit

22. Out of how many directly-elected seats did the BNP win 209 in Bangladesh's February 2026 election?

- A) 300
- B) 350
- C) 250
- D) 330

Answer: 300

23. What is the name of the new Bangladeshi political party formed by leaders of the 2024 student-led uprising?

- A) National Citizen Party
- B) People's Freedom Party
- C) Students Democratic Front
- D) New Bangladesh Movement

Answer: National Citizen Party

24. Which two 2025 Nobel Economics laureates formalized the concept of growth through "creative destruction," building on economist Joseph Schumpeter's ideas?

- A) Philippe Aghion and Peter Howitt
- B) Joel Mokyr and Daron Acemoglu
- C) Paul Romer and Robert Solow
- D) Amartya Sen and Angus Deaton

Answer: Philippe Aghion and Peter Howitt

25. Which 2025 Nobel Economics laureate, who worked with Philippe Aghion on growth theory, is Canadian?

- A) Peter Howitt
- B) Joel Mokyr
- C) Daron Acemoglu
- D) James Robinson

Answer: Peter Howitt

26. Who are the two additional 2025 Nobel Physics laureates who shared the prize alongside John Clarke for quantum tunnelling research?

- A) Michel Devoret and John M. Martinis
- B) Peter Higgs and Francois Englert
- C) Alain Aspect and Anton Zeilinger
- D) Kip Thorne and Rainer Weiss

Answer: Michel Devoret and John M. Martinis

27. What nationality is Michel Devoret, one of the three 2025 Nobel Physics laureates?

- A) French
- B) German

- C) British
- D) Italian

Answer: French

28. Which of the 2025 Nobel Medicine laureates is Japanese, known for foundational work on regulatory T cells?

- A) Shimon Sakaguchi
- B) Mary Brunkow
- C) Fred Ramsdell
- D) Tasuku Honjo

Answer: Shimon Sakaguchi

29. What immune cell type did the 2025 Nobel Medicine laureates' research primarily focus on, important for preventing autoimmune disease?

- A) Regulatory T cells
- B) B cells
- C) Natural killer cells
- D) Macrophages

Answer: Regulatory T cells

30. What was the name of NASA's uncrewed lunar flyby mission that tested the Orion spacecraft in 2022, immediately preceding Artemis II?

- A) Artemis I
- B) Artemis 0
- C) Exploration Mission 1
- D) Constellation I

Answer: Artemis I

31. Approximately how many days did the Artemis II mission's crewed lunar flyby take?

- A) About 10 days
- B) About 3 days
- C) About 30 days
- D) About 20 days

Answer: About 10 days

32. Which Artemis II astronaut, a US Navy pilot and veteran NASA astronaut, commanded the mission?

- A) Reid Wiseman
- B) Victor Glover
- C) Jeremy Hansen
- D) Christina Koch

Answer: Reid Wiseman

33. Which Artemis II crew member previously held the record for the longest single spaceflight by a woman, at 328 days aboard the ISS?

- A) Christina Koch
- B) Reid Wiseman
- C) Victor Glover
- D) Peggy Whitson

Answer: Christina Koch

34. Which private American company is developing the Starship vehicle intended to serve as the crewed lunar lander for future Artemis missions?

- A) SpaceX
- B) Blue Origin

- C) Boeing
- D) Lockheed Martin

Answer: SpaceX

35. Which Artemis II astronaut serves as the mission's pilot, and previously flew to the ISS aboard a SpaceX Crew Dragon?

- A) Victor Glover
- B) Reid Wiseman
- C) Jeremy Hansen
- D) Christina Koch

Answer: Victor Glover

36. What is the term for the process by which OpenAI's GPT-5 was made available to free ChatGPT users, lowering the barrier to advanced AI reasoning?

- A) Democratization of reasoning-grade AI
- B) Open-sourcing
- C) Freemium rollout
- D) Public beta release

Answer: Democratization of reasoning-grade AI

37. What was the estimated amount of water US data centers consumed in 2025, largely driven by AI workloads for server cooling?

- A) 264 billion gallons
- B) 50 billion gallons
- C) 1 trillion gallons
- D) 10 billion gallons

Answer: 264 billion gallons

Medium-Hard • Segment 4 (Q10–Q12)

1. Which fast bowler, Player of the Match in the 2026 T20 World Cup final, also plays IPL cricket for Mumbai Indians?

- A) Jasprit Bumrah
- B) Mohammed Shami
- C) Arshdeep Singh
- D) Mohammed Siraj

Answer: Jasprit Bumrah

2. Which New Zealand batter scored the fastest century in T20 World Cup history at the 2026 tournament?

- A) Finn Allen
- B) Kane Williamson
- C) Devon Conway
- D) Glenn Phillips

Answer: Finn Allen

3. What edition number was the 2026 ICC Men's T20 World Cup, a tournament first held in 2007?

- A) 10th edition
- B) 8th edition
- C) 12th edition
- D) 6th edition

Answer: 10th edition

4. Which two nations are set to co-host the 2028 ICC Men's T20 World Cup?

- A) Australia and New Zealand
- B) India and Sri Lanka
- C) England and Ireland
- D) South Africa and Zimbabwe

Answer: Australia and New Zealand

5. At which Mumbai venue did India play their opening 2026 T20 World Cup match, against the United States?

- A) Wankhede Stadium
- B) Narendra Modi Stadium
- C) Eden Gardens
- D) Arun Jaitley Stadium

Answer: Wankhede Stadium

6. Which space agency built the European Service Module that powers and propels the Artemis II spacecraft?

- A) European Space Agency
- B) Canadian Space Agency
- C) Japan Aerospace Exploration Agency
- D) Roscosmos

Answer: European Space Agency

7. From which launch pad at Kennedy Space Center did Artemis II lift off in 2026?

- A) Launch Pad 39B
- B) Launch Pad 39A
- C) Launch Complex 40
- D) Launch Complex 41

Answer: Launch Pad 39B

8. Laszlo Krasznahorkai, the 2025 Nobel Literature laureate, writes in which language?

- A) Hungarian
- B) Polish
- C) Czech
- D) Romanian

Answer: Hungarian

9. What was the reported total prize pool for the 2026 ICC Men's T20 World Cup, with champions India receiving \$3 million?

- A) \$13.5 million
- B) \$5 million
- C) \$25 million
- D) \$50 million

Answer: \$13.5 million

10. Which Bangladeshi political figure had earlier legal convictions overturned by courts following the 2024 change of government?

- A) Tarique Rahman
- B) Mirza Fakhrul Islam Alamgir
- C) Amir Khosru Mahmud Chowdhury
- D) Salahuddin Ahmed

Answer: Tarique Rahman

11. Who serves as Secretary General of the Bangladesh Nationalist Party under chairman Tarique Rahman?

- A) Mirza Fakhurul Islam Alamgir
- B) Amir Khosru Mahmud Chowdhury
- C) Humayun Kabir
- D) Salahuddin Ahmed

Answer: Mirza Fakhurul Islam Alamgir

12. Which Bangladeshi military figure, Chief of Army Staff, had publicly called for elections to be held by December 2025?

- A) General Waker-uz-Zaman
- B) General Aziz Ahmed
- C) General S M Shafiuddin Ahmed
- D) General Ziaur Rahman

Answer: General Waker-uz-Zaman

13. Which Italian alpine town, nicknamed the "Queen of the Dolomites" and previous host of the 1956 Winter Olympics, anchored the mountain cluster at Milan-Cortina 2026?

- A) Cortina d'Ampezzo
- B) Livigno
- C) Bormio
- D) Bolzano

Answer: Cortina d'Ampezzo

14. What was the venue for the Opening Ceremony of the 2026 Winter Olympics in Milan?

- A) San Siro Stadium
- B) PalaItalia Santa Giulia
- C) Assago Forum
- D) Hockey Arena

Answer: San Siro Stadium

15. Approximately how many athletes and from how many countries competed at the 2026 Milan-Cortina Winter Olympics?

- A) Around 2,900 athletes from about 90 countries
- B) Around 500 athletes from 30 countries
- C) Around 10,000 athletes from 150 countries
- D) Around 1,000 athletes from 50 countries

Answer: Around 2,900 athletes from about 90 countries

16. Which company built the HALO habitation module for NASA's lunar Gateway station, integrated at a facility in Arizona?

- A) Northrop Grumman
- B) Lockheed Martin
- C) Boeing
- D) SpaceX

Answer: Northrop Grumman

17. Which BNP figure was appointed as an adviser to PM Tarique Rahman on foreign affairs, tipped to become foreign minister?

- A) Humayun Kabir
- B) Amir Khosru Mahmud Chowdhury
- C) Mirza Fakhurul Islam Alamgir
- D) Salahuddin Ahmed

Answer: Humayun Kabir

1. How many torchbearers participated in the 2026 Winter Olympics torch relay across its roughly 12,000 km route?

- A) 10,001
- B) 5,000
- C) 15,000
- D) 8,500

Answer: 10,001

2. What was the recorded attendance at the 2026 T20 World Cup final in Ahmedabad?

- A) 86,824
- B) 60,000
- C) 100,000
- D) 45,000

Answer: 86,824

3. Which two umpires officiated the 2026 T20 World Cup final between India and New Zealand?

- A) Richard Illingworth and Alex Wharf
- B) Marais Erasmus and Chris Gaffaney
- C) Kumar Dharmasena and Rod Tucker
- D) Aleem Dar and Ian Gould

Answer: Richard Illingworth and Alex Wharf

4. How many consecutive ICC limited-overs tournament wins had India's streak reached before South Africa ended it at the 2026 T20 World Cup?

- A) 17
- B) 12
- C) 20
- D) 9

Answer: 17

5. Which four regions held qualification tournaments that brought associate nations like Namibia, Nepal, and Italy into the 2026 T20 World Cup?

- A) Africa, Americas, Asia/East Asia-Pacific, and Europe
- B) Only an Asia qualifier
- C) A single global qualifier
- D) ICC direct invitations only

Answer: Africa, Americas, Asia/East Asia-Pacific, and Europe

6. Approximately how many executive orders had US President Donald Trump signed by the end of 2025, more than any predecessor's opening year?

- A) About 225
- B) About 100
- C) About 400
- D) About 50

Answer: About 225

7. What is the name of NASA's lunar space station project, whose power system was activated for the first time in early 2026?

- A) Gateway
- B) Orion
- C) Artemis Base Camp

D) Lunar Outpost

Answer: Gateway

8. Along with the general election, what constitutional matter did Bangladeshi voters also decide on around February 2026?

A) A referendum on the July Charter reforms

B) Independence from the Commonwealth

C) A new national flag design

D) Direct election of the President

Answer: A referendum on the July Charter reforms

9. The 2025 Nobel Prize in Physics recognized research that could advance which technology, alongside quantum computing and quantum sensing?

A) Quantum cryptography

B) Quantum farming

C) Quantum broadcasting

D) Quantum weather forecasting

Answer: Quantum cryptography

10. Approximately how many years before 2025 was the field of quantum mechanics first developed, marked by a designated international year?

A) 100 years

B) 50 years

C) 150 years

D) 75 years

Answer: 100 years

11. How many total venues were used to host events across the 2026 Milan-Cortina Winter Olympics?

A) 15 venues

B) 8 venues

C) 20 venues

D) 12 venues

Answer: 15 venues

12. What Winter Olympics record did Team USA break at Milan-Cortina 2026, previously set at the 2002 Salt Lake City Games?

A) Most gold medals by the US at a single Winter Olympics

B) Most total medals ever by any nation

C) Most athletes sent by a single nation

D) Youngest average team age

Answer: Most gold medals by the US at a single Winter Olympics

13. How many gold medals did Team USA win at the 2026 Winter Olympics, breaking its previous record of 10?

A) 12

B) 14

C) 11

D) 15

Answer: 12

14. What was India's score in the 2026 T20 World Cup final, the highest total ever posted in a T20 World Cup final?

A) 255/5

B) 230/6

C) 270/4

D) 210/7

Answer: 255/5

15. Which Indian Prime Minister sent a personal letter to Tarique Rahman via Lok Sabha Speaker Om Birla, inviting him to visit India?

A) Narendra Modi

B) Manmohan Singh

C) Droupadi Murmu

D) Rajnath Singh

Answer: Narendra Modi

16. What kind of era has NASA described itself as being in, referenced around the Artemis II mission and its increased exploration cadence?

A) A "Golden Age" of exploration

B) The "Second Space Race"

C) The "New Frontier" era

D) "Moonshot 2.0"

Answer: A "Golden Age" of exploration

17. Which historic English cathedral installed Sarah Mullally as the first female Archbishop of Canterbury in March 2026?

A) Canterbury Cathedral

B) Westminster Abbey

C) St Paul's Cathedral

D) York Minster

Answer: Canterbury Cathedral

Entertainment

Easy • Segment 1 (Q1–Q3)

1. Who wrote the Harry Potter book series?

- A) J.K. Rowling
- B) Suzanne Collins
- C) Stephenie Meyer
- D) Rick Riordan

Answer: J.K. Rowling

2. What is the name of the fictional wizarding school in the Harry Potter series?

- A) Hogwarts

- D) Monster Hunter

Answer: Pokemon

33. Which actor played Captain Jack Sparrow in the "Pirates of the Caribbean" film series?

- A) Johnny Depp
- B) Orlando Bloom
- C) Geoffrey Rush
- D) Javier Bardem

Answer: Johnny Depp

34. Which director, known for a distinctive gothic visual style, made "Edward Scissorhands" and "Alice in Wonderland"?

- A) Tim Burton
- B) Guillermo del Toro
- C) Wes Anderson
- D) David Fincher

Answer: Tim Burton

35. What is the name of Hayao Miyazaki's Academy Award-winning 2001 animated film about a girl who enters a magical spirit world?

- A) Spirited Away
- B) Princess Mononoke
- C) My Neighbor Totoro
- D) Howl's Moving Castle

Answer: Spirited Away

36. What is the name of the fictional archaeologist and adventurer played by Harrison Ford in a famous film franchise?

- A) Indiana Jones
- B) Nathan Drake
- C) Lara Croft
- D) Rick O'Connell

Answer: Indiana Jones

37. Which actor plays the title role in the "John Wick" action film series?

- A) Keanu Reeves
- B) Jason Statham
- C) Liam Neeson
- D) Matt Damon

Answer: Keanu Reeves

Medium • Segment 3 (Q7–Q9)

1. Which actor holds the record for the most Academy Award nominations for acting?

- A) Meryl Streep
- B) Katharine Hepburn
- C) Jack Nicholson
- D) Daniel Day-Lewis

Answer: Meryl Streep

2. In what year was The Walt Disney Company founded?

- A) 1923
- B) 1901
- C) 1937
- D) 1955

Answer: 1923

3. Which composer, known for collaborating with Disney, wrote the score for "The Lion King" (1994)?

- A) Hans Zimmer
- B) Alan Menken
- C) John Williams
- D) Randy Newman

Answer: Hans Zimmer

4. What is the name of the longest-running scripted primetime American TV show, an animated sitcom that debuted in 1989?

- A) The Simpsons
- B) Family Guy
- C) South Park
- D) King of the Hill

Answer: The Simpsons

5. Which 1997 film became the first to gross over \$1 billion worldwide?

- A) Titanic
- B) Jurassic Park
- C) Star Wars
- D) Independence Day

Answer: Titanic

6. Which artist's album "Thriller" is the best-selling album of all time?

- A) Michael Jackson
- B) Whitney Houston
- C) Elvis Presley
- D) Madonna

Answer: Michael Jackson

7. What is the name of the award given for outstanding achievement in television, considered the TV equivalent of the Oscars?

- A) Emmy Award
- B) Golden Globe
- C) SAG Award
- D) Peabody Award

Answer: Emmy Award

8. Which actress has won the most competitive Academy Awards for acting, with 4 wins?

- A) Katharine Hepburn
- B) Meryl Streep
- C) Bette Davis
- D) Ingrid Bergman

Answer: Katharine Hepburn

9. What is the fictional London address where Sherlock Holmes lives?

- A) 221B Baker Street
- B) 10 Downing Street
- C) 42 Wallaby Way
- D) 12 Grimmauld Place

Answer: 221B Baker Street

10. Which 1972 film, directed by Francis Ford Coppola, is often ranked among the greatest films ever made?

- A) The Godfather
- B) Apocalypse Now
- C) Goodfellas
- D) Scarface

Answer: The Godfather

11. Which British rock band's members include Freddie Mercury, Brian May, and Roger Taylor?

- A) Queen
- B) Led Zeppelin
- C) The Who
- D) Deep Purple

Answer: Queen

12. What is the name of the annual awards show honoring excellence in Broadway theatre?

- A) Tony Awards
- B) Emmy Awards
- C) Grammy Awards
- D) Drama Desk Awards

Answer: Tony Awards

13. Which actor played the Joker in "The Dark Knight" (2008), winning a posthumous Academy Award?

- A) Heath Ledger
- B) Jack Nicholson
- C) Jared Leto
- D) Joaquin Phoenix

Answer: Heath Ledger

14. In which fictional town is the American sitcom "The Simpsons" set?

- A) Springfield

- B) Shelbyville
- C) Ogdenville
- D) Capital City

Answer: Springfield

15. Which musician's real name is Robyn Rihanna Fenty?

- A) Rihanna
- B) Beyonce
- C) Nicki Minaj
- D) Alicia Keys

Answer: Rihanna

16. Which Japanese animation studio produced films like "Spirited Away" and "My Neighbor Totoro"?

- A) Studio Ghibli
- B) Toei Animation
- C) Madhouse
- D) Kyoto Animation

Answer: Studio Ghibli

17. Which actor is widely regarded as the greatest silent film comedian, known for his character "The Tramp"?

- A) Charlie Chaplin
- B) Buster Keaton
- C) Harold Lloyd
- D) Stan Laurel

Answer: Charlie Chaplin

18. Which actress won multiple consecutive Emmy Awards for Lead Actress in a Comedy Series for her role in "Veep"?

- A) Julia Louis-Dreyfus
- B) Tina Fey
- C) Amy Poehler
- D) Ellie Kemper

Answer: Julia Louis-Dreyfus

19. What is the name of the long-running animated show following the Belcher family who run a burger restaurant?

- A) Bob's Burgers
- B) Family Guy
- C) American Dad
- D) King of the Hill

Answer: Bob's Burgers

20. What is the name of the adult animated sitcom created by Seth MacFarlane, featuring the Griffin family?

- A) Family Guy
- B) Bob's Burgers
- C) South Park
- D) Rick and Morty

Answer: Family Guy

21. Who composed the score for the "Pirates of the Caribbean" film franchise?

- A) Hans Zimmer
- B) John Williams

- C) Alan Silvestri
- D) James Newton Howard

Answer: Hans Zimmer

22. What is the name of the annual awards ceremony for video games, sometimes called the "Oscars of gaming"?

- A) The Game Awards
- B) BAFTA Games Awards
- C) D.I.C.E. Awards
- D) Golden Joystick Awards

Answer: The Game Awards

23. Which video game won Game of the Year at The Game Awards in 2023?

- A) Baldur's Gate 3
- B) Alan Wake 2
- C) Spider-Man 2
- D) Zelda: Tears of the Kingdom

Answer: Baldur's Gate 3

24. What is the name of the popular open-world crime video game franchise published by Rockstar Games?

- A) Grand Theft Auto
- B) Saints Row
- C) Watch Dogs
- D) Sleeping Dogs

Answer: Grand Theft Auto

25. What is the name of the multiplayer online battle arena game developed by Riot Games, a major esports title?

- A) League of Legends
- B) Dota 2
- C) Valorant
- D) Overwatch

Answer: League of Legends

26. What is the name of the popular battle royale video game developed by Epic Games?

- A) Fortnite
- B) PUBG
- C) Apex Legends
- D) Warzone

Answer: Fortnite

27. Which actor won the Academy Award for Best Actor for portraying Freddie Mercury in "Bohemian Rhapsody" (2018)?

- A) Rami Malek
- B) Taron Egerton
- C) Timothee Chalamet
- D) Joaquin Phoenix

Answer: Rami Malek

28. What is the name of the popular musical based on the songs of ABBA, later adapted into a hit film?

- A) Mamma Mia!
- B) Jersey Boys
- C) Rock of Ages

D) Moulin Rouge!

Answer: Mamma Mia!

29. Which actress played Donna, the mother, in the "Mamma Mia!" film series?

A) Meryl Streep

B) Amanda Seyfried

C) Julie Walters

D) Christine Baranski

Answer: Meryl Streep

30. What is the name of the popular animated film franchise featuring a green ogre?

A) Shrek

B) Trolls

C) Hotel Transylvania

D) The Croods

Answer: Shrek

31. Which actor voices the title character in the "Shrek" film franchise?

A) Mike Myers

B) Eddie Murphy

C) Antonio Banderas

D) Cameron Diaz

Answer: Mike Myers

32. What is the name of the 2022 sequel to "Avatar," which became one of the highest-grossing films of all time?

A) Avatar: The Way of Water

B) Avatar: Fire and Ash

C) Avatar: The New World

D) Avatar Returns

Answer: Avatar: The Way of Water

33. What is the name of the internationally franchised competitive cooking show in which home cooks compete under time pressure?

A) MasterChef

B) Top Chef

C) Hell's Kitchen

D) Chopped

Answer: MasterChef

34. What is the name of the anime and manga franchise about a student who gains a supernatural notebook that can kill anyone whose name is written in it?

A) Death Note

B) Tokyo Ghoul

C) Attack on Titan

D) Code Geass

Answer: Death Note

35. Which actor played the title role in the "Wolverine" solo film series, part of the X-Men franchise?

A) Hugh Jackman

B) Ryan Reynolds

C) Liev Schreiber

D) James Marsden

Answer: Hugh Jackman

36. What is the name of the Pixar animated film about a Mexican boy who travels to the Land of the Dead?

- A) Coco
- B) The Book of Life
- C) Encanto
- D) Luca

Answer: Coco

37. Which composer wrote the score for Pixar's "Coco," incorporating traditional Mexican music?

- A) Michael Giacchino
- B) Randy Newman
- C) Thomas Newman
- D) Alexandre Desplat

Answer: Michael Giacchino

Medium-Hard • Segment 4 (Q10–Q12)

1. Who was the first African American actor to win the Academy Award for Best Actor?

- A) Sidney Poitier
- B) Denzel Washington
- C) Morgan Freeman
- D) Forest Whitaker

Answer: Sidney Poitier

2. Which 2003 fantasy film swept all 11 Academy Awards it was nominated for, tying the record for most Oscar wins?

- A) The Lord of the Rings: The Return of the King
- B) Titanic
- C) Ben-Hur
- D) The Lord of the Rings: The Fellowship of the Ring

Answer: The Lord of the Rings: The Return of the King

3. Who composed the iconic two-note theme music for "Jaws"?

- A) John Williams
- B) Bernard Herrmann
- C) Ennio Morricone
- D) Jerry Goldsmith

Answer: John Williams

4. What is the name of the record label famously associated with the "Motown Sound" of the 1960s?

- A) Motown Records
- B) Atlantic Records
- C) Stax Records
- D) Sun Records

Answer: Motown Records

5. Which actress became the youngest person to win a competitive Academy Award for acting, at age 10, for "Paper Moon"?

- A) Tatum O'Neal
- B) Anna Paquin
- C) Shirley Temple
- D) Quvenzhané Wallis

Answer: Tatum O'Neal

6. What is the name of the fictional prison in the film "The Shawshank Redemption"?

- A) Shawshank State Penitentiary
- B) Alcatraz
- C) Sing Sing
- D) Blackgate Prison

Answer: Shawshank State Penitentiary

7. Which musician is known as "The Boss," famous for albums like "Born to Run"?

- A) Bruce Springsteen
- B) Bob Seger
- C) Tom Petty
- D) Billy Joel

Answer: Bruce Springsteen

8. What is the name of the highest honor awarded at the Cannes Film Festival?

- A) Palme d'Or
- B) Golden Lion
- C) Golden Bear
- D) Silver Shell

Answer: Palme d'Or

9. Which director is known for distinctive, symmetrical visual styles in films like "The Grand Budapest Hotel" and "Moonrise Kingdom"?

- A) Wes Anderson
- B) Tim Burton
- C) Guillermo del Toro
- D) Spike Jonze

Answer: Wes Anderson

10. What is the name of the fictional criminal organization that James Bond frequently battles?

- A) SPECTRE
- B) HYDRA
- C) COBRA
- D) KAOS

Answer: SPECTRE

11. Which actor played both a young and old version of a character in "The Curious Case of Benjamin Button," aging in reverse?

- A) Brad Pitt
- B) Tom Hanks
- C) Will Smith
- D) George Clooney

Answer: Brad Pitt

12. Which Bollywood actor is often referred to as the "King of Bollywood" or "King Khan"?

- A) Shah Rukh Khan
- B) Salman Khan
- C) Aamir Khan
- D) Saif Ali Khan

Answer: Shah Rukh Khan

13. What is the name of the 1927 film considered the first "talkie" with synchronized dialogue?

- A) The Jazz Singer

- B) Wings
- C) Sunrise
- D) Metropolis

Answer: The Jazz Singer

14. Which composer wrote the scores for both "Interstellar" and "Inception"?

- A) Hans Zimmer
- B) John Williams
- C) Thomas Newman
- D) Alexandre Desplat

Answer: Hans Zimmer

15. What is the name of the British Academy's annual film awards, considered the UK equivalent of the Oscars?

- A) BAFTA Awards
- B) Empire Awards
- C) London Film Critics Circle Awards
- D) British Independent Film Awards

Answer: BAFTA Awards

16. Which composer is known for scoring the "Harry Potter," "Jurassic Park," and "Star Wars" franchises?

- A) John Williams
- B) Hans Zimmer
- C) Danny Elfman
- D) James Newton Howard

Answer: John Williams

17. What is the popular term for a film sequel, prequel, or spin-off designed to launch a shared fictional universe?

- A) Franchise starter
- B) Spin-off
- C) Reboot
- D) Remake

Answer: Franchise starter

Hard • Segment 5 (Q13–Q15)

1. Which film, now widely regarded as one of the greatest ever made, lost the Best Picture Oscar for 1941 to "How Green Was My Valley"?

- A) Citizen Kane
- B) The Maltese Falcon
- C) Sergeant York
- D) Suspicion

Answer: Citizen Kane

2. Who directed and starred in the lead role of the influential 1941 film "Citizen Kane"?

- A) Orson Welles
- B) John Ford
- C) William Wyler
- D) Preston Sturges

Answer: Orson Welles

3. What is the name of the film technique, associated with Alfred Hitchcock's "Vertigo," combining a zoom and an opposing camera dolly move?

- A) Dolly zoom
- B) Match cut
- C) Jump cut
- D) Rack focus

Answer: Dolly zoom

4. Which Andrew Lloyd Webber musical was the longest-running show in Broadway history before its 2023 closing?

- A) The Phantom of the Opera
- B) Cats
- C) Les Miserables
- D) Evita

Answer: The Phantom of the Opera

5. Which silent film star created, wrote, and directed the character known as "The Tramp"?

- A) Charlie Chaplin
- B) Buster Keaton
- C) Harold Lloyd
- D) Fatty Arbuckle

Answer: Charlie Chaplin

6. Which 1995 Pixar film became the first fully computer-animated feature film ever released?

- A) Toy Story
- B) A Bug's Life
- C) Antz
- D) Shrek

Answer: Toy Story

7. Which actor was the first to win the Best Actor Academy Award in consecutive years, for 1937's "Captains Courageous" and 1938's "Boys Town"?

- A) Spencer Tracy
- B) Clark Gable
- C) James Stewart
- D) Gary Cooper

Answer: Spencer Tracy

8. What is the name of the influential 1920s German film movement known for stark, angular sets and shadows, exemplified by "The Cabinet of Dr. Caligari"?

- A) German Expressionism
- B) Kammerspielfilm
- C) Neue Sachlichkeit
- D) Bauhaus cinema

Answer: German Expressionism

9. Who was the first actress to win an Academy Award for a performance in a foreign-language film, for 1962's "Two Women"?

- A) Sophia Loren
- B) Simone Signoret
- C) Anna Magnani
- D) Ingrid Bergman

Answer: Sophia Loren

10. Which French New Wave director is known for the 1960 film "Breathless"?

- A) Jean-Luc Godard
- B) Francois Truffaut
- C) Eric Rohmer
- D) Claude Chabrol

Answer: Jean-Luc Godard

11. Which 1988 Japanese animated film, directed by Isao Takahata, is considered one of the most devastating war dramas in animation history?

- A) Grave of the Fireflies
- B) Akira
- C) Princess Mononoke
- D) Barefoot Gen

Answer: Grave of the Fireflies

12. Which cinematographer, known for his work on "Citizen Kane," pioneered the use of deep-focus photography?

- A) Gregg Toland
- B) James Wong Howe
- C) Stanley Cortez
- D) Karl Freund

Answer: Gregg Toland

13. What is the Japanese term for a genre of anime and manga aimed primarily at young boys, exemplified by "Naruto" and "Dragon Ball"?

- A) Shonen
- B) Shojo
- C) Seinen
- D) Josei

Answer: Shonen

14. Whose 1971 album "What's Going On" is frequently cited among the greatest albums of all time for its social commentary?

- A) Marvin Gaye
- B) Stevie Wonder
- C) Curtis Mayfield
- D) Sam Cooke

Answer: Marvin Gaye

15. Which chart, first published in 1952, has tracked the best-selling singles in the United Kingdom?

- A) UK Singles Chart
- B) Billboard Hot 100
- C) ARIA Charts
- D) Eurochart

Answer: UK Singles Chart

16. Who was the first host of the Academy Awards ceremony, in 1929?

- A) Douglas Fairbanks
- B) Bob Hope
- C) Johnny Carson
- D) Billy Crystal

Answer: Douglas Fairbanks

17. What is the name of the animation technique, pioneered by Disney, using multiple layers of artwork at different distances from the camera to create depth?

- A) Multiplane camera
- B) Rotoscoping
- C) Cel shading
- D) Stop-motion

Answer: Multiplane camera

Science & Technology

Easy • Segment 1 (Q1–Q3)

1. What is the process called by which a cell divides to produce two identical daughter cells?

- A) Mitosis
- B) Meiosis
- C) Fertilization
- D) Osmosis

Answer: Mitosis

2. Newton's Second Law of Motion is commonly expressed by which equation?

- A) Force = mass x acceleration
- B) Energy = mass x speed of light squared
- C) Force = mass x acceleration squared
- D) Power = mass x velocity

Answer: Force = mass x acceleration

3. What term describes energy that is stored in an object because of its position?

- A) Potential energy
- B) Kinetic energy
- C) Thermal energy
- D) Chemical energy

Answer: Potential energy

4. Which layer of Earth's atmosphere contains the ozone layer?

- A) Stratosphere
- B) Troposphere
- C) Mesosphere
- D) Thermosphere

Answer: Stratosphere

5. What type of chemical bond involves atoms sharing pairs of electrons?

- A) Covalent bond
- B) Ionic bond
- C) Metallic bond
- D) Hydrogen bond

Answer: Covalent bond

6. What is the name of the scientific theory stating that all living things are made of cells?

- A) Cell theory
- B) Germ theory
- C) Evolution theory
- D) Big Bang theory

Answer: Cell theory

7. What term describes a protein that speeds up a specific biological chemical reaction?

- A) Enzyme
- B) Hormone
- C) Antibody
- D) Catalyst

Answer: Enzyme

8. What unit is used to measure the loudness of sound?

- A) Decibel
- B) Hertz
- C) Watt
- D) Pascal

Answer: Decibel

9. What is the process called by which the body converts food into usable energy?

- A) Metabolism
- B) Digestion
- C) Respiration
- D) Absorption

Answer: Metabolism

10. What term describes the bending of light as it passes from one medium into another?

- A) Refraction
- B) Reflection
- C) Diffraction
- D) Dispersion

Answer: Refraction

11. What do we call a substance made of two or more elements chemically combined in fixed proportions?

- A) Compound
- B) Mixture
- C) Solution
- D) Alloy

Answer: Compound

12. Which part of the human brain is primarily responsible for balance and coordination?

- A) Cerebellum
- B) Cerebrum
- C) Medulla oblongata
- D) Hypothalamus

Answer: Cerebellum

13. What is the name of the process where a solid changes directly into a gas without becoming liquid first?

- A) Sublimation
- B) Evaporation
- C) Condensation
- D) Deposition

Answer: Sublimation

14. What term describes the total number of protons and neutrons in an atomic nucleus?

- A) Mass number
- B) Atomic number
- C) Atomic mass
- D) Molar mass

Answer: Mass number

15. What is the name of the hormone, produced by the pancreas, that regulates blood sugar levels?

- A) Insulin
- B) Adrenaline

- C) Estrogen
- D) Thyroxine

Answer: Insulin

16. What term describes organisms that can produce their own food through photosynthesis or similar processes?

- A) Autotrophs
- B) Heterotrophs
- C) Decomposers
- D) Consumers

Answer: Autotrophs

17. What is the name of the force that opposes motion between two surfaces in contact?

- A) Friction
- B) Gravity
- C) Tension
- D) Momentum

Answer: Friction

18. What is the chemical symbol for iron?

- A) Fe
- B) Ir
- C) In
- D) I

Answer: Fe

19. What is the chemical symbol for potassium?

- A) K
- B) P
- C) Po
- D) Pt

Answer: K

20. What is the chemical symbol for silver?

- A) Ag
- B) Si
- C) Sv
- D) Sr

Answer: Ag

21. Which organ in the human body produces insulin?

- A) Pancreas
- B) Liver
- C) Kidney
- D) Spleen

Answer: Pancreas

22. What part of a cell contains most of its genetic material?

- A) Nucleus
- B) Cytoplasm
- C) Ribosome
- D) Cell membrane

Answer: Nucleus

23. What gas makes soda drinks fizzy?

- A) Carbon dioxide
- B) Oxygen
- C) Nitrogen
- D) Hydrogen

Answer: Carbon dioxide

24. What is the hardest natural substance found on Earth?

- A) Diamond
- B) Quartz
- C) Granite
- D) Titanium

Answer: Diamond

25. How many chambers does the human heart have?

- A) 4
- B) 2
- C) 3
- D) 6

Answer: 4

26. What do we call the process by which a caterpillar transforms into a butterfly?

- A) Metamorphosis
- B) Photosynthesis
- C) Pollination
- D) Germination

Answer: Metamorphosis

27. What part of the eye controls how much light enters, by adjusting the size of the pupil?

- A) Iris
- B) Retina
- C) Cornea
- D) Lens

Answer: Iris

28. What term describes organisms, like bacteria, that consist of only a single cell?

- A) Unicellular organisms
- B) Multicellular organisms
- C) Prokaryotic plants
- D) Cellular colonies

Answer: Unicellular organisms

29. What is the unit used to measure electric current?

- A) Ampere
- B) Volt
- C) Watt
- D) Joule

Answer: Ampere

30. What is the process by which plants lose water vapor through their leaves called?

- A) Transpiration
- B) Respiration
- C) Photosynthesis

D) Absorption

Answer: Transpiration

31. What do we call a substance that cannot be broken down into simpler substances by chemical means?

A) Element

B) Compound

C) Mixture

D) Molecule

Answer: Element

32. What is the boiling point of water in degrees Fahrenheit?

A) 212 F

B) 100 F

C) 32 F

D) 180 F

Answer: 212 F

33. What do we call the layer of Earth located beneath the crust, made of hot, dense rock?

A) Mantle

B) Core

C) Lithosphere

D) Crust

Answer: Mantle

34. What is the term for an animal without a backbone?

A) Invertebrate

B) Vertebrate

C) Mammal

D) Amphibian

Answer: Invertebrate

35. What is the term for an animal with a backbone?

A) Vertebrate

B) Invertebrate

C) Arthropod

D) Mollusk

Answer: Vertebrate

36. What do we call the process by which the body breaks down food into usable nutrients?

A) Digestion

B) Respiration

C) Circulation

D) Excretion

Answer: Digestion

37. What is the name of the gland in the human body often called the "master gland" because it controls other hormone-producing glands?

A) Pituitary gland

B) Thyroid gland

C) Adrenal gland

D) Pineal gland

Answer: Pituitary gland

1. What is the process called in which an RNA copy is made of a gene's DNA sequence?

- A) Transcription
- B) Translation
- C) Replication
- D) Mutation

Answer: Transcription

2. Which particle is responsible for mediating the electromagnetic force?

- A) Photon
- B) Gluon
- C) Boson
- D) Electron

Answer: Photon

3. What term describes the bending of a star's light by a massive object's gravity, as predicted by general relativity?

- A) Gravitational lensing
- B) Redshift
- C) Refraction
- D) Diffraction

Answer: Gravitational lensing

4. What is the process called by which an organism maintains a stable internal environment?

- A) Homeostasis
- B) Metabolism
- C) Adaptation
- D) Osmoregulation

Answer: Homeostasis

5. What is the SI unit of electrical resistance?

- A) Ohm
- B) Ampere
- C) Volt
- D) Farad

Answer: Ohm

6. What term describes a chemical reaction that absorbs heat from its surroundings?

- A) Endothermic reaction
- B) Exothermic reaction
- C) Catalytic reaction
- D) Redox reaction

Answer: Endothermic reaction

7. What is the name of the particle, confirmed in 2012, that is believed to give other particles mass?

- A) Higgs boson
- B) Graviton
- C) Tau neutrino
- D) Gluon

Answer: Higgs boson

8. What evolutionary process explains how bacteria populations develop resistance to antibiotics over time?

- A) Natural selection
- B) Genetic drift
- C) Gene flow
- D) Mutagenesis

Answer: Natural selection

9. What term describes a variant of an element with the same number of protons but a different number of neutrons?

- A) Isotope
- B) Isomer
- C) Ion
- D) Allotrope

Answer: Isotope

10. What is the name of the enzyme that unwinds the DNA double helix during replication?

- A) Helicase
- B) Polymerase
- C) Ligase
- D) Primase

Answer: Helicase

11. What term describes the minimum energy required to start a chemical reaction?

- A) Activation energy
- B) Potential energy
- C) Bond energy
- D) Free energy

Answer: Activation energy

12. What law states that energy cannot be created or destroyed, only converted from one form to another?

- A) First Law of Thermodynamics
- B) Second Law of Thermodynamics
- C) Newton's First Law
- D) Law of Conservation of Mass

Answer: First Law of Thermodynamics

13. What is the name of the plant cell structure that contains chlorophyll and carries out photosynthesis?

- A) Chloroplast
- B) Mitochondria
- C) Nucleus
- D) Vacuole

Answer: Chloroplast

14. What is the process called by which a cell engulfs large particles or other cells?

- A) Phagocytosis
- B) Pinocytosis
- C) Exocytosis
- D) Osmosis

Answer: Phagocytosis

15. What term describes materials that lose all electrical resistance below a critical temperature?

- A) Superconductors
- B) Semiconductors
- C) Insulators
- D) Conductors

Answer: Superconductors

16. Which of the four fundamental forces of nature governs radioactive beta decay?

- A) Weak nuclear force
- B) Strong nuclear force
- C) Electromagnetic force
- D) Gravity

Answer: Weak nuclear force

17. What term describes a catalytic molecule made of RNA rather than protein?

- A) Ribozyme
- B) Enzyme
- C) Hormone
- D) Antibody

Answer: Ribozyme

18. What is the chemical formula for table salt?

- A) NaCl
- B) KCl
- C) CaCl₂
- D) NaOH

Answer: NaCl

19. What is the process by which the human body maintains a constant internal temperature called?

- A) Thermoregulation
- B) Homeostasis
- C) Metabolism
- D) Circulation

Answer: Thermoregulation

20. What is the name of the green pigment in plants that captures sunlight for photosynthesis?

- A) Chlorophyll
- B) Carotene
- C) Melanin
- D) Xanthophyll

Answer: Chlorophyll

21. What is the term for the permanent disappearance of a species from Earth?

- A) Extinction
- B) Adaptation
- C) Migration
- D) Hibernation

Answer: Extinction

22. What do we call the variety of life found in a particular habitat or on Earth as a whole?

- A) Biodiversity
- B) Ecology
- C) Biosphere
- D) Symbiosis

Answer: Biodiversity

23. What is the name of the process by which rocks are broken down into smaller pieces by wind, water, or ice?

- A) Weathering
- B) Erosion
- C) Sedimentation
- D) Compaction

Answer: Weathering

24. What is the term for the transfer of heat through direct contact between materials?

- A) Conduction
- B) Convection
- C) Radiation
- D) Insulation

Answer: Conduction

25. What is the term for the transfer of heat through the movement of fluids like air or water?

- A) Convection
- B) Conduction
- C) Radiation
- D) Diffusion

Answer: Convection

26. What is the term for the transfer of heat through electromagnetic waves, without needing a medium?

- A) Radiation
- B) Conduction
- C) Convection
- D) Reflection

Answer: Radiation

27. What do we call a chemical reaction that releases heat into its surroundings?

- A) Exothermic reaction
- B) Endothermic reaction
- C) Catalytic reaction
- D) Redox reaction

Answer: Exothermic reaction

28. What is the term for the smallest functional unit of the nervous system, responsible for transmitting signals?

- A) Neuron
- B) Synapse
- C) Axon
- D) Nerve

Answer: Neuron

29. What is the name of the fluid connective tissue that transports oxygen and nutrients throughout the human body?

- A) Blood
- B) Lymph
- C) Plasma
- D) Mucus

Answer: Blood

30. What is the term for the genetic material that carries hereditary information in living organisms?

- A) DNA
- B) RNA
- C) Protein
- D) Enzyme

Answer: DNA

31. What is the name of the process by which DNA makes a copy of itself before cell division?

- A) DNA replication
- B) Transcription
- C) Translation
- D) Mutation

Answer: DNA replication

32. What do we call the scientific study of heredity and variation in living organisms?

- A) Genetics
- B) Biochemistry
- C) Physiology
- D) Microbiology

Answer: Genetics

33. What is the term for an organism's complete set of genetic material?

- A) Genome
- B) Chromosome
- C) Genotype
- D) Phenotype

Answer: Genome

34. What is the term for the total amount of matter contained in an object?

- A) Mass
- B) Weight
- C) Volume
- D) Density

Answer: Mass

35. What is the term for the force of gravity acting on an object's mass?

- A) Weight
- B) Mass
- C) Density
- D) Pressure

Answer: Weight

36. What do we call the study of chemical processes occurring within living organisms?

- A) Biochemistry
- B) Organic chemistry
- C) Physical chemistry
- D) Geochemistry

Answer: Biochemistry

37. What is the term for a substance used to detect the presence of another substance in a chemical reaction, often via a color change?

- A) Indicator
- B) Catalyst

- C) Reagent
- D) Solvent

Answer: Indicator

Medium • Segment 3 (Q7–Q9)

1. Which equation describes how the quantum state of a physical system evolves over time?

- A) Schrodinger equation
- B) Heisenberg's uncertainty principle
- C) Dirac equation
- D) Planck's law

Answer: Schrodinger equation

2. What quantum mechanical phenomenon causes two particles to remain correlated regardless of the distance separating them?

- A) Quantum entanglement
- B) Quantum tunneling
- C) Wave-particle duality
- D) Superposition

Answer: Quantum entanglement

3. What is the name of the enzyme complex that synthesizes ATP in mitochondria using a proton gradient?

- A) ATP synthase
- B) Cytochrome c oxidase
- C) Succinate dehydrogenase
- D) NADH dehydrogenase

Answer: ATP synthase

4. The Krebs cycle, a key stage of cellular respiration, is also known by what other name?

- A) Citric acid cycle
- B) Calvin cycle
- C) Urea cycle
- D) Glycolysis cycle

Answer: Citric acid cycle

5. What term describes the theoretical temperature at which a substance has the minimum possible thermal energy?

- A) Absolute zero
- B) Triple point
- C) Critical point
- D) Curie point

Answer: Absolute zero

6. What is the term for the phenomenon in which a virus inserts its genetic material into a host's genome and remains dormant?

- A) Lysogeny
- B) Lysis
- C) Transduction
- D) Conjugation

Answer: Lysogeny

7. Which principle states that it is impossible to simultaneously know both the exact position and momentum of a particle?

- A) Heisenberg's uncertainty principle
- B) Pauli exclusion principle
- C) Schrodinger's principle
- D) Bohr's complementarity principle

Answer: Heisenberg's uncertainty principle

8. What is the process called in which certain atomic nuclei split into smaller nuclei, releasing energy?

- A) Nuclear fission
- B) Nuclear fusion
- C) Radioactive decay
- D) Beta decay

Answer: Nuclear fission

9. What term describes a chromosomal mutation in which a segment is reversed end to end?

- A) Inversion
- B) Translocation
- C) Deletion
- D) Duplication

Answer: Inversion

10. Which rule states that no two electrons in an atom can share the same set of four quantum numbers?

- A) Pauli exclusion principle
- B) Hund's rule
- C) Aufbau principle
- D) Heisenberg's principle

Answer: Pauli exclusion principle

11. What is the name of the metabolic pathway that breaks down glucose into pyruvate in the cytoplasm?

- A) Glycolysis
- B) Gluconeogenesis
- C) Glycogenolysis
- D) Lipolysis

Answer: Glycolysis

12. What term describes the smallest repeating unit of a crystal lattice that shows the full symmetry of the crystal structure?

- A) Unit cell
- B) Lattice point
- C) Crystal system
- D) Bravais lattice

Answer: Unit cell

13. What is the name of the effect, discovered by Kamerlingh Onnes in 1911, in which certain materials lose all electrical resistance below a critical temperature?

- A) Superconductivity
- B) Superfluidity
- C) Ferromagnetism
- D) Piezoelectricity

Answer: Superconductivity

14. What term describes the process by which a fertilized egg cell divides and differentiates into a complete organism?

- A) Embryogenesis
- B) Gametogenesis
- C) Organogenesis
- D) Morphogenesis

Answer: Embryogenesis

15. What term describes a gene's expression being influenced by which parent it was inherited from, due to epigenetic marks?

- A) Genomic imprinting
- B) Gene silencing
- C) Alternative splicing
- D) X-inactivation

Answer: Genomic imprinting

16. What quantum mechanical phenomenon allows a particle to pass through an energy barrier it classically should not be able to cross?

- A) Quantum tunneling
- B) Quantum entanglement
- C) Wave function collapse
- D) Zero-point energy

Answer: Quantum tunneling

17. What term describes the specialized protective protein-DNA structures found at the ends of chromosomes?

- A) Telomeres
- B) Centromeres
- C) Histones
- D) Nucleosomes

Answer: Telomeres

18. What is the term for an organism capable of surviving in extreme environmental conditions, such as extreme heat, cold, or pressure?

- A) Extremophile
- B) Autotroph
- C) Decomposer
- D) Parasite

Answer: Extremophile

19. What is the name of the scientific theory explaining how Earth's continents have moved over geological time due to plate movement?

- A) Plate tectonics
- B) Continental uplift theory
- C) Seismic drift theory
- D) Crustal dynamics

Answer: Plate tectonics

20. What is the term for the boundary where two tectonic plates meet and interact?

- A) Plate boundary
- B) Fault core
- C) Crust seam
- D) Tectonic ridge

Answer: Plate boundary

21. What is the name of the process by which magma rises and solidifies to form new oceanic crust at mid-ocean ridges?

- A) Seafloor spreading
- B) Subduction
- C) Continental drift
- D) Isostasy

Answer: Seafloor spreading

22. What instrument is used to measure and record the intensity of earthquakes?

- A) Seismograph
- B) Barometer
- C) Anemometer
- D) Hydrometer

Answer: Seismograph

23. What is the name of the scale used to measure the magnitude of earthquakes?

- A) Richter scale
- B) Beaufort scale
- C) Kelvin scale
- D) Mercalli index

Answer: Richter scale

24. What is the term for the scientific study of fossils and ancient life forms?

- A) Paleontology
- B) Archaeology
- C) Geology
- D) Anthropology

Answer: Paleontology

25. What is the name of the geological era during which dinosaurs lived, spanning roughly 180 million years?

- A) Mesozoic Era
- B) Paleozoic Era
- C) Cenozoic Era
- D) Precambrian Era

Answer: Mesozoic Era

26. What is the term for a group of organisms of the same species living in the same area and able to interbreed?

- A) Population
- B) Community
- C) Ecosystem
- D) Species

Answer: Population

27. What is the term for the evolutionary process by which new species arise?

- A) Speciation
- B) Adaptation
- C) Mutation
- D) Natural selection

Answer: Speciation

28. Which naturalist developed the theory of evolution by natural selection?

- A) Charles Darwin
- B) Gregor Mendel
- C) Alfred Wallace
- D) Jean-Baptiste Lamarck

Answer: Charles Darwin

29. What is the title of Charles Darwin's landmark 1859 book outlining his theory of evolution?

- A) On the Origin of Species
- B) The Descent of Man
- C) The Voyage of the Beagle
- D) The Expression of Emotions

Answer: On the Origin of Species

30. What term describes structures in different species that share a common evolutionary origin despite serving different functions?

- A) Homologous structures
- B) Analogous structures
- C) Vestigial structures
- D) Convergent structures

Answer: Homologous structures

31. What is the term for a relationship between two species in which both organisms benefit?

- A) Mutualism
- B) Parasitism
- C) Commensalism
- D) Predation

Answer: Mutualism

32. What is the term for a relationship between two species in which one benefits and the other is harmed?

- A) Parasitism
- B) Mutualism
- C) Commensalism
- D) Symbiosis

Answer: Parasitism

33. What is the term for a relationship in which one species benefits while the other is neither helped nor harmed?

- A) Commensalism
- B) Mutualism
- C) Parasitism
- D) Competition

Answer: Commensalism

34. What is the term for the specific role and position an organism occupies within its ecosystem?

- A) Ecological niche
- B) Habitat
- C) Biome
- D) Trophic level

Answer: Ecological niche

35. What is the name of the model describing how energy and nutrients flow through an ecosystem via interconnected feeding relationships?

- A) Food web

- B) Food chain
- C) Energy pyramid
- D) Nutrient cycle

Answer: Food web

36. What is the term for the base level of a food chain, typically organisms like plants that generate their own energy?

- A) Producer
- B) Consumer
- C) Decomposer
- D) Predator

Answer: Producer

37. What is the term for organisms that break down dead organic matter, recycling nutrients back into the ecosystem?

- A) Decomposer
- B) Producer
- C) Herbivore
- D) Scavenger

Answer: Decomposer

Medium-Hard • Segment 4 (Q10–Q12)

1. What is the name of the equation relating pressure, volume, and temperature of an ideal gas?

- A) Ideal gas law
- B) Boyle's Law
- C) Charles's Law
- D) Gay-Lussac's Law

Answer: Ideal gas law

2. What is the SI unit of electrical inductance?

- A) Henry
- B) Farad
- C) Tesla
- D) Weber

Answer: Henry

3. What is the name of the effect where certain materials generate a voltage when subjected to mechanical stress?

- A) Piezoelectric effect
- B) Photoelectric effect
- C) Hall effect
- D) Thermoelectric effect

Answer: Piezoelectric effect

4. What law states that current through a conductor is proportional to voltage and inversely proportional to resistance?

- A) Ohm's Law
- B) Kirchhoff's Law
- C) Faraday's Law
- D) Coulomb's Law

Answer: Ohm's Law

5. What is the term for the amount of electric charge a capacitor can store per unit of voltage?

- A) Capacitance
- B) Inductance
- C) Resistance
- D) Conductance

Answer: Capacitance

6. What is the name of the process by which an unstable atomic nucleus emits particles or energy?

- A) Radioactive decay
- B) Nuclear fusion
- C) Ionization
- D) Electrolysis

Answer: Radioactive decay

7. What is the SI unit of magnetic flux?

- A) Weber
- B) Tesla
- C) Henry
- D) Gauss

Answer: Weber

8. What principle states that the total energy of an isolated system remains constant over time?

- A) Conservation of energy
- B) Conservation of momentum
- C) Conservation of mass
- D) Conservation of charge

Answer: Conservation of energy

9. What is the term for a semiconductor deliberately treated with impurities to alter its electrical properties?

- A) Doped semiconductor
- B) Intrinsic semiconductor
- C) Insulated semiconductor
- D) Superconductor

Answer: Doped semiconductor

10. Which of Kirchhoff's laws states that the sum of currents entering a junction equals the sum leaving it?

- A) Kirchhoff's Current Law
- B) Kirchhoff's Voltage Law
- C) Kirchhoff's Radiation Law
- D) Kirchhoff's Third Law

Answer: Kirchhoff's Current Law

11. What is the term for the process by which a changing magnetic field induces a current in a nearby conductor?

- A) Electromagnetic induction
- B) Electrostatic discharge
- C) Magnetic saturation
- D) Eddy current formation

Answer: Electromagnetic induction

12. What is the term for the frequency at which a system oscillates with maximum amplitude when driven externally?

- A) Resonant frequency
- B) Cutoff frequency
- C) Fundamental frequency
- D) Sampling frequency

Answer: Resonant frequency

13. What is the name of the transistor configuration in which the emitter terminal is shared between the input and output circuits?

- A) Common-emitter configuration
- B) Common-base configuration
- C) Common-collector configuration
- D) Common-source configuration

Answer: Common-emitter configuration

14. What is the SI unit of luminous intensity?

- A) Candela
- B) Lumen
- C) Lux
- D) Watt

Answer: Candela

15. What is the term for the process of converting alternating current (AC) into direct current (DC)?

- A) Rectification
- B) Inversion
- C) Amplification
- D) Modulation

Answer: Rectification

16. What equation describes how the rate of a chemical reaction increases with temperature?

- A) Arrhenius equation
- B) Nernst equation
- C) Van't Hoff equation
- D) Clausius-Clapeyron equation

Answer: Arrhenius equation

17. What is the term for the minimum voltage needed for a silicon diode to conduct significantly, typically around 0.7V?

- A) Forward voltage
- B) Breakdown voltage
- C) Reverse voltage
- D) Peak inverse voltage

Answer: Forward voltage

Hard • Segment 5 (Q13–Q15)

1. What theorem states that any linear electrical circuit can be simplified to a single voltage source in series with a resistance?

- A) Thevenin's theorem
- B) Norton's theorem
- C) Superposition theorem
- D) Millman's theorem

Answer: Thevenin's theorem

2. What is the equivalent circuit theorem using a current source in parallel with a resistance, as an alternative to Thevenin's theorem?

- A) Norton's theorem
- B) Thevenin's theorem
- C) Superposition theorem
- D) Reciprocity theorem

Answer: Norton's theorem

3. What is the term for an operational amplifier's output flattening out because the input signal exceeds the supply voltage limits?

- A) Saturation
- B) Resonance
- C) Rectification
- D) Attenuation

Answer: Saturation

4. What theorem states that a signal must be sampled at least twice its highest frequency component to be accurately reconstructed?

- A) Nyquist-Shannon sampling theorem
- B) Fourier theorem
- C) Parseval's theorem
- D) Central limit theorem

Answer: Nyquist-Shannon sampling theorem

5. What is the term for the ratio of a bipolar transistor's collector current to its base current?

- A) Current gain
- B) Voltage gain
- C) Power gain
- D) Transconductance

Answer: Current gain

6. What is the term for a system design where the output is measured and used to automatically adjust the input, forming a closed loop?

- A) Feedback control
- B) Open-loop control
- C) Batch processing
- D) Pipelining

Answer: Feedback control

7. What is the name of the phenomenon where two waves of close but different frequencies produce a periodic variation in amplitude?

- A) Beat frequency
- B) Doppler shift
- C) Harmonic distortion
- D) Standing wave

Answer: Beat frequency

8. Which digital logic gate outputs true only when its two inputs differ from each other?

- A) XOR gate
- B) AND gate
- C) OR gate
- D) NAND gate

Answer: XOR gate

9. What theorem states that maximum power is delivered to a load when the load resistance equals the source's internal resistance?

- A) Maximum power transfer theorem
- B) Thevenin's theorem
- C) Superposition theorem
- D) Millman's theorem

Answer: Maximum power transfer theorem

10. What effect describes the apparent change in a wave's frequency due to relative motion between the source and an observer?

- A) Doppler effect
- B) Piezoelectric effect
- C) Hall effect
- D) Photoelectric effect

Answer: Doppler effect

11. What is the term for an amplifier circuit becoming uncontrollably oscillatory due to excessive positive feedback gain?

- A) Instability
- B) Resonance
- C) Attenuation
- D) Rectification

Answer: Instability

12. What mathematical transform converts a time-domain signal into its frequency-domain representation?

- A) Fourier transform
- B) Laplace transform
- C) Z-transform
- D) Hilbert transform

Answer: Fourier transform

13. What is the name of the charge-carrier-depleted region that forms at a P-N junction, creating a barrier to current flow?

- A) Depletion region
- B) Conduction band
- C) Valence band
- D) Space-charge lattice

Answer: Depletion region

14. Which law relates the induced electromotive force (EMF) in a circuit to the rate of change of magnetic flux through it?

- A) Faraday's Law of Induction
- B) Lenz's Law
- C) Ampere's Law
- D) Gauss's Law

Answer: Faraday's Law of Induction

15. What is the term for the tendency of alternating current to flow mostly near the surface of a conductor at high frequencies?

- A) Skin effect
- B) Proximity effect
- C) Eddy current effect
- D) Corona effect

Answer: Skin effect

16. What is the term for the process of converting a continuous analog signal into discrete digital values?

- A) Analog-to-digital conversion
- B) Digital-to-analog conversion
- C) Pulse-width modulation
- D) Signal multiplexing

Answer: Analog-to-digital conversion

17. What criterion is used to determine a control system's stability without directly solving for the roots of its characteristic equation?

- A) Routh-Hurwitz criterion
- B) Nyquist criterion
- C) Bode criterion
- D) Laplace criterion

Answer: Routh-Hurwitz criterion

Inventions & Discoveries

Easy • Segment 1 (Q1–Q3)

1. Who is credited with inventing the telephone?

- A) Alexander Graham Bell
- B) Thomas Edison
- C) Nikola Tesla
- D) Guglielmo Marconi

Answer: Alexander Graham Bell

2. Who is commonly credited with inventing the practical incandescent light bulb?

- A) Thomas Edison
- B) Nikola Tesla
- C) Alexander Graham Bell
- D) James Watt

Answer: Thomas Edison

3. Who is credited with inventing the World Wide Web?

- A) Tim Berners-Lee
- B) Bill Gates
- C) Steve Jobs
- D) Vint Cerf

Answer: Tim Berners-Lee

4. What did the Wright brothers famously invent?

- A) The first successful powered airplane
- B) The automobile
- C) The helicopter
- D) The submarine

Answer: The first successful powered airplane

5. Whose falling-apple story is associated with the discovery of gravity?

- A) Isaac Newton
- B) Albert Einstein
- C) Galileo Galilei
- D) Johannes Kepler

Answer: Isaac Newton

6. Who invented the printing press with movable type in Europe?

- A) Johannes Gutenberg
- B) Leonardo da Vinci
- C) William Caxton
- D) Benjamin Franklin

Answer: Johannes Gutenberg

7. What did Alexander Fleming accidentally discover in 1928?

- A) Penicillin
- B) Insulin
- C) Vaccination
- D) X-rays

Answer: Penicillin

8. Who invented dynamite?

- A) Alfred Nobel
- B) Thomas Edison
- C) Robert Oppenheimer
- D) John Hyatt

Answer: Alfred Nobel

9. Marie Curie is best known for her pioneering research into which phenomenon?

- A) Radioactivity
- B) Gravity
- C) Electricity
- D) Magnetism

Answer: Radioactivity

10. Who is widely credited with demonstrating the first working mechanical television system?

- A) John Logie Baird
- B) Philo Farnsworth
- C) Guglielmo Marconi
- D) Thomas Edison

Answer: John Logie Baird

11. Who significantly improved the steam engine, making it practical for widespread industrial use?

- A) James Watt
- B) George Stephenson
- C) Richard Trevithick
- D) Thomas Newcomen

Answer: James Watt

12. What process did Louis Pasteur develop to make milk and other drinks safer to consume?

- A) Pasteurization
- B) Sterilization
- C) Fermentation
- D) Refrigeration

Answer: Pasteurization

13. Who developed the first successful vaccine, against smallpox?

- A) Edward Jenner
- B) Louis Pasteur
- C) Jonas Salk
- D) Alexander Fleming

Answer: Edward Jenner

14. Who is credited with inventing the first practical electric battery?

- A) Alessandro Volta
- B) Michael Faraday
- C) Benjamin Franklin
- D) Andre-Marie Ampere

Answer: Alessandro Volta

15. Who pioneered the moving automobile assembly line for mass production?

- A) Henry Ford
- B) Karl Benz
- C) Ransom Olds

D) Gottlieb Daimler

Answer: Henry Ford

16. In the traditional Western historical narrative, who is credited with reaching the Americas in 1492?

A) Christopher Columbus

B) Ferdinand Magellan

C) Vasco da Gama

D) Amerigo Vespucci

Answer: Christopher Columbus

17. Who is credited with inventing radio communication?

A) Guglielmo Marconi

B) Nikola Tesla

C) Alexander Graham Bell

D) Thomas Edison

Answer: Guglielmo Marconi

18. Who is credited with inventing the elevator safety brake, making tall buildings practical?

A) Elisha Otis

B) Thomas Edison

C) James Watt

D) Alexander Graham Bell

Answer: Elisha Otis

19. Who invented the cotton gin, a machine that revolutionized cotton processing?

A) Eli Whitney

B) Samuel Slater

C) Richard Arkwright

D) James Hargreaves

Answer: Eli Whitney

20. Who invented the telegraph and Morse code, revolutionizing long-distance communication?

A) Samuel Morse

B) Alexander Graham Bell

C) Guglielmo Marconi

D) Thomas Edison

Answer: Samuel Morse

21. Who invented the escalator, patented in 1892?

A) Jesse W. Reno

B) Elisha Otis

C) George Westinghouse

D) Charles Seeberger

Answer: Jesse W. Reno

22. Who invented the first practical fire extinguisher?

A) George William Manby

B) Alexander Graham Bell

C) Henry Bessemer

D) Isaac Singer

Answer: George William Manby

23. Who invented the first practical stethoscope?

- A) Rene Laennec
- B) Edward Jenner
- C) Louis Pasteur
- D) Robert Koch

Answer: Rene Laennec

24. Who is popularly credited with inventing and popularizing the modern flush toilet?

- A) Thomas Crapper
- B) James Watt
- C) John Harington
- D) Alexander Cummings

Answer: Thomas Crapper

25. Who attempted to invent an early metal detector to locate a bullet inside US President James Garfield?

- A) Alexander Graham Bell
- B) Thomas Edison
- C) Nikola Tesla
- D) Samuel Morse

Answer: Alexander Graham Bell

26. Who invented the Ferris wheel, first built for the 1893 World's Fair in Chicago?

- A) George Ferris
- B) Elisha Otis
- C) Gustave Eiffel
- D) Jesse Reno

Answer: George Ferris

27. Who invented the first successful automobile powered by an internal combustion engine?

- A) Karl Benz
- B) Henry Ford
- C) Gottlieb Daimler
- D) Rudolf Diesel

Answer: Karl Benz

28. Who invented the first practical outboard motor for boats?

- A) Ole Evinrude
- B) Karl Benz
- C) Rudolf Diesel
- D) Charles Parsons

Answer: Ole Evinrude

29. Who is credited with inventing the microwave oven, discovered accidentally while working with radar technology?

- A) Percy Spencer
- B) Nikola Tesla
- C) Thomas Edison
- D) James Dyson

Answer: Percy Spencer

30. Who is credited with inventing the first practical can opener?

- A) Ezra Warner
- B) Peter Durand

- C) John Landis Mason
- D) William Painter

Answer: Ezra Warner

31. Who invented the modern shopping cart?

- A) Sylvan Goldman
- B) Clarence Saunders
- C) Sam Walton
- D) King Camp Gillette

Answer: Sylvan Goldman

32. Who is credited with inventing the Slinky toy?

- A) Richard James
- B) Ruth Handler
- C) George Lerner
- D) Ole Kirk Christiansen

Answer: Richard James

33. Who invented the flying disc toy later commercialized as the Frisbee?

- A) Walter Frederick Morrison
- B) Richard Knerr
- C) Arthur Melin
- D) Fred Morrison Sr.

Answer: Walter Frederick Morrison

34. Who invented the Rubik's Cube puzzle?

- A) Erno Rubik
- B) Alex Fielding
- C) Uwe Meffert
- D) Tom Kremer

Answer: Erno Rubik

35. Who founded Polaroid and invented the first practical instant camera?

- A) Edwin Land
- B) George Eastman
- C) Steve Sasson
- D) Chester Carlson

Answer: Edwin Land

36. Who founded Atari and directed the creation of "Pong," one of the first successful video games?

- A) Nolan Bushnell
- B) Allan Alcorn
- C) Ralph Baer
- D) Steve Russell

Answer: Nolan Bushnell

37. Who programmed "Pong," one of the first successful video games, at Atari?

- A) Allan Alcorn
- B) Nolan Bushnell
- C) Ralph Baer
- D) Steve Russell

Answer: Allan Alcorn

1. Who invented the first commercially successful typewriter with the QWERTY layout?

- A) Christopher Latham Sholes
- B) Thomas Edison
- C) Isaac Singer
- D) Elias Howe

Answer: Christopher Latham Sholes

2. Who developed the theory of relativity?

- A) Albert Einstein
- B) Isaac Newton
- C) Niels Bohr
- D) Max Planck

Answer: Albert Einstein

3. Who developed the first successful polio vaccine, using an inactivated virus?

- A) Jonas Salk
- B) Albert Sabin
- C) Edward Jenner
- D) Louis Pasteur

Answer: Jonas Salk

4. Which element, alongside polonium, did Marie and Pierre Curie discover?

- A) Radium
- B) Uranium
- C) Plutonium
- D) Thorium

Answer: Radium

5. Who is regarded as the first computer programmer for her work on Charles Babbage's Analytical Engine?

- A) Ada Lovelace
- B) Grace Hopper
- C) Marie Curie
- D) Rosalind Franklin

Answer: Ada Lovelace

6. Who is credited with major improvements to the microscope that enabled the first observations of microorganisms?

- A) Antonie van Leeuwenhoek
- B) Robert Hooke
- C) Galileo Galilei
- D) Louis Pasteur

Answer: Antonie van Leeuwenhoek

7. Who built the first successful mass-produced helicopter?

- A) Igor Sikorsky
- B) The Wright Brothers
- C) Juan de la Cierva
- D) Paul Cornu

Answer: Igor Sikorsky

8. Who invented the Braille reading and writing system for the blind?

- A) Louis Braille
- B) Alexander Graham Bell
- C) Helen Keller
- D) Thomas Edison

Answer: Louis Braille

9. Along with Francis Crick, who is credited with discovering the double-helix structure of DNA?

- A) James Watson
- B) Rosalind Franklin
- C) Gregor Mendel
- D) Erwin Chargaff

Answer: James Watson

10. Who developed the first practical diesel engine?

- A) Rudolf Diesel
- B) Karl Benz
- C) Gottlieb Daimler
- D) Nikolaus Otto

Answer: Rudolf Diesel

11. Wilhelm Rontgen won the first-ever Nobel Prize in Physics for discovering what?

- A) X-rays
- B) Radioactivity
- C) Electrons
- D) Gamma rays

Answer: X-rays

12. Who invented the modern ballpoint pen?

- A) Laszlo Biro
- B) John Loud
- C) Lewis Waterman
- D) George Parker

Answer: Laszlo Biro

13. Who is credited with patenting the first practical lockstitch sewing machine in the US?

- A) Elias Howe
- B) Isaac Singer
- C) Walter Hunt
- D) Barthelemy Thimonnier

Answer: Elias Howe

14. What does "WWW", the system invented by Tim Berners-Lee, stand for?

- A) World Wide Web
- B) World Wide Wire
- C) Wide World Web
- D) World Web Wide

Answer: World Wide Web

15. Who is known as the father of modern genetics for his experiments on pea plants?

- A) Gregor Mendel
- B) Charles Darwin
- C) James Watson

D) Louis Pasteur

Answer: Gregor Mendel

16. Who developed the first successful liquid-fueled rocket, launched in 1926?

A) Robert Goddard

B) Wernher von Braun

C) Konstantin Tsiolkovsky

D) Sergei Korolev

Answer: Robert Goddard

17. Who is credited, along with Carl Wilhelm Scheele, with independently discovering oxygen in the 1770s?

A) Joseph Priestley

B) Antoine Lavoisier

C) Henry Cavendish

D) John Dalton

Answer: Joseph Priestley

18. Who invented the first commercially successful photocopier, leading to the founding of Xerox?

A) Chester Carlson

B) Edwin Land

C) George Eastman

D) Percy Spencer

Answer: Chester Carlson

19. Who invented the long-playing (LP) vinyl record format?

A) Peter Goldmark

B) Thomas Edison

C) Emile Berliner

D) Eldridge Johnson

Answer: Peter Goldmark

20. Who is a key figure credited with developing practical liquid crystal display (LCD) technology?

A) James Fergason

B) Jack Kilby

C) Robert Noyce

D) Gordon Moore

Answer: James Fergason

21. Who invented practical fiber optic cable for telecommunications, earning a Nobel Prize in 2009?

A) Charles K. Kao

B) Jack Kilby

C) Robert Noyce

D) Claude Shannon

Answer: Charles K. Kao

22. Who invented the integrated circuit (microchip), working independently of Robert Noyce?

A) Jack Kilby

B) Gordon Moore

C) Andrew Grove

D) William Shockley

Answer: Jack Kilby

23. Along with Jack Kilby, who else is credited with independently inventing the integrated circuit?

- A) Robert Noyce
 - B) Gordon Moore
 - C) Andrew Grove
 - D) William Shockley
- Answer: Robert Noyce**

24. Who invented the barcode, along with Bernard Silver?

- A) Norman Joseph Woodland
- B) Jack Kilby
- C) Chester Carlson
- D) David Collins

Answer: Norman Joseph Woodland

25. Who co-invented the barcode alongside Norman Joseph Woodland?

- A) Bernard Silver
- B) David Collins
- C) Alan Haberman
- D) George Laurer

Answer: Bernard Silver

26. Who invented the first working photovoltaic cell using selenium, a precursor to modern solar cells?

- A) Charles Fritts
- B) Willoughby Smith
- C) Russell Ohl
- D) Daryl Chapin

Answer: Charles Fritts

27. Who is credited with inventing the first practical automated teller machine (ATM)?

- A) John Shepherd-Barron
- B) Luther Simjian
- C) Don Wetzel
- D) James Goodfellow

Answer: John Shepherd-Barron

28. Who led the development of the Saturn V rocket used in the Apollo Moon missions?

- A) Wernher von Braun
- B) Robert Goddard
- C) Sergei Korolev
- D) Hermann Oberth

Answer: Wernher von Braun

29. Who achieved the first controlled nuclear chain reaction, in 1942?

- A) Enrico Fermi
- B) Robert Oppenheimer
- C) Albert Einstein
- D) Niels Bohr

Answer: Enrico Fermi

30. Who discovered nuclear fission, splitting uranium atoms, in 1938, along with Fritz Strassmann?

- A) Otto Hahn
- B) Enrico Fermi
- C) Lise Meitner
- D) Niels Bohr

Answer: Otto Hahn

31. Which physicist provided the theoretical explanation for nuclear fission, though excluded from the Nobel Prize awarded to her collaborator?

- A) Lise Meitner
- B) Marie Curie
- C) Rosalind Franklin
- D) Irene Joliot-Curie

Answer: Lise Meitner

32. Who is credited with developing the first fully implantable cardiac pacemaker?

- A) Wilson Greatbatch
- B) Christiaan Barnard
- C) Michael DeBakey
- D) Denton Cooley

Answer: Wilson Greatbatch

33. Who invented in-vitro fertilization (IVF), leading to the first "test-tube baby" in 1978?

- A) Robert Edwards
- B) Patrick Steptoe
- C) Alan Trounson
- D) Howard Jones

Answer: Robert Edwards

34. Along with Robert Edwards, which gynecologist co-developed IVF?

- A) Patrick Steptoe
- B) Alan Trounson
- C) Howard Jones
- D) Landrum Shettles

Answer: Patrick Steptoe

35. Who established the precise base-pairing ratios of DNA's four bases, key evidence later used in determining DNA's structure?

- A) Erwin Chargaff
- B) James Watson
- C) Francis Crick
- D) Maurice Wilkins

Answer: Erwin Chargaff

36. Who invented the polymerase chain reaction (PCR) technique, revolutionizing DNA analysis?

- A) Kary Mullis
- B) Frederick Sanger
- C) Craig Venter
- D) James Watson

Answer: Kary Mullis

37. Which scientist's lab first demonstrated CRISPR gene editing working in human and other eukaryotic cells?

- A) Feng Zhang
- B) Jennifer Doudna
- C) Emmanuelle Charpentier
- D) George Church

Answer: Feng Zhang

1. Which British inventor developed an incandescent lamp design around the same time as Edison?

- A) Joseph Swan
- B) Michael Faraday
- C) James Watt
- D) William Thomson

Answer: Joseph Swan

2. At which research laboratory was the transistor invented in 1947?

- A) Bell Labs
- B) IBM
- C) Xerox PARC
- D) MIT

Answer: Bell Labs

3. Who developed the daguerreotype, an early practical photographic process?

- A) Louis Daguerre
- B) George Eastman
- C) Joseph Niepce
- D) William Talbot

Answer: Louis Daguerre

4. Who discovered the electron, in 1897?

- A) J.J. Thomson
- B) Ernest Rutherford
- C) Niels Bohr
- D) James Chadwick

Answer: J.J. Thomson

5. Who is credited with inventing the first mechanical calculator, the Pascaline?

- A) Blaise Pascal
- B) Gottfried Leibniz
- C) Charles Babbage
- D) Rene Descartes

Answer: Blaise Pascal

6. Who mathematically predicted the existence and position of Neptune before it was directly observed?

- A) Urbain Le Verrier
- B) William Herschel
- C) Giovanni Cassini
- D) Johannes Kepler

Answer: Urbain Le Verrier

7. Who built the first working laser, in 1960?

- A) Theodore Maiman
- B) Albert Einstein
- C) Charles Townes
- D) Gordon Gould

Answer: Theodore Maiman

8. Who created the Mosaic web browser that helped bring the internet to the public?

- A) Marc Andreessen

- B) Tim Berners-Lee
- C) Larry Page
- D) Jeff Bezos

Answer: Marc Andreessen

9. Whose X-ray diffraction images ("Photo 51") were crucial evidence for discovering DNA's structure?

- A) Rosalind Franklin
- B) Barbara McClintock
- C) Dorothy Hodgkin
- D) Lise Meitner

Answer: Rosalind Franklin

10. Who invented the first practical powered vacuum cleaner, in 1901?

- A) Hubert Cecil Booth
- B) James Dyson
- C) William Hoover
- D) Ives McGaffey

Answer: Hubert Cecil Booth

11. Who discovered the process for vulcanizing rubber, making it far more durable?

- A) Charles Goodyear
- B) John Dunlop
- C) Harvey Firestone
- D) John Boyd Dunlop

Answer: Charles Goodyear

12. Who is credited, in English-language accounts, with inventing the first jet engine?

- A) Frank Whittle
- B) Hans von Ohain
- C) Wernher von Braun
- D) Igor Sikorsky

Answer: Frank Whittle

13. Who invented the modern safety pin, in 1849?

- A) Walter Hunt
- B) Whitcomb Judson
- C) Josephine Cochrane
- D) Elias Howe

Answer: Walter Hunt

14. Who invented the first practical modern air conditioner, in 1902?

- A) Willis Carrier
- B) Frederick Jones
- C) Stuart Cramer
- D) Alfred Wolff

Answer: Willis Carrier

15. Who patented the modern zipper design, in the early 1910s?

- A) Gideon Sundback
- B) Whitcomb Judson
- C) Elias Howe
- D) Levi Strauss

Answer: Gideon Sundback

16. Who proposed the theoretical existence of the Higgs boson particle, in 1964?

- A) Peter Higgs
- B) Stephen Hawking
- C) Paul Dirac
- D) Enrico Fermi

Answer: Peter Higgs

17. Who discovered the law of definite proportions, a foundational principle of modern chemistry?

- A) Joseph Proust
- B) John Dalton
- C) Antoine Lavoisier
- D) Amedeo Avogadro

Answer: Joseph Proust

18. Who invented the first jet-powered aircraft engine tested in flight, the Heinkel He 178, in 1939?

- A) Hans von Ohain
- B) Frank Whittle
- C) Wernher von Braun
- D) Ernst Heinkel

Answer: Hans von Ohain

19. Who is credited as the "father of virology" for his foundational early work identifying viruses as a distinct class of infectious agents?

- A) Martinus Beijerinck
- B) Robert Koch
- C) Louis Pasteur
- D) Dmitri Ivanovsky

Answer: Martinus Beijerinck

20. Who discovered the bacterium that causes tuberculosis, a major breakthrough in germ theory, in 1882?

- A) Robert Koch
- B) Louis Pasteur
- C) Alexander Fleming
- D) Paul Ehrlich

Answer: Robert Koch

21. Who discovered human blood groups (A, B, AB, O), essential for safe blood transfusions?

- A) Karl Landsteiner
- B) William Harvey
- C) Alexis Carrel
- D) Charles Drew

Answer: Karl Landsteiner

22. Who, along with Alexander Wiener, discovered the Rh factor in human blood?

- A) Karl Landsteiner
- B) William Harvey
- C) Charles Drew
- D) Jean-Baptiste Denys

Answer: Karl Landsteiner

23. Who coined the term "vitamin" after isolating a compound essential for preventing the disease beriberi?

- A) Casimir Funk
- B) Frederick Hopkins
- C) Christiaan Eijkman
- D) Albert Szent-Gyorgyi

Answer: Casimir Funk

24. Who conducted one of the first controlled clinical trials in history, in 1747, demonstrating that citrus fruit prevents scurvy?

- A) James Lind
- B) Edward Jenner
- C) John Snow
- D) William Harvey

Answer: James Lind

25. Who discovered the mechanism of blood circulation in the human body, publishing his findings in 1628?

- A) William Harvey
- B) Andreas Vesalius
- C) Galen
- D) Marcello Malpighi

Answer: William Harvey

26. Who is credited, along with his father, with inventing the first compound microscope?

- A) Zacharias Janssen
- B) Antonie van Leeuwenhoek
- C) Robert Hooke
- D) Galileo Galilei

Answer: Zacharias Janssen

27. Who discovered and named the cell, after observing cork tissue under a microscope in 1665?

- A) Robert Hooke
- B) Antonie van Leeuwenhoek
- C) Rudolf Virchow
- D) Matthias Schleiden

Answer: Robert Hooke

28. Who formulated the principle that all living cells arise from pre-existing cells, a cornerstone of cell theory?

- A) Rudolf Virchow
- B) Robert Hooke
- C) Theodor Schwann
- D) Matthias Schleiden

Answer: Rudolf Virchow

29. Who discovered the law of conservation of mass in chemical reactions, a foundational principle of modern chemistry?

- A) Antoine Lavoisier
- B) John Dalton
- C) Joseph Priestley
- D) Robert Boyle

Answer: Antoine Lavoisier

30. Who formulated modern atomic theory, proposing that elements consist of tiny, indivisible particles?

- A) John Dalton

- B) Antoine Lavoisier
- C) Amedeo Avogadro
- D) Dmitri Mendeleev

Answer: John Dalton

31. Who discovered the noble gases, including argon, neon, krypton, and xenon?

- A) William Ramsay
- B) Humphry Davy
- C) Henry Cavendish
- D) Joseph Priestley

Answer: William Ramsay

32. Who first correctly identified the element helium from its unique spectral signature in sunlight during a solar eclipse in 1868?

- A) Norman Lockyer
- B) William Ramsay
- C) Pierre Janssen
- D) Henry Cavendish

Answer: Norman Lockyer

33. Who discovered superconductivity, observed in mercury at extremely low temperatures, in 1911?

- A) Heike Kamerlingh Onnes
- B) James Dewar
- C) Wolfgang Pauli
- D) Max Planck

Answer: Heike Kamerlingh Onnes

34. Which father-and-son duo shared the Nobel Prize in Physics for pioneering X-ray crystallography, a technique later used to help reveal DNA's structure?

- A) William Henry Bragg and William Lawrence Bragg
- B) Niels Bohr and Aage Bohr
- C) J.J. Thomson and George Paget Thomson
- D) Marie Curie and Irene Joliot-Curie

Answer: William Henry Bragg and William Lawrence Bragg

35. Who discovered cosmic rays, high-energy particles from space, through high-altitude balloon experiments in 1912?

- A) Victor Hess
- B) Robert Millikan
- C) Carl Anderson
- D) Arthur Compton

Answer: Victor Hess

36. Who discovered the positron, the first known antimatter particle, in 1932?

- A) Carl Anderson
- B) Paul Dirac
- C) Victor Hess
- D) Ernest Lawrence

Answer: Carl Anderson

37. Who is commonly credited as a key chemist behind the first oral contraceptive pill, approved for use in 1960?

- A) Carl Djerassi
- B) Gregory Pincus

- C) John Rock
- D) Margaret Sanger

Answer: Carl Djerassi

Medium-Hard • Segment 4 (Q10–Q12)

1. Who invented the first programmable computer, the Z3, completed in 1941?

- A) Konrad Zuse
- B) Alan Turing
- C) John von Neumann
- D) Charles Babbage

Answer: Konrad Zuse

2. Who patented barbed wire in 1874, revolutionizing fencing in the American West?

- A) Joseph Glidden
- B) Lucien Smith
- C) Jacob Haish
- D) John Warne Gates

Answer: Joseph Glidden

3. Who invented Kevlar, the material used in bulletproof vests?

- A) Stephanie Kwolek
- B) Marie Curie
- C) Rosalind Franklin
- D) Rachel Carson

Answer: Stephanie Kwolek

4. At which laboratory was the first practical silicon solar cell developed, in 1954?

- A) Bell Labs
- B) IBM
- C) General Electric
- D) Westinghouse

Answer: Bell Labs

5. Who developed the oral polio vaccine using a weakened live virus, as an alternative to Salk's?

- A) Albert Sabin
- B) Jonas Salk
- C) Edward Jenner
- D) Maurice Hilleman

Answer: Albert Sabin

6. Who successfully deciphered Egyptian hieroglyphs using the Rosetta Stone?

- A) Jean-Francois Champollion
- B) Howard Carter
- C) Flinders Petrie
- D) Thomas Young

Answer: Jean-Francois Champollion

7. Who invented the first practical mercury barometer?

- A) Evangelista Torricelli
- B) Blaise Pascal
- C) Robert Boyle
- D) Galileo Galilei

Answer: Evangelista Torricelli

8. After whom is the Bunsen burner named, though he mainly improved rather than invented it?

- A) Robert Bunsen
- B) Michael Faraday
- C) Justus von Liebig
- D) Friedrich Wohler

Answer: Robert Bunsen

9. Which ancient Greek scientist discovered the principle of buoyancy, reportedly shouting "Eureka"?

- A) Archimedes
- B) Pythagoras
- C) Euclid
- D) Aristotle

Answer: Archimedes

10. Who reinvented and popularized the pneumatic (air-filled) tire still widely used today?

- A) John Boyd Dunlop
- B) Charles Goodyear
- C) Robert William Thomson
- D) Harvey Firestone

Answer: John Boyd Dunlop

11. Who designed the first artificial heart successfully implanted in a human, the Jarvik-7?

- A) Robert Jarvik
- B) Christiaan Barnard
- C) Michael DeBakey
- D) Denton Cooley

Answer: Robert Jarvik

12. Who invented the Geiger counter, used to detect ionizing radiation?

- A) Hans Geiger
- B) Ernest Rutherford
- C) Marie Curie
- D) Wilhelm Rontgen

Answer: Hans Geiger

13. Who built and used the first submarine in combat, the Turtle, during the American Revolutionary War?

- A) David Bushnell
- B) Robert Fulton
- C) John Holland
- D) Simon Lake

Answer: David Bushnell

14. Which chemist reportedly discovered the ring structure of benzene after a dream about a snake biting its own tail?

- A) August Kekule
- B) Dmitri Mendeleev
- C) Justus von Liebig
- D) Linus Pauling

Answer: August Kekule

15. Who invented Bakelite, considered the first fully synthetic plastic?

- A) Leo Baekeland
- B) Charles Goodyear
- C) Wallace Carothers
- D) John Wesley Hyatt

Answer: Leo Baekeland

16. Who discovered the neutron, in 1932?

- A) James Chadwick
- B) Ernest Rutherford
- C) Niels Bohr
- D) Enrico Fermi

Answer: James Chadwick

17. Who patented the first practical gyrocompass in the United States, used for maritime navigation?

- A) Elmer Sperry
- B) Hermann Anschutz-Kaempfe
- C) John Harrison
- D) Charles Draper

Answer: Elmer Sperry

Hard • Segment 5 (Q13–Q15)

1. Who invented the Van de Graaff generator, used to build up very high voltages?

- A) Robert J. Van de Graaff
- B) Nikola Tesla
- C) Heinrich Hertz
- D) Michael Faraday

Answer: Robert J. Van de Graaff

2. Who discovered the radioactive element radon, in 1900?

- A) Friedrich Ernst Dorn
- B) Marie Curie
- C) Ernest Rutherford
- D) William Ramsay

Answer: Friedrich Ernst Dorn

3. Along with Ted Hoff and Stanley Mazor, who led the design of the first commercial microprocessor, the Intel 4004?

- A) Federico Faggin
- B) Gordon Moore
- C) Robert Noyce
- D) Jack Kilby

Answer: Federico Faggin

4. Along with Robert Wilson, who discovered the cosmic microwave background radiation in 1965?

- A) Arno Penzias
- B) Fred Hoyle
- C) George Gamow
- D) Edwin Hubble

Answer: Arno Penzias

5. Who invented the first fully electronic television system, demonstrated in 1927?

- A) Philo Farnsworth

- B) John Logie Baird
- C) Vladimir Zworykin
- D) Guglielmo Marconi

Answer: Philo Farnsworth

6. In which country was the ancient Antikythera mechanism, an early analog astronomical calculator, discovered?

- A) Greece
- B) Italy
- C) Egypt
- D) Turkey

Answer: Greece

7. Who invented the first practical fuel cell, in 1839?

- A) William Grove
- B) Michael Faraday
- C) Humphry Davy
- D) Alessandro Volta

Answer: William Grove

8. Along with Charles Best, who is credited with discovering insulin?

- A) Frederick Banting
- B) Alexander Fleming
- C) Jonas Salk
- D) Louis Pasteur

Answer: Frederick Banting

9. Along with Emmanuelle Charpentier, who co-developed the CRISPR gene-editing technique?

- A) Jennifer Doudna
- B) Rosalind Franklin
- C) Barbara McClintock
- D) Rita Levi-Montalcini

Answer: Jennifer Doudna

10. Along with Didier Queloz, who discovered the first exoplanet found orbiting a Sun-like star, in 1995?

- A) Michel Mayor
- B) Carl Sagan
- C) Frank Drake
- D) Geoffrey Marcy

Answer: Michel Mayor

11. Who invented the first practical AC induction motor?

- A) Nikola Tesla
- B) Thomas Edison
- C) George Westinghouse
- D) Michael Faraday

Answer: Nikola Tesla

12. Who formulated the periodic law and created an early version of the periodic table of elements?

- A) Dmitri Mendeleev
- B) Antoine Lavoisier
- C) John Dalton
- D) Julius Lothar Meyer

Answer: Dmitri Mendeleev

13. Who invented the first commercially successful mechanical calculator sold in large numbers, the Arithmometer?

- A) Thomas de Colmar
- B) Blaise Pascal
- C) Gottfried Leibniz
- D) Charles Babbage

Answer: Thomas de Colmar

14. Who discovered the Doppler effect, describing the change in frequency of waves from a moving source?

- A) Christian Doppler
- B) Heinrich Hertz
- C) James Clerk Maxwell
- D) Ernst Mach

Answer: Christian Doppler

15. Who invented the first successful vaccine against yellow fever, in 1937?

- A) Max Theiler
- B) Walter Reed
- C) Carlos Finlay
- D) Jesse Lazear

Answer: Max Theiler

16. Which scientist first proposed the theory of continental drift, a precursor to plate tectonics?

- A) Alfred Wegener
- B) Charles Lyell
- C) James Hutton
- D) Harry Hess

Answer: Alfred Wegener

17. Who discovered the radioactivity of uranium in 1896, inspiring Marie Curie's further research?

- A) Henri Becquerel
- B) Marie Curie
- C) Ernest Rutherford
- D) Wilhelm Rontgen

Answer: Henri Becquerel

Politics & Government

Easy • Segment 1 (Q1–Q3)

1. What is the term for a system of government where power is held by elected representatives?

- A) Democracy
- B) Monarchy
- C) Dictatorship
- D) Theocracy

Answer: Democracy

2. What is the term for a government headed by a king or queen?

- A) Monarchy
- B) Democracy
- C) Republic
- D) Oligarchy

Answer: Monarchy

3. What is the term for a system where one person holds absolute, unchecked power?

- A) Dictatorship
- B) Democracy
- C) Federation
- D) Confederation

Answer: Dictatorship

4. What is the name of the document that outlines the fundamental laws of a country?

- A) Constitution
- B) Charter
- C) Manifesto
- D) Treaty

Answer: Constitution

5. What is the term for the branch of government responsible for making laws?

- A) Legislature
- B) Executive
- C) Judiciary
- D) Cabinet

Answer: Legislature

6. What is the term for the branch of government responsible for enforcing laws?

- A) Executive
- B) Legislature
- C) Judiciary
- D) Senate

Answer: Executive

7. What is the term for the branch of government responsible for interpreting laws?

- A) Judiciary
- B) Legislature
- C) Executive
- D) Parliament

Answer: Judiciary

8. What is the right to vote called?

- A) Suffrage
- B) Citizenship
- C) Ballot
- D) Franchise fee

Answer: Suffrage

9. What is the term for a system where two main political parties dominate a country's politics?

- A) Two-party system
- B) One-party system
- C) Multi-party system
- D) No-party system

Answer: Two-party system

10. What is the term for the head of government in a parliamentary system, typically the leader of the majority party?

- A) Prime Minister
- B) President
- C) Chancellor of the Exchequer
- D) Governor

Answer: Prime Minister

11. What do we call a person who has the legal right to vote and participate in a country's democracy?

- A) Citizen
- B) Resident
- C) Immigrant
- D) Delegate

Answer: Citizen

12. What is the term for a formal, organized group that seeks to gain political power through elections?

- A) Political party
- B) Union
- C) Committee
- D) Assembly

Answer: Political party

13. What do we call a country ruled by military leaders who have seized power?

- A) Military dictatorship
- B) Republic
- C) Monarchy
- D) Federation

Answer: Military dictatorship

14. What is the term for the process by which citizens choose their representatives?

- A) Election
- B) Census
- C) Referendum
- D) Nomination

Answer: Election

15. What is the term for a government system divided between a national government and state or provincial governments?

- A) Federal system

- B) Unitary system
- C) Confederation
- D) City-state

Answer: Federal system

16. What is the term for a government system where power is centralized nationally, with limited local authority?

- A) Unitary system
- B) Federal system
- C) Federation
- D) Autonomy

Answer: Unitary system

17. What is the term for basic rights guaranteed to all citizens, often listed in a constitution?

- A) Fundamental rights
- B) Civic duties
- C) Legal codes
- D) Statutes

Answer: Fundamental rights

18. What is the term for a government headed by a small group of powerful individuals or families?

- A) Oligarchy
- B) Democracy
- C) Monarchy
- D) Theocracy

Answer: Oligarchy

19. What is the term for a country ruled by a king or queen with limited power, sharing authority with an elected government?

- A) Constitutional monarchy
- B) Absolute monarchy
- C) Republic
- D) Federation

Answer: Constitutional monarchy

20. What is the term for the head of state in a republic?

- A) President
- B) Prime Minister
- C) Chancellor
- D) Governor

Answer: President

21. What is the term for a group of senior advisers, often department heads, who help a head of government make decisions?

- A) Cabinet
- B) Caucus
- C) Committee
- D) Council

Answer: Cabinet

22. What is the term for the specific geographic area an elected representative represents?

- A) Constituency
- B) District court
- C) Ward office

D) Precinct hall

Answer: Constituency

23. What is the term for a formal written request submitted to a government body by citizens?

A) Petition

B) Referendum

C) Mandate

D) Decree

Answer: Petition

24. What is a country's foundational document listing citizens' basic legal protections called?

A) Bill of Rights

B) Executive Order

C) Legal Code

D) Royal Charter

Answer: Bill of Rights

25. What is the term for a temporary halt or suspension of a legislative session?

A) Adjournment

B) Dissolution

C) Recess appointment

D) Filibuster

Answer: Adjournment

26. What is the term for an official responsible for overseeing elections to ensure they are conducted fairly?

A) Election Commissioner

B) Poll Marshal

C) Ballot Judge

D) Vote Auditor

Answer: Election Commissioner

27. What is the term for the entire group of people eligible to vote in an election?

A) Electorate

B) Constituency

C) Delegation

D) Assembly

Answer: Electorate

28. What is the term for a government's official approach to relations with other countries?

A) Foreign policy

B) Domestic policy

C) Trade policy

D) Fiscal policy

Answer: Foreign policy

29. What is the term for a government's approach to internal, domestic issues, as opposed to foreign policy?

A) Domestic policy

B) Foreign policy

C) Monetary policy

D) International law

Answer: Domestic policy

30. What is the term for the minimum number of members who must be present for a legislative body to conduct valid business?

- A) Quorum
- B) Majority
- C) Plurality
- D) Consensus

Answer: Quorum

31. What is the term for a government employee who is not elected but works in an administrative role?

- A) Civil servant
- B) Delegate
- C) Elector
- D) Diplomat

Answer: Civil servant

32. What is the term for a formal written agreement between two or more countries?

- A) Treaty
- B) Statute
- C) Ordinance
- D) Decree

Answer: Treaty

33. What is the term for the head of a city's local government?

- A) Mayor
- B) Governor
- C) Commissioner
- D) Alderman

Answer: Mayor

34. What is the term for the smallest common unit of local government, often covering a town or group of villages?

- A) Municipality
- B) Province
- C) District
- D) Territory

Answer: Municipality

35. What is the term for a judge's or official's right to hold office for an extended or indefinite period, protecting their independence?

- A) Tenure
- B) Mandate
- C) Term limit
- D) Appointment

Answer: Tenure

36. What is the term for a government's organized collection of laws on a specific subject, such as taxation?

- A) Legal code
- B) Statute book
- C) Constitution
- D) Charter

Answer: Legal code

37. What is the term for the formal ceremony marking an elected official's official start of term?

- A) Inauguration
- B) Coronation
- C) Investiture
- D) Ratification

Answer: Inauguration

Easy-Medium • Segment 2 (Q4–Q6)

1. What is the term for a government system with an elected head of state, and no monarch?

- A) Republic
- B) Monarchy
- C) Protectorate
- D) Colony

Answer: Republic

2. What is the term for dividing governmental power among different branches to prevent any one from becoming too powerful?

- A) Separation of powers
- B) Federalism
- C) Devolution
- D) Bicameralism

Answer: Separation of powers

3. What is the term for the power of courts to check the actions of the legislature and executive?

- A) Judicial review
- B) Legislative oversight
- C) Executive privilege
- D) Due process

Answer: Judicial review

4. What is the name of the international organization founded in 1945 to maintain peace and security?

- A) United Nations
- B) League of Nations
- C) NATO
- D) European Union

Answer: United Nations

5. How many permanent members does the United Nations Security Council have?

- A) 5
- B) 10
- C) 15
- D) 20

Answer: 5

6. What is the term for a political system with several competing parties, none dominating exclusively?

- A) Multi-party system
- B) Two-party system
- C) One-party system
- D) Coalition state

Answer: Multi-party system

7. What is the term for the formal removal of a sitting official through a legal process for wrongdoing?

- A) Impeachment

- B) Recall
- C) Censure
- D) Dissolution

Answer: Impeachment

Answer: Political question doctrine

Computer & Internet

Easy • Segment 1 (Q1–Q3)

1. Which programming language, created by Guido van Rossum, is known for its readability and heavy use in data science?

- A) Python
- B) Java
- C) C++
- D) Ruby

Answer: Python

2. What is the term for a piece of software that automatically performs repetitive tasks online, sometimes maliciously?

- A) Bot
- B) Widget
- C) Plugin
- D) Applet

Answer: Bot

3. Who is considered the "father of the World Wide Web," having invented it in 1989?

- A) Tim Berners-Lee
- B) Vint Cerf
- C) Marc Andreessen
- D) Bill Gates

Answer: Tim Berners-Lee

4. What does "SQL" stand for, a language used to manage databases?

- A) Structured Query Language
- B) Standard Query Logic
- C) System Query Language
- D) Sequential Query Language

Answer: Structured Query Language

5. What is the term for a network attack that overwhelms a server with traffic to make it unavailable to users?

- A) Denial-of-Service attack
- B) Phishing attack
- C) Man-in-the-middle attack
- D) SQL injection

Answer: Denial-of-Service attack

6. Who created the original Linux kernel in 1991?

- A) Linus Torvalds
- B) Richard Stallman
- C) Dennis Ritchie
- D) Ken Thompson

Answer: Linus Torvalds

7. What is the term for software whose source code is made publicly available to use, modify, and distribute freely?

- A) Open-source software
- B) Freeware

- C) Shareware
- D) Proprietary software

Answer: Open-source software

8. What does "HTTP" stand for?

- A) HyperText Transfer Protocol
- B) High Text Transmission Path
- C) Home Tool Transfer Protocol
- D) HyperText Transmission Path

Answer: HyperText Transfer Protocol

9. In which year did Elon Musk acquire Twitter, later renaming it X?

- A) 2022
- B) 2018
- C) 2020
- D) 2024

Answer: 2022

10. What is the term for tricking people into revealing sensitive information via fake emails or websites?

- A) Phishing
- B) Spoofing
- C) Hacking
- D) Spamming

Answer: Phishing

11. What does "GUI" stand for?

- A) Graphical User Interface
- B) General User Interface
- C) Graphic Utility Icon
- D) Global User Identity

Answer: Graphical User Interface

12. What was the name of the first widely-used web browser, released in 1993, that helped popularize the internet?

- A) Mosaic
- B) Netscape
- C) Internet Explorer
- D) Lynx

Answer: Mosaic

13. What does "DNS" stand for, the system that translates domain names into IP addresses?

- A) Domain Name System
- B) Data Network Server
- C) Digital Naming Standard
- D) Domain Network Service

Answer: Domain Name System

14. What is the term for a copy of data stored separately in case the original is lost or damaged?

- A) Backup
- B) Cache
- C) Buffer
- D) Archive

Answer: Backup

15. Which programming language, developed by Apple, is primarily used for iOS app development?

- A) Swift
- B) Objective-C
- C) Kotlin
- D) Dart

Answer: Swift

16. What does "API" stand for, allowing different software applications to communicate with each other?

- A) Application Programming Interface
- B) Automated Program Instruction
- C) Applied Program Integration
- D) Application Process Index

Answer: Application Programming Interface

17. What is the term for the amount of data that can be transmitted over an internet connection in a given time?

- A) Bandwidth
- B) Latency
- C) Throughput cap
- D) Ping

Answer: Bandwidth

18. What does "PC" commonly stand for?

- A) Personal Computer
- B) Processing Chip
- C) Program Code
- D) Portable Component

Answer: Personal Computer

19. What does "ROM," a type of computer memory, stand for?

- A) Read-Only Memory
- B) Random Output Memory
- C) Rapid Operating Memory
- D) Recordable Optical Media

Answer: Read-Only Memory

20. What is the name of the small arrow icon controlled by a computer mouse on screen?

- A) Cursor
- B) Pointer stick
- C) Marker
- D) Indicator

Answer: Cursor

21. What is the term for a computer program used to browse websites on the internet?

- A) Web browser
- B) Search engine
- C) Web server
- D) Web host

Answer: Web browser

22. What is the term for a computer file that has been compressed to reduce its size and save storage space?

- A) Zip file

- B) Cache file
- C) Temp file
- D) Log file

Answer: Zip file

23. What does "app" commonly refer to on smartphones and computers?

- A) Application
- B) Attachment
- C) Access point
- D) Archive

Answer: Application

24. What is the name of the touch-sensitive pad found on most laptop computers, used instead of a mouse?

- A) Touchpad
- B) Trackball
- C) Digitizer
- D) Scroll wheel

Answer: Touchpad

25. What does "GB," a common unit for measuring digital storage, stand for?

- A) Gigabyte
- B) Gigabit
- C) General Byte
- D) Global Block

Answer: Gigabyte

26. What does "MB," a common unit for measuring digital storage, stand for?

- A) Megabyte
- B) Megabit
- C) Main Board
- D) Memory Block

Answer: Megabyte

27. What is the term for a computer's main circuit board, which connects all its components?

- A) Motherboard
- B) Processor board
- C) Circuit hub
- D) Base card

Answer: Motherboard

28. What do we call unwanted software that installs itself without full user consent, often to display advertisements?

- A) Adware
- B) Firmware
- C) Shareware
- D) Freeware

Answer: Adware

29. What is the name of Microsoft's word processing software?

- A) Microsoft Word
- B) Microsoft Notes
- C) Microsoft Write

D) Microsoft Text

Answer: Microsoft Word

30. What is the name of Microsoft's spreadsheet software?

- A) Microsoft Excel
- B) Microsoft Sheets
- C) Microsoft Calc
- D) Microsoft Tables

Answer: Microsoft Excel

31. What is the name of Microsoft's presentation software?

- A) Microsoft PowerPoint
- B) Microsoft Slides
- C) Microsoft Present
- D) Microsoft Show

Answer: Microsoft PowerPoint

32. What do we call an organized collection of related data, often searched using queries?

- A) Database
- B) Spreadsheet
- C) Directory
- D) Archive

Answer: Database

33. What is the term for the process of sending a file from your computer to a server on the internet?

- A) Uploading
- B) Downloading
- C) Streaming
- D) Syncing

Answer: Uploading

34. What is the term for the process of receiving a file from the internet onto your computer?

- A) Downloading
- B) Uploading
- C) Streaming
- D) Mirroring

Answer: Downloading

35. What is the common keyboard shortcut used to copy selected text or items?

- A) Ctrl+C
- B) Ctrl+V
- C) Ctrl+X
- D) Ctrl+Z

Answer: Ctrl+C

36. What is the common keyboard shortcut used to paste copied text or items?

- A) Ctrl+V
- B) Ctrl+C
- C) Ctrl+P
- D) Ctrl+Y

Answer: Ctrl+V

37. What is the common keyboard shortcut used to undo the last action in most software?

- A) Ctrl+Z
 - B) Ctrl+U
 - C) Ctrl+R
 - D) Ctrl+Y
- Answer: Ctrl+Z**

Easy-Medium • Segment 2 (Q4–Q6)

1. What is the name of the first electronic general-purpose digital computer, completed in 1945?

- A) ENIAC
 - B) UNIVAC
 - C) Colossus
 - D) EDSAC
- Answer: ENIAC**

2. Who is credited with writing the first computer algorithm, intended for Charles Babbage's Analytical Engine?

- A) Ada Lovelace
 - B) Grace Hopper
 - C) Katherine Johnson
 - D) Margaret Hamilton
- Answer: Ada Lovelace**

3. What does "TCP/IP" stand for, the foundational protocol suite of the internet?

- A) Transmission Control Protocol/Internet Protocol
 - B) Total Computer Protocol/Internal Process
 - C) Transfer Control Program/Internet Process
 - D) Terminal Connection Protocol/Interface Program
- Answer: Transmission Control Protocol/Internet Protocol**

4. What is the term for a type of encryption that uses two keys, one public and one private?

- A) Asymmetric encryption
 - B) Symmetric encryption
 - C) Hash encryption
 - D) Block encryption
- Answer: Asymmetric encryption**

5. What was the name of one of the first computer viruses to spread widely on early personal computers, in 1986?

- A) Brain
 - B) ILOVEYOU
 - C) Melissa
 - D) Sasser
- Answer: Brain**

6. What is the term for a computer system's ability to run multiple operating systems on one physical machine at once?

- A) Virtualization
 - B) Multitasking
 - C) Partitioning
 - D) Clustering
- Answer: Virtualization**

7. What is the name of the security protocol used to encrypt data transmitted over the web, indicated by "https"?

- A) SSL/TLS
- B) FTP
- C) SMTP
- D) POP3

Answer: SSL/TLS

8. What is the term for converting readable data into a coded, unreadable format for security purposes?

- A) Encryption
- B) Compression
- C) Formatting
- D) Indexing

Answer: Encryption

9. What do "IPv4" and "IPv6" refer to in internet addressing?

- A) Versions of the Internet Protocol
- B) Types of network cables
- C) Kinds of web browsers
- D) Email server standards

Answer: Versions of the Internet Protocol

10. What is the term for a computer program that replicates itself and spreads to other computers, often causing harm?

- A) Computer virus
- B) Firewall
- C) Cookie
- D) Cache

Answer: Computer virus

11. What is the name of the technology that allows multiple virtual computers to run on a single physical server?

- A) Virtual machine
- B) Server farm
- C) Data center
- D) Load balancer

Answer: Virtual machine

12. What does "RFID" stand for?

- A) Radio-Frequency Identification
- B) Rapid File Data Identification
- C) Remote Frequency Internet Device
- D) Radio Feed Information Data

Answer: Radio-Frequency Identification

13. What is the term for a network of malware-infected computers controlled remotely, often used to launch attacks?

- A) Botnet
- B) Firewall
- C) Honeypot
- D) Sandbox

Answer: Botnet

14. What was the name of the first commercially successful personal computer, released by Apple in 1977?

- A) Apple II
- B) Macintosh
- C) Apple I
- D) Lisa

Answer: Apple II

15. What is the term for a security vulnerability that is unknown to the software vendor and has no available fix?

- A) Zero-day vulnerability
- B) Legacy bug
- C) Backdoor exploit
- D) Buffer overflow

Answer: Zero-day vulnerability

16. What does "LAN" stand for?

- A) Local Area Network
- B) Long Area Network
- C) Linked Area Node
- D) Limited Access Network

Answer: Local Area Network

17. What is the term for a database design principle that reduces data redundancy by organizing fields and tables?

- A) Normalization
- B) Indexing
- C) Replication
- D) Partitioning

Answer: Normalization

18. What is the name of the standard connector widely used for charging and data transfer on modern smartphones, replacing older micro-USB?

- A) USB-C
- B) USB-A
- C) Lightning
- D) HDMI

Answer: USB-C

19. What does Bluetooth technology primarily enable between nearby devices?

- A) Short-range wireless communication
- B) Long-range satellite communication
- C) Wired data transfer
- D) Fiber-optic networking

Answer: Short-range wireless communication

20. What is the term for a computer processor containing multiple independent processing units, allowing it to handle multiple tasks at once?

- A) Multi-core processor
- B) Single-core processor
- C) Co-processor
- D) Microcontroller

Answer: Multi-core processor

21. What does "4K" refer to in the context of television and monitor displays?

- A) Ultra High Definition resolution
- B) Screen refresh rate
- C) Color depth
- D) Contrast ratio

Answer: Ultra High Definition resolution

22. What is the term for dividing a single physical hard drive into multiple separate logical sections?

- A) Partitioning
- B) Formatting
- C) Defragmenting
- D) Compressing

Answer: Partitioning

23. What is the term for commercial software that must be purchased or licensed before use, as opposed to open-source software?

- A) Proprietary software
- B) Freeware
- C) Shareware
- D) Middleware

Answer: Proprietary software

24. What is the term for a networking device that connects multiple computers, allowing them to communicate within a local network?

- A) Router
- B) Modem
- C) Server
- D) Firewall

Answer: Router

25. What is the name of the process of restoring a computer or device to its original factory default settings?

- A) Factory reset
- B) System restore
- C) Hard reboot
- D) Data wipe

Answer: Factory reset

26. What term describes software updates that fix security vulnerabilities or bugs?

- A) Patch
- B) Driver
- C) Firmware
- D) Plugin

Answer: Patch

27. What is the name of the common compressed file format widely used for photographs on the web?

- A) JPEG
- B) PNG
- C) BMP
- D) TIFF

Answer: JPEG

28. What is the name of the common image file format known for lossless quality and support for transparent backgrounds?

- A) PNG
- B) JPEG
- C) GIF
- D) BMP

Answer: PNG

29. What does "GIF," a common animated image file format, stand for?

- A) Graphics Interchange Format
- B) General Image File
- C) Graphic Info Format
- D) Global Image Framework

Answer: Graphics Interchange Format

30. What is the term for a small text file stored on a user's computer by a website to remember preferences or login details?

- A) Cookie
- B) Cache
- C) Token
- D) Session ID

Answer: Cookie

31. What is the name of the browser mode that does not save browsing history, cookies, or site data?

- A) Incognito mode
- B) Safe mode
- C) Guest mode
- D) Airplane mode

Answer: Incognito mode

32. What is the term for software designed to detect and remove malicious programs from a computer?

- A) Antivirus software
- B) Firewall software
- C) Backup software
- D) Compression software

Answer: Antivirus software

33. What prefix appears at the start of a web address to indicate a secure, encrypted connection?

- A) https
- B) www
- C) ftp
- D) smtp

Answer: https

34. What is the term for the process of converting a computer file from one format to another?

- A) File conversion
- B) File compression
- C) File indexing
- D) File encryption

Answer: File conversion

35. What is the term for a computer program that runs continuously in the background, performing tasks without direct user interaction?

- A) Background process
- B) Foreground application

- C) System driver
- D) User interface

Answer: Background process

36. What is the name of the technology that allows a smartphone to share its internet connection wirelessly with other devices?

- A) Mobile hotspot
- B) Bluetooth tethering
- C) NFC sharing
- D) Wi-Fi Direct

Answer: Mobile hotspot

37. What is the term for the practice of creating copies of important data to protect against loss?

- A) Data backup
- B) Data mining
- C) Data encryption
- D) Data compression

Answer: Data backup

Medium • Segment 3 (Q7–Q9)

1. Who proposed the theoretical foundation of modern computing, the "Turing machine," in a 1936 paper?

- A) Alan Turing
- B) John von Neumann
- C) Claude Shannon
- D) Alonzo Church

Answer: Alan Turing

2. What is the name of the first computer worm to spread across the early internet (ARPANET), released in 1988?

- A) Morris Worm
- B) Code Red
- C) Blaster
- D) Conficker

Answer: Morris Worm

3. What is the term for the theoretical limit on how much a communication signal can be compressed without losing information, named after its formulator?

- A) Shannon limit
- B) Nyquist limit
- C) Moore's limit
- D) Turing limit

Answer: Shannon limit

4. Which programming paradigm, based on "objects" that bundle data and behavior together, is exemplified by languages like Java and C++?

- A) Object-oriented programming
- B) Functional programming
- C) Procedural programming
- D) Declarative programming

Answer: Object-oriented programming

5. What is the name of the cryptographic algorithm, published in 1977, that became a foundational standard for public-key encryption?

- A) RSA algorithm
- B) AES algorithm
- C) DES algorithm
- D) Blowfish algorithm

Answer: RSA algorithm

6. What is the term for a computing architecture where program instructions and data share the same memory space, as opposed to Harvard architecture?

- A) Von Neumann architecture
- B) RISC architecture
- C) CISC architecture
- D) Pipeline architecture

Answer: Von Neumann architecture

7. Who is credited, along with Donald Davies independently, with inventing packet-switching networks, a foundational concept for the internet?

- A) Paul Baran
- B) Vint Cerf
- C) Bob Kahn
- D) Leonard Kleinrock

Answer: Paul Baran

8. What was the name of one of the first search engines, created in 1990, that indexed files on FTP archives?

- A) Archie
- B) Yahoo
- C) AltaVista
- D) WebCrawler

Answer: Archie

9. What is the term for the process by which a compiler translates high-level programming code into machine code?

- A) Compilation
- B) Interpretation
- C) Assembly
- D) Execution

Answer: Compilation

10. What is the name of the algorithm Google uses to rank web pages in search results, named partly after a co-founder?

- A) PageRank
- B) SearchRank
- C) LinkRank
- D) WebRank

Answer: PageRank

11. What is the term for a data structure that stores and retrieves elements in a last-in-first-out (LIFO) order?

- A) Stack
- B) Queue
- C) Array
- D) Linked list

Answer: Stack

12. What is the name of a widely used hashing algorithm, now considered cryptographically insecure due to demonstrated collision attacks?

- A) MD5
- B) AES
- C) RSA
- D) Diffie-Hellman

Answer: MD5

13. What is the term for a type of computer memory that retains data only while powered, losing it when power is switched off?

- A) Volatile memory
- B) Non-volatile memory
- C) Flash memory
- D) Read-only memory

Answer: Volatile memory

14. Who is credited as the primary creator of the Java programming language while at Sun Microsystems?

- A) James Gosling
- B) Bjarne Stroustrup
- C) Dennis Ritchie
- D) Anders Hejlsberg

Answer: James Gosling

15. What is the term for the process of finding and fixing errors or defects in computer software?

- A) Debugging
- B) Compiling
- C) Refactoring
- D) Profiling

Answer: Debugging

16. In which famous 1968 technology demonstration, dubbed "The Mother of All Demos," did Douglas Engelbart showcase the computer mouse, hypertext, and video conferencing?

- A) The Mother of All Demos
- B) The Homebrew Computer Club Demo
- C) The Xerox PARC Showcase
- D) The Dartmouth Time-Sharing Demo

Answer: The Mother of All Demos

17. What is the term for the smallest unit of information in classical computing, represented as either a 0 or a 1?

- A) Bit
- B) Byte
- C) Nibble
- D) Word

Answer: Bit

18. What is the term for a network architecture in which all computers have equal privileges, without a central server, commonly used in file-sharing systems?

- A) Peer-to-peer network
- B) Client-server network
- C) Star network

D) Mesh network

Answer: Peer-to-peer network

19. What is the term for a computing model where data processing occurs on local devices close to the data source, rather than in a centralized cloud?

A) Edge computing

B) Cloud computing

C) Grid computing

D) Quantum computing

Answer: Edge computing

20. What is the name of the protocol used to securely access and manage remote computers over a network?

A) SSH

B) FTP

C) HTTP

D) SNMP

Answer: SSH

21. What is the term for a technique combining several physical storage drives into a single logical unit for improved performance or redundancy?

A) RAID

B) SAN

C) NAS

D) SSD array

Answer: RAID

22. What is the name of the popular open-source container platform that revolutionized software deployment, first released in 2013?

A) Docker

B) Kubernetes

C) Vagrant

D) VMware

Answer: Docker

23. What is the term for a software architecture style in which an application is built as a collection of small, independent services communicating over a network?

A) Microservices architecture

B) Monolithic architecture

C) Client-server architecture

D) Peer-to-peer architecture

Answer: Microservices architecture

24. What version control system, created by Linus Torvalds, is widely used by software developers to track changes in code?

A) Git

B) SVN

C) Mercurial

D) Perforce

Answer: Git

25. What is the term for a cyberattack in which an attacker secretly intercepts communication between two parties?

A) Man-in-the-middle attack

- B) Denial-of-service attack
- C) Phishing attack
- D) Brute-force attack

Answer: Man-in-the-middle attack

26. What is the name of the security practice of testing a computer system for vulnerabilities by simulating an authorized attack?

- A) Penetration testing
- B) Unit testing
- C) Load testing
- D) Regression testing

Answer: Penetration testing

27. What is the name of the widely used language for styling the visual presentation of web pages, working alongside HTML?

- A) CSS
- B) XML
- C) PHP
- D) SQL

Answer: CSS

28. What is the term for a website's design automatically adjusting its layout to fit different screen sizes, like mobile and desktop?

- A) Responsive design
- B) Adaptive coding
- C) Fluid scripting
- D) Dynamic rendering

Answer: Responsive design

29. What is the name of the international standard character encoding system that digitally represents most of the world's writing systems?

- A) Unicode
- B) ASCII
- C) UTF-32
- D) EBCDIC

Answer: Unicode

30. What is the term for software that manages and organizes digital content on a website without requiring manual coding of each page?

- A) Content Management System
- B) Database Management System
- C) Operating System
- D) File Management System

Answer: Content Management System

31. What is the name of the most widely used open-source Content Management System for building websites?

- A) WordPress
- B) Joomla
- C) Drupal
- D) Wix

Answer: WordPress

32. What is the term for a cyberattack that encrypts a victim's files and demands payment for their release?

- A) Ransomware
- B) Spyware
- C) Trojan horse
- D) Rootkit

Answer: Ransomware

33. What is the name of the technique used to improve a website's visibility in unpaid search engine results?

- A) Search Engine Optimization
- B) Pay-Per-Click Advertising
- C) Affiliate Marketing
- D) Content Syndication

Answer: Search Engine Optimization

34. What is the term for testing software with real users before its official public release?

- A) Beta testing
- B) Alpha testing
- C) Unit testing
- D) Smoke testing

Answer: Beta testing

35. What widely used JavaScript library, developed by Facebook, is used for building user interfaces?

- A) React
- B) Angular
- C) Vue
- D) jQuery

Answer: React

36. What is the term for a self-executing piece of code on a blockchain that automatically enforces the terms of an agreement?

- A) Smart contract
- B) Cryptographic hash
- C) Distributed ledger
- D) Consensus protocol

Answer: Smart contract

37. What is the name of the popular front-end JavaScript framework developed by Google, an alternative to React?

- A) Angular
- B) React
- C) Svelte
- D) Ember

Answer: Angular

Medium-Hard • Segment 4 (Q10–Q12)

1. What term describes a computational problem where solutions can be verified quickly, but no known algorithm solves all instances in polynomial time?

- A) NP-complete problem
- B) P problem
- C) Undecidable problem

D) Halting problem

Answer: NP-complete problem

2. What is the name of the data structure that allows efficient insertion and deletion at both its front and back ends?

A) Deque

B) Stack

C) Singly linked list

D) Binary tree

Answer: Deque

3. What is the term for a hierarchical data structure in which each node has at most two children?

A) Binary tree

B) Linked list

C) Hash table

D) Graph

Answer: Binary tree

4. Which sorting algorithm has an average time complexity of $O(n \log n)$ and works by recursively splitting an array in half?

A) Merge sort

B) Bubble sort

C) Insertion sort

D) Selection sort

Answer: Merge sort

5. What is the term for a variable's visibility and lifetime within a program, determining where in the code it can be accessed?

A) Scope

B) Namespace

C) Instance

D) Pointer

Answer: Scope

6. What protocol is used to send email between mail servers?

A) SMTP

B) FTP

C) HTTP

D) IMAP

Answer: SMTP

7. What is the term for a programming technique where a function calls itself to solve smaller instances of the same problem?

A) Recursion

B) Iteration

C) Inheritance

D) Polymorphism

Answer: Recursion

8. What does "REST," a common architectural style for web APIs, stand for?

A) Representational State Transfer

B) Remote Execution State Transfer

C) Reliable State Transfer

D) Resource State Transmission

Answer: Representational State Transfer

9. What database transaction property ensures that a set of operations completes fully or not at all?

- A) Atomicity
- B) Isolation
- C) Durability
- D) Consistency

Answer: Atomicity

10. What is the term for a bug where the outcome of concurrent operations depends unpredictably on their timing?

- A) Race condition
- B) Deadlock
- C) Memory leak
- D) Stack overflow

Answer: Race condition

11. What is the term for a processor's technique of overlapping the execution stages of multiple instructions to improve throughput?

- A) Pipelining
- B) Multithreading
- C) Virtualization
- D) Caching

Answer: Pipelining

12. Which layer of the OSI model is primarily responsible for routing data between different networks?

- A) Network layer
- B) Transport layer
- C) Data link layer
- D) Application layer

Answer: Network layer

13. What is the term for storing frequently accessed data in faster, smaller memory for quicker future retrieval?

- A) Caching
- B) Paging
- C) Buffering
- D) Indexing

Answer: Caching

14. What algorithmic strategy solves problems by breaking them into overlapping subproblems and storing previously computed results?

- A) Dynamic programming
- B) Greedy algorithm
- C) Brute force
- D) Divide and conquer

Answer: Dynamic programming

15. What is the term for code secretly inserted into a system to bypass normal authentication, often for malicious access?

- A) Backdoor
- B) Firewall
- C) Sandbox
- D) Honeypot

Answer: Backdoor

16. What network topology connects all devices to a single central hub or switch?

- A) Star topology
- B) Ring topology
- C) Bus topology
- D) Mesh topology

Answer: Star topology

17. What is the term for the intermediate, platform-independent code that Java source code is compiled into before execution?

- A) Bytecode
- B) Machine code
- C) Assembly code
- D) Source code

Answer: Bytecode

Hard • Segment 5 (Q13–Q15)

1. What term describes a problem, exemplified by the Halting Problem, that is provably impossible for any algorithm to solve for all inputs?

- A) Undecidable problem
- B) NP-hard problem
- C) Intractable problem
- D) Heuristic problem

Answer: Undecidable problem

2. Who proved, in a landmark 1936 paper, that the Halting Problem is undecidable?

- A) Alan Turing
- B) Kurt Godel
- C) Alonzo Church
- D) John von Neumann

Answer: Alan Turing

3. What class of security exploit infers secret data by measuring how long cryptographic operations take to execute?

- A) Side-channel attack
- B) Brute-force attack
- C) Man-in-the-middle attack
- D) SQL injection

Answer: Side-channel attack

4. What graph traversal algorithm explores as far as possible along each branch before backtracking?

- A) Depth-first search
- B) Breadth-first search
- C) A* search
- D) Binary search

Answer: Depth-first search

5. Which algorithm, developed by a Dutch computer scientist, finds the shortest path between nodes in a weighted graph?

- A) Dijkstra's algorithm
- B) Bellman-Ford algorithm

- C) Kruskal's algorithm
- D) Prim's algorithm

Answer: Dijkstra's algorithm

6. What complexity class contains all problems solvable in polynomial time by a deterministic computer?

- A) P
- B) NP
- C) NP-hard
- D) EXPTIME

Answer: P

7. What cryptographic technique allows computations to be performed directly on encrypted data without first decrypting it?

- A) Homomorphic encryption
- B) Symmetric encryption
- C) Hash encryption
- D) Elliptic curve encryption

Answer: Homomorphic encryption

8. The CAP theorem states a distributed system can only guarantee two of which three properties simultaneously?

- A) Consistency, Availability, and Partition tolerance
- B) Concurrency, Atomicity, and Persistence
- C) Capacity, Access, and Performance
- D) Coherence, Accuracy, and Precision

Answer: Consistency, Availability, and Partition tolerance

9. What data structure, supporting $O(\log n)$ insertion and extraction, is typically used to implement priority queues?

- A) Heap
- B) Stack
- C) Linked list
- D) Hash table

Answer: Heap

10. What compiler optimization technique removes code that has no effect on a program's observable output?

- A) Dead code elimination
- B) Loop unrolling
- C) Inlining
- D) Constant folding

Answer: Dead code elimination

11. What is the name of the famous unsolved computer science problem asking whether every quickly-verifiable problem is also quickly solvable?

- A) P versus NP problem
- B) Halting problem
- C) Traveling salesman problem
- D) Collatz conjecture

Answer: P versus NP problem

12. What hash table collision-resolution technique stores multiple colliding elements in a linked list at the same bucket?

- A) Chaining

- B) Open addressing
- C) Linear probing
- D) Double hashing

Answer: Chaining

13. What ancient algorithm, still in wide use, efficiently finds the greatest common divisor of two integers?

- A) Euclidean algorithm
- B) Sieve of Eratosthenes
- C) Newton's method
- D) Karatsuba algorithm

Answer: Euclidean algorithm

14. What type of memory-corruption vulnerability occurs when a program writes data beyond its allocated buffer, potentially overwriting adjacent memory?

- A) Buffer overflow
- B) Memory leak
- C) Null pointer dereference
- D) Stack underflow

Answer: Buffer overflow

15. What algorithmic paradigm, used by algorithms like merge sort, solves a problem by recursively splitting it into smaller subproblems and combining their results?

- A) Divide and conquer
- B) Dynamic programming
- C) Greedy approach
- D) Backtracking

Answer: Divide and conquer

16. What security practice requires a user to verify their identity using two or more independent forms of credentials?

- A) Multi-factor authentication
- B) Single sign-on
- C) Role-based access control
- D) Public key infrastructure

Answer: Multi-factor authentication

17. What term describes an algorithm's worst-case classification when it is at least as hard as the hardest problems in NP, but not necessarily verifiable in polynomial time itself?

- A) NP-hard
- B) NP-complete
- C) P-complete
- D) NP-easy

Answer: NP-hard

Space & Astronomy

Easy • Segment 1 (Q1–Q3)

1. Which planet is closest to the Sun?

- A) Mercury
- B) Venus
- C) Earth
- D) Mars

Answer: Mercury

2. Which is the largest planet in our solar system?

- A) Jupiter
- B) Saturn
- C) Uranus
- D) Neptune

Answer: Jupiter

3. What is the name of our galaxy?

- A) Milky Way
- B) Andromeda
- C) Whirlpool
- D) Sombrero

Answer: Milky Way

4. What is the name of Earth's only natural satellite?

- A) The Moon
- B) Titan
- C) Europa
- D) Phobos

Answer: The Moon

5. Which planet is known as the "Red Planet"?

- A) Mars
- B) Venus
- C) Mercury
- D) Jupiter

Answer: Mars

6. What is the star at the center of our solar system called?

- A) The Sun
- B) Sirius
- C) Polaris
- D) Alpha Centauri

Answer: The Sun

7. Who was the first person to walk on the Moon?

- A) Neil Armstrong
- B) Buzz Aldrin
- C) Yuri Gagarin
- D) John Glenn

Answer: Neil Armstrong

8. Which planet is famous for its spectacular ring system?

- A) Saturn
- B) Jupiter
- C) Uranus
- D) Mars

Answer: Saturn

9. What do we call a person trained to travel into space?

- A) Astronaut
- B) Pilot
- C) Aviator
- D) Navigator

Answer: Astronaut

10. What is the name of the famous space telescope launched in 1990?

- A) Hubble Space Telescope
- B) Kepler
- C) Spitzer
- D) Chandra

Answer: Hubble Space Telescope

11. How many planets are there in our solar system?

- A) 7
- B) 8
- C) 9
- D) 10

Answer: 8

12. What do we call a small piece of rock that burns up in Earth's atmosphere, seen as a "shooting star"?

- A) Meteor
- B) Comet
- C) Asteroid
- D) Satellite

Answer: Meteor

13. NASA is the space agency of which country?

- A) United States
- B) Russia
- C) China
- D) India

Answer: United States

14. What is the protective suit astronauts wear called?

- A) Spacesuit
- B) Wetsuit
- C) Flight suit
- D) Hazmat suit

Answer: Spacesuit

15. Which planet is often called Earth's "twin" due to its similar size?

- A) Venus
- B) Mars
- C) Mercury

D) Jupiter

Answer: Venus

16. What do we call the curved path a planet follows around the Sun?

A) Orbit

B) Axis

C) Arc

D) Trajectory

Answer: Orbit

17. Which gas makes up most of the Sun?

A) Hydrogen

B) Oxygen

C) Carbon

D) Helium

Answer: Hydrogen

18. What is the name of the imaginary line around which a planet spins?

A) Axis

B) Orbit

C) Equator

D) Meridian

Answer: Axis

19. What is the name for a large object in space made of ice and dust that develops a glowing tail as it nears the Sun?

A) Comet

B) Asteroid

C) Meteor

D) Satellite

Answer: Comet

20. What do we call a small rocky object orbiting the Sun that is smaller than a planet?

A) Asteroid

B) Comet

C) Nebula

D) Quasar

Answer: Asteroid

21. What is the name of the belt of asteroids located between Mars and Jupiter?

A) Asteroid Belt

B) Kuiper Belt

C) Van Allen Belt

D) Oort Cloud

Answer: Asteroid Belt

22. What do we call a scientist who studies stars, planets, and outer space?

A) Astronomer

B) Geologist

C) Meteorologist

D) Physicist

Answer: Astronomer

23. Who was the first human to travel into space, in 1961?

- A) Yuri Gagarin
- B) Neil Armstrong
- C) Alan Shepard
- D) John Glenn

Answer: Yuri Gagarin

24. Which country did Yuri Gagarin, the first human in space, come from?

- A) Soviet Union
- B) United States
- C) United Kingdom
- D) China

Answer: Soviet Union

25. What is the name for the Moon phase when it is fully illuminated and appears as a complete circle?

- A) Full Moon
- B) New Moon
- C) Crescent Moon
- D) Half Moon

Answer: Full Moon

26. What is the name for the Moon phase when it is not visible at all, positioned between Earth and the Sun?

- A) New Moon
- B) Full Moon
- C) Crescent Moon
- D) Gibbous Moon

Answer: New Moon

27. What do we call the imaginary belt of constellations the Sun appears to pass through over a year, the basis of zodiac signs?

- A) Zodiac
- B) Ecliptic circle
- C) Celestial belt
- D) Solar band

Answer: Zodiac

28. What term describes a spacecraft specifically designed to carry humans, as opposed to unmanned probes?

- A) Crewed spacecraft
- B) Satellite
- C) Rover
- D) Probe

Answer: Crewed spacecraft

29. What do we call an object that naturally orbits a planet, such as the Moon orbiting Earth?

- A) Natural satellite
- B) Artificial satellite
- C) Asteroid
- D) Comet

Answer: Natural satellite

30. What is the name for a human-made object placed in orbit around Earth for communication or observation?

- A) Artificial satellite

- B) Natural satellite
- C) Space station
- D) Probe

Answer: Artificial satellite

31. What do we call the scientific study of the possibility of life existing elsewhere in the universe?

- A) Astrobiology
- B) Astrophysics
- C) Cosmology
- D) Exogeology

Answer: Astrobiology

32. What is the name of the imaginary point directly overhead an observer, in the sky?

- A) Zenith
- B) Horizon
- C) Meridian
- D) Apex

Answer: Zenith

33. What do we call a very large group of galaxies bound together by gravity?

- A) Galaxy cluster
- B) Star cluster
- C) Nebula
- D) Constellation

Answer: Galaxy cluster

34. What do we call the phenomenon where Earth's shadow falls on the Moon?

- A) Lunar eclipse
- B) Solar eclipse
- C) Occultation
- D) Transit

Answer: Lunar eclipse

35. What do we call the study of celestial objects and phenomena using the principles of physics and mathematics?

- A) Astrophysics
- B) Astrobiology
- C) Meteorology
- D) Geophysics

Answer: Astrophysics

36. What is the term for the invisible force field surrounding a planet through which its gravity acts?

- A) Gravitational field
- B) Magnetic field
- C) Electric field
- D) Radiation belt

Answer: Gravitational field

37. What do we call the imaginary sphere surrounding Earth onto which all celestial objects appear to be projected?

- A) Celestial sphere
- B) Orbital plane
- C) Ecliptic plane

D) Galactic disk

Answer: Celestial sphere

Easy-Medium • Segment 2 (Q4–Q6)

1. What was the name of the first artificial satellite, launched into space in 1957?

- A) Sputnik 1
- B) Explorer 1
- C) Vanguard 1
- D) Telstar

Answer: Sputnik 1

2. Who was the first woman to travel into space?

- A) Valentina Tereshkova
- B) Sally Ride
- C) Mae Jemison
- D) Helen Sharman

Answer: Valentina Tereshkova

3. Which planet is known for its Great Red Spot, a giant storm?

- A) Jupiter
- B) Saturn
- C) Neptune
- D) Mars

Answer: Jupiter

4. What is the name of the large galaxy nearest to the Milky Way?

- A) Andromeda Galaxy
- B) Triangulum Galaxy
- C) Sombrero Galaxy
- D) Whirlpool Galaxy

Answer: Andromeda Galaxy

5. Which planet has the shortest day due to its fast rotation?

- A) Jupiter
- B) Saturn
- C) Mars
- D) Mercury

Answer: Jupiter

6. A light-year is a measure of which of the following?

- A) Distance
- B) Time
- C) Speed
- D) Brightness

Answer: Distance

7. What was the name of NASA's reusable spacecraft program that ran from 1981 to 2011?

- A) Space Shuttle
- B) Apollo
- C) Gemini
- D) Artemis

Answer: Space Shuttle

8. Which dwarf planet was considered the 9th planet until 2006?

- A) Pluto
- B) Ceres
- C) Eris
- D) Haumea

Answer: Pluto

9. Which planet rotates almost on its side, tilted at about 98 degrees?

- A) Uranus
- B) Neptune
- C) Saturn
- D) Venus

Answer: Uranus

10. What do we call it when the Moon completely blocks the Sun's light from reaching Earth?

- A) Solar eclipse
- B) Lunar eclipse
- C) Equinox
- D) Solstice

Answer: Solar eclipse

11. What was the first human-made object to leave the solar system and enter interstellar space?

- A) Voyager 1
- B) Pioneer 10
- C) New Horizons
- D) Cassini

Answer: Voyager 1

12. Which country launched Sputnik 1?

- A) Soviet Union
- B) United States
- C) China
- D) France

Answer: Soviet Union

13. What term describes a giant cloud of gas and dust in space where new stars are born?

- A) Nebula
- B) Galaxy
- C) Constellation
- D) Cluster

Answer: Nebula

14. What is the name of India's Mars orbiter mission, launched in 2013?

- A) Mangalyaan
- B) Chandrayaan
- C) Gaganyaan
- D) Aditya-L1

Answer: Mangalyaan

15. Approximately how long does sunlight take to reach Earth?

- A) 8 minutes
- B) 1 minute
- C) 30 minutes

D) 1 hour

Answer: 8 minutes

16. What do we call a recognizable pattern of stars in the sky, like Orion?

A) Constellation

B) Galaxy

C) Nebula

D) Cluster

Answer: Constellation

17. What was the name of Bangladesh's first satellite, launched in 2018?

A) Bangabandhu Satellite-1

B) Bangla-Sat

C) BD-Star 1

D) Padma Satellite

Answer: Bangabandhu Satellite-1

18. What was the name of the first artificial satellite to orbit the Moon, launched in 1966?

A) Luna 10

B) Sputnik 2

C) Apollo 8

D) Ranger 7

Answer: Luna 10

19. What was the name of the 1997 mission that first landed a working rover on Mars?

A) Mars Pathfinder

B) Viking 1

C) Mars Global Surveyor

D) Mars Odyssey

Answer: Mars Pathfinder

20. What is the name of NASA's rover exploring Mars's Jezero Crater since 2021, searching for signs of ancient microbial life?

A) Perseverance

B) Curiosity

C) Opportunity

D) Spirit

Answer: Perseverance

21. What is the name of the small helicopter that achieved the first powered flight on another planet, flying alongside the Perseverance rover on Mars?

A) Ingenuity

B) Dragonfly

C) Skycrane

D) Pathfinder

Answer: Ingenuity

22. What was the name of the first spacecraft to successfully land on Mars and transmit data back to Earth, in 1976?

A) Viking 1

B) Mars Pathfinder

C) Mariner 4

D) Phoenix

Answer: Viking 1

23. Which planet has the strongest winds in the solar system, reaching supersonic speeds?

- A) Neptune
- B) Jupiter
- C) Saturn
- D) Uranus

Answer: Neptune

24. What is the name of the largest moon in the solar system, which orbits Jupiter?

- A) Ganymede
- B) Titan
- C) Callisto
- D) Io

Answer: Ganymede

25. What is the name of the largest moon of Saturn?

- A) Titan
- B) Enceladus
- C) Rhea
- D) Iapetus

Answer: Titan

26. What is the name of the process by which stars produce energy through nuclear reactions in their cores?

- A) Nuclear fusion
- B) Nuclear fission
- C) Radioactive decay
- D) Combustion

Answer: Nuclear fusion

27. What is the name for the explosive death of a massive star?

- A) Supernova
- B) Nova
- C) Solar flare
- D) Big Bang

Answer: Supernova

28. What do we call the extremely dense remnant core left behind after certain supernovae, composed almost entirely of tightly packed particles?

- A) Neutron star
- B) White dwarf
- C) Red giant
- D) Brown dwarf

Answer: Neutron star

29. What was the name of India's first uncrewed lunar exploration mission, launched in 2008?

- A) Chandrayaan-1
- B) Chandrayaan-3
- C) Mangalyaan
- D) Aditya-L1

Answer: Chandrayaan-1

30. What was the name of the 2023 mission that made India the first country to land near the Moon's south pole?

- A) Chandrayaan-3
- B) Chandrayaan-1
- C) Gaganyaan
- D) Mangalyaan

Answer: Chandrayaan-3

31. What is the name of Japan's national space agency?

- A) JAXA
- B) ISRO
- C) CNSA
- D) Roscosmos

Answer: JAXA

32. What is the common abbreviation for the European Space Agency?

- A) ESA
- B) EUSA
- C) ESRO
- D) EUSpace

Answer: ESA

33. What is the name of China's national space agency?

- A) CNSA
- B) JAXA
- C) CSA
- D) Roscosmos

Answer: CNSA

34. What is the name of China's crewed space station currently in orbit?

- A) Tiangong
- B) Shenzhou
- C) Tianwen
- D) Chang'e Station

Answer: Tiangong

35. What do we call a hypothetical tunnel through space-time that could theoretically connect distant points in the universe?

- A) Wormhole
- B) Black hole
- C) White hole
- D) Time dilation field

Answer: Wormhole

36. What is the term for the moment a planet or moon passes directly between the Sun and an observer, appearing as a small dark dot?

- A) Transit
- B) Eclipse
- C) Occultation
- D) Conjunction

Answer: Transit

37. What is the name of the effect that causes the Moon to always show the same face to Earth?

- A) Tidal locking
- B) Axial precession

- C) Orbital resonance
- D) Libration

Answer: Tidal locking

Medium • Segment 3 (Q7–Q9)

1. Which spacecraft achieved the first-ever soft landing on the Moon, in 1966?

- A) Luna 9
- B) Luna 2
- C) Apollo 11
- D) Surveyor 1

Answer: Luna 9

2. What is the closest known star to our solar system, other than the Sun?

- A) Proxima Centauri
- B) Alpha Centauri A
- C) Sirius
- D) Barnard's Star

Answer: Proxima Centauri

3. What is the boundary around a black hole beyond which nothing can escape called?

- A) Event horizon
- B) Singularity
- C) Photon sphere
- D) Accretion disk

Answer: Event horizon

4. What is the name of the space station currently orbiting Earth, built by multiple countries?

- A) International Space Station
- B) Mir
- C) Skylab
- D) Tiangong

Answer: International Space Station

5. Which planet was discovered through mathematical prediction before being directly observed?

- A) Neptune
- B) Uranus
- C) Pluto
- D) Saturn

Answer: Neptune

6. What term describes the point in a planet's orbit when it is closest to the Sun?

- A) Perihelion
- B) Aphelion
- C) Zenith
- D) Apogee

Answer: Perihelion

7. What is the name of the space telescope launched in December 2021 as Hubble's successor?

- A) James Webb Space Telescope
- B) Kepler Space Telescope
- C) Spitzer Space Telescope
- D) Roman Space Telescope

Answer: James Webb Space Telescope

8. Which planet has a day (one rotation) longer than its year (one orbit)?

- A) Venus
- B) Mercury
- C) Mars
- D) Uranus

Answer: Venus

9. What term describes a star that suddenly brightens dramatically before fading?

- A) Nova
- B) Pulsar
- C) Quasar
- D) Magnetar

Answer: Nova

10. What natural light display near Earth's poles is caused by solar particles interacting with the magnetic field?

- A) Aurora
- B) Eclipse
- C) Halo
- D) Corona

Answer: Aurora

11. Which Apollo mission was the first to carry astronauts around the Moon without landing?

- A) Apollo 8
- B) Apollo 10
- C) Apollo 11
- D) Apollo 13

Answer: Apollo 8

12. What is the theoretical point of infinite density at the center of a black hole called?

- A) Singularity
- B) Event horizon
- C) Nucleus
- D) Core

Answer: Singularity

13. What are the names of Mars's two small moons?

- A) Phobos and Deimos
- B) Io and Europa
- C) Titan and Rhea
- D) Ariel and Umbriel

Answer: Phobos and Deimos

14. What force keeps planets in orbit around the Sun?

- A) Gravity
- B) Magnetism
- C) Friction
- D) Inertia

Answer: Gravity

15. Which planet is the only one in our solar system not named after a Roman or Greek deity?

- A) Earth

- B) Mars
- C) Venus
- D) Mercury

Answer: Earth

16. What defines a "year" on any planet?

- A) Time to complete one orbit around the Sun
- B) Time to rotate once on its axis
- C) Distance traveled in space
- D) Number of moons it has

Answer: Time to complete one orbit around the Sun

17. What is the name of the Indian space agency?

- A) ISRO
- B) DRDO
- C) BARC
- D) CSIR

Answer: ISRO

18. What is the name of the region considered the outer boundary of the Sun's gravitational influence, source of long-period comets?

- A) Oort Cloud
- B) Kuiper Belt
- C) Asteroid Belt
- D) Heliopause

Answer: Oort Cloud

19. What is the name of the space telescope launched by ESA in 2023 to study dark matter and dark energy?

- A) Euclid
- B) James Webb
- C) Hubble
- D) Gaia

Answer: Euclid

20. What is the name of the private company capsule that became the first commercial spacecraft to carry NASA astronauts to the ISS, in 2020?

- A) Crew Dragon
- B) Starliner
- C) Orion
- D) Dream Chaser

Answer: Crew Dragon

21. What was the name of the NASA-led mission that tested asteroid deflection by deliberately crashing into an asteroid's moon in 2022?

- A) DART
- B) OSIRIS-REx
- C) Hayabusa2
- D) NEAR Shoemaker

Answer: DART

22. What is the name of the asteroid moon whose orbit was successfully altered by the DART mission?

- A) Dimorphos
- B) Didymos

- C) Phobos
- D) Deimos

Answer: Dimorphos

23. What is the name for the ring-shaped image of a distant galaxy created when gravitational lensing is perfectly aligned with an observer?

- A) Einstein ring
- B) Halo ring
- C) Photon ring
- D) Accretion ring

Answer: Einstein ring

24. What is the term for a star system consisting of two stars orbiting a common center of mass?

- A) Binary star system
- B) Twin star system
- C) Double nova
- D) Paired nebula

Answer: Binary star system

25. What is the name of the closest known star system to our own, home to Proxima Centauri?

- A) Alpha Centauri
- B) Barnard's Star
- C) Sirius
- D) Wolf 359

Answer: Alpha Centauri

26. What method of exoplanet detection relies on measuring the dip in a star's brightness as a planet passes in front of it?

- A) Transit method
- B) Radial velocity method
- C) Direct imaging
- D) Gravitational microlensing

Answer: Transit method

27. What is the name of NASA's exoplanet-hunting space telescope, launched in 2018 as a successor to Kepler?

- A) TESS
- B) Spitzer
- C) WISE
- D) Chandra

Answer: TESS

28. What is the name of the NASA space telescope, launched in 2009, that discovered thousands of exoplanets before retiring in 2018?

- A) Kepler Space Telescope
- B) Hubble Space Telescope
- C) Spitzer Space Telescope
- D) TESS

Answer: Kepler Space Telescope

29. What is the leading scientific theory describing the origin and expansion of the universe from an extremely hot, dense state?

- A) Big Bang theory
- B) Steady State theory

- C) Oscillating universe theory
- D) Multiverse theory

Answer: Big Bang theory

30. What is the term for the mysterious force believed to be causing the universe's expansion to accelerate?

- A) Dark energy
- B) Dark matter
- C) Antimatter
- D) Cosmic radiation

Answer: Dark energy

31. What is the term for the invisible form of matter that does not emit light but exerts gravitational effects on visible matter?

- A) Dark matter
- B) Dark energy
- C) Antimatter
- D) Neutrino matter

Answer: Dark matter

32. What is the name of the theoretical particle proposed to explain dark matter, though not yet directly detected?

- A) WIMP
- B) Graviton
- C) Tachyon
- D) Axion boson

Answer: WIMP

33. What was the name of the first reusable orbital-class rocket booster to land vertically after launch, achieved by SpaceX in 2015?

- A) Falcon 9
- B) Falcon Heavy
- C) Starship
- D) Atlas V

Answer: Falcon 9

34. What is the name of SpaceX's next-generation rocket system, currently in testing, designed for missions to Mars?

- A) Starship
- B) Falcon Heavy
- C) New Glenn
- D) Vulcan Centaur

Answer: Starship

35. What was the name of the first module of the International Space Station, launched in 1998?

- A) Zarya
- B) Unity
- C) Zvezda
- D) Destiny

Answer: Zarya

36. What is the term for a star's final, stable stage after exhausting its fuel, if it is not massive enough to become a neutron star or black hole?

- A) White dwarf

- B) Red giant
- C) Brown dwarf
- D) Blue supergiant

Answer: White dwarf

37. What is the term describing a hypothetical scenario in which the universe's expansion eventually reverses, ending in a final collapse?

- A) Big Crunch
- B) Big Rip
- C) Big Freeze
- D) Big Bounce

Answer: Big Crunch

Medium-Hard • Segment 4 (Q10–Q12)

1. What was the name of the first spacecraft to successfully land on a comet, in 2014?

- A) Philae
- B) Rosetta
- C) Giotto
- D) Stardust

Answer: Philae

2. Which galaxy is predicted to collide with the Milky Way in about 4.5 billion years?

- A) Andromeda Galaxy
- B) Triangulum Galaxy
- C) Sombrero Galaxy
- D) Whirlpool Galaxy

Answer: Andromeda Galaxy

3. The Chandrasekhar limit defines the maximum stable mass of what kind of star?

- A) White dwarf
- B) Red giant
- C) Neutron star
- D) Main-sequence star

Answer: White dwarf

4. What is the leftover radiation from the Big Bang called?

- A) Cosmic Microwave Background
- B) Gamma-ray burst
- C) Solar wind
- D) Redshift

Answer: Cosmic Microwave Background

5. What is the name of the region of icy bodies beyond Neptune's orbit?

- A) Kuiper Belt
- B) Asteroid Belt
- C) Oort Cloud
- D) Van Allen Belt

Answer: Kuiper Belt

6. What effect explains why light from distant galaxies shifts toward red as the universe expands?

- A) Redshift
- B) Blueshift

- C) Refraction
- D) Diffraction

Answer: Redshift

7. Which private company was the first to successfully land and reuse an orbital rocket booster?

- A) SpaceX
- B) Blue Origin
- C) Virgin Galactic
- D) Rocket Lab

Answer: SpaceX

8. What do we call a rapidly rotating neutron star that emits beams of radiation?

- A) Pulsar
- B) Quasar
- C) Magnetar
- D) Nova

Answer: Pulsar

9. What is Earth's approximate escape velocity?

- A) 11.2 km/s
- B) 7.9 km/s
- C) 25 km/s
- D) 3 km/s

Answer: 11.2 km/s

10. Which moon of Saturn has a thick atmosphere and lakes of liquid methane?

- A) Titan
- B) Enceladus
- C) Rhea
- D) Mimas

Answer: Titan

11. What is the region around a star where liquid water could exist on a planet's surface called?

- A) Habitable zone
- B) Roche limit
- C) Photic zone
- D) Frost line

Answer: Habitable zone

12. What was the first human-made object to reach interstellar space?

- A) Voyager 1
- B) Pioneer 10
- C) Voyager 2
- D) New Horizons

Answer: Voyager 1

13. What term describes time passing more slowly in stronger gravitational fields?

- A) Gravitational time dilation
- B) Relativistic mass
- C) Length contraction
- D) Frame dragging

Answer: Gravitational time dilation

14. What is the boundary called where the Sun's solar wind is stopped by interstellar gas?

- A) Heliopause
- B) Heliosphere
- C) Magnetopause
- D) Ionopause

Answer: Heliopause

15. What is the theoretical undiscovered planet believed to explain unusual orbits in the outer solar system called?

- A) Planet Nine
- B) Planet X
- C) Nemesis
- D) Tyche

Answer: Planet Nine

16. Which spacecraft was the first man-made object to land on Venus and transmit data, in 1970?

- A) Venera 7
- B) Mariner 2
- C) Magellan
- D) Pioneer Venus

Answer: Venera 7

17. What do astronomers call a black hole formed from the collapse of a single massive star?

- A) Stellar-mass black hole
- B) Supermassive black hole
- C) Intermediate black hole
- D) Primordial black hole

Answer: Stellar-mass black hole

Hard • Segment 5 (Q13–Q15)

1. Which spacecraft was the first to fly past Pluto, in 2015?

- A) New Horizons
- B) Voyager 2
- C) Cassini
- D) Juno

Answer: New Horizons

2. Which spacecraft was the first to orbit and later land on an asteroid (Eros), in 2001?

- A) NEAR Shoemaker
- B) Hayabusa
- C) OSIRIS-REx
- D) Dawn

Answer: NEAR Shoemaker

3. What is the term for the slow wobble of Earth's rotational axis over about 26,000 years?

- A) Axial precession
- B) Nutation
- C) Libration
- D) Obliquity

Answer: Axial precession

4. Which country's lander, Beresheet, crashed while attempting a Moon landing in 2019?

- A) Israel

- B) India
- C) Japan
- D) South Korea

Answer: Israel

5. Which Japanese mission returned samples from the asteroid Ryugu?

- A) Hayabusa2
- B) Akatsuki
- C) Kaguya
- D) Hitomi

Answer: Hayabusa2

6. Which probe was the first to land on Saturn's moon Titan, in 2005?

- A) Huygens
- B) Cassini
- C) Galileo
- D) Voyager 1

Answer: Huygens

7. What is the Oort Cloud believed to be the main source of?

- A) Long-period comets
- B) Asteroids
- C) Meteor showers
- D) Solar flares

Answer: Long-period comets

8. What was the name of the mission that made China the first country to land a rover on the far side of the Moon, in 2019?

- A) Chang'e 4
- B) Chang'e 3
- C) Tianwen-1
- D) Yutu

Answer: Chang'e 4

9. What term describes the apparent shift in a star's position due to Earth's orbital motion, used to measure distances to nearby stars?

- A) Stellar parallax
- B) Redshift
- C) Aberration
- D) Proper motion

Answer: Stellar parallax

10. What was the first confirmed interstellar object to pass through our solar system, discovered in 2017?

- A) 'Oumuamua
- B) Borisov
- C) Chiron
- D) Halley

Answer: 'Oumuamua

11. What is a magnetar?

- A) A neutron star with an extremely powerful magnetic field
- B) A black hole with unusually strong gravity
- C) A star composed mostly of iron

D) A rapidly cooling white dwarf

Answer: A neutron star with an extremely powerful magnetic field

12. What is the name of the region around a black hole where light itself can orbit in a circle?

A) Photon sphere

B) Event horizon

C) Ergosphere

D) Accretion disk

Answer: Photon sphere

13. Which astronomer first discovered the asteroid (and dwarf planet) Ceres, in 1801?

A) Giuseppe Piazzi

B) William Herschel

C) Urbain Le Verrier

D) Johann Galle

Answer: Giuseppe Piazzi

14. What is the name of the region around a rotating black hole where objects cannot remain stationary because spacetime itself is dragged?

A) Ergosphere

B) Event horizon

C) Photon sphere

D) Singularity

Answer: Ergosphere

15. Which of Saturn's moons shoots geysers of water ice from its south pole?

A) Enceladus

B) Titan

C) Mimas

D) Iapetus

Answer: Enceladus

16. Which astronomer discovered Uranus in 1781?

A) William Herschel

B) Johann Galle

C) Urbain Le Verrier

D) Giuseppe Piazzi

Answer: William Herschel

17. What is the term for a black hole with a mass millions to billions of times that of the Sun, found at the center of most large galaxies?

A) Supermassive black hole

B) Stellar-mass black hole

C) Micro black hole

D) Primordial black hole

Answer: Supermassive black hole

IQ & Logic

Easy • Segment 1 (Q1–Q3)

1. What comes next in the sequence: 4, 9, 16, 25, 36, ?

- A) 49
- B) 42
- C) 45
- D) 47

Answer: 49

2. If 3 people can paint 3 fences in 3 hours, how long would it take 6 people to paint 6 identical fences?

- A) 3 hours
- B) 6 hours
- C) 1.5 hours
- D) 12 hours

Answer: 3 hours

3. Complete the analogy: Tadpole is to Frog as Caterpillar is to ____?

- A) Butterfly
- B) Moth
- C) Cocoon
- D) Larva

Answer: Butterfly

4. If some cats are black, and all black things absorb heat, which statement must be true?

- A) Some cats absorb heat
- B) All cats absorb heat
- C) No cats absorb heat
- D) All black things are cats

Answer: Some cats absorb heat

5. What comes next in the sequence: 2, 6, 12, 20, 30, ?

- A) 42
- B) 40
- C) 36
- D) 44

Answer: 42

6. A clock shows exactly 3:15. What is the angle between the hour and minute hands?

- A) 7.5 degrees
- B) 0 degrees
- C) 15 degrees
- D) 90 degrees

Answer: 7.5 degrees

7. If today is Wednesday, what day of the week was it 100 days ago?

- A) Monday
- B) Sunday
- C) Tuesday
- D) Saturday

Answer: Monday

8. Which word is the odd one out: Circle, Square, Triangle, Sphere?

- A) Sphere
- B) Circle
- C) Square
- D) Triangle

Answer: Sphere

9. What comes next in the sequence: 1, 2, 6, 24, 120, ?

- A) 720
- B) 620
- C) 700
- D) 840

Answer: 720

10. Complete the analogy: Bark is to Tree as Skin is to ____?

- A) Body
- B) Bone
- C) Blood
- D) Hair

Answer: Body

11. A is the mother of B. B is the father of C. What is A to C?

- A) Grandmother
- B) Mother
- C) Aunt
- D) Sister

Answer: Grandmother

12. The word "STRESSED" spelled backward makes what common word?

- A) Desserts
- B) Stressed
- C) Address
- D) Dessert

Answer: Desserts

13. What comes next in the sequence: 3, 9, 27, 81, ?

- A) 243
- B) 162
- C) 200
- D) 225

Answer: 243

14. If a plane crashes exactly on the border between two countries, where are the survivors buried?

- A) Nowhere - survivors aren't buried
- B) In the first country
- C) In the second country
- D) Split between both

Answer: Nowhere - survivors aren't buried

15. What comes next in the sequence: 1, 4, 10, 22, 46, ?

- A) 94
- B) 90
- C) 96

D) 88

Answer: 94

16. Complete the analogy: Fish is to Water as Bird is to ____?

A) Air

B) Nest

C) Tree

D) Feather

Answer: Air

17. If a red house is made of red bricks and a blue house is made of blue bricks, what is a greenhouse made of?

A) Glass

B) Green bricks

C) Wood

D) Plastic

Answer: Glass

18. What comes next in the sequence: 5, 8, 13, 21, 34, ?

A) 55

B) 50

C) 60

D) 45

Answer: 55

19. If a train travels 300 km in 4 hours, what is its average speed?

A) 75 km/h

B) 60 km/h

C) 80 km/h

D) 100 km/h

Answer: 75 km/h

20. Complete the analogy: Teacher is to Student as Doctor is to ____?

A) Patient

B) Hospital

C) Nurse

D) Medicine

Answer: Patient

21. What comes next in the sequence: 100, 81, 64, 49, ?

A) 36

B) 40

C) 32

D) 42

Answer: 36

22. If 6 pens cost \$12, how much do 10 pens cost at the same rate?

A) \$20

B) \$18

C) \$24

D) \$16

Answer: \$20

23. Which number is the odd one out: 4, 9, 16, 20, 25?

- A) 20
- B) 9
- C) 16
- D) 25

Answer: 20

24. What comes next in the sequence: 2, 4, 7, 11, 16, ?

- A) 22
- B) 20
- C) 21
- D) 24

Answer: 22

25. If a rectangle has a length of 8 cm and a width of 5 cm, what is its area?

- A) 40 square cm
- B) 26 square cm
- C) 35 square cm
- D) 45 square cm

Answer: 40 square cm

26. Complete the analogy: Hot is to Cold as Day is to ____?

- A) Night
- B) Sun
- C) Dark
- D) Evening

Answer: Night

27. What comes next in the sequence: 90, 80, 71, 63, ?

- A) 56
- B) 54
- C) 58
- D) 52

Answer: 56

28. If it takes 4 workers 6 days to complete a task, how many days would it take 8 workers to complete the same task?

- A) 3 days
- B) 4 days
- C) 12 days
- D) 2 days

Answer: 3 days

29. Complete the analogy: Scissors is to Cut as Hammer is to ____?

- A) Hit
- B) Build
- C) Break
- D) Nail

Answer: Hit

30. What comes next in the sequence: 1, 5, 9, 13, 17, ?

- A) 21
- B) 19
- C) 20

D) 23

Answer: 21

31. If a car travels at 60 km/h, how far does it travel in 2.5 hours?

A) 150 km

B) 120 km

C) 180 km

D) 140 km

Answer: 150 km

32. Which shape has exactly five sides?

A) Pentagon

B) Hexagon

C) Square

D) Octagon

Answer: Pentagon

33. What comes next in the sequence: 500, 250, 125, 62.5, ?

A) 31.25

B) 30

C) 25

D) 40

Answer: 31.25

34. If A is taller than B, and B is taller than C, who is the shortest?

A) C

B) A

C) B

D) Cannot be determined

Answer: C

35. Complete the analogy: Chef is to Kitchen as Pilot is to ____?

A) Cockpit

B) Airport

C) Runway

D) Sky

Answer: Cockpit

36. What comes next in the sequence: 12, 17, 23, 30, 38, ?

A) 47

B) 45

C) 46

D) 49

Answer: 47

37. If $3x = 21$, what is the value of x?

A) 7

B) 6

C) 8

D) 9

Answer: 7

1. What comes next in the sequence: 2, 3, 5, 8, 13, 21, ?

- A) 34
- B) 33
- C) 30
- D) 36

Answer: 34

2. A man looks at a portrait and says, "Brothers and sisters, I have none, but this man's father is my father's son." Who is in the portrait?

- A) His son
- B) His father
- C) Himself
- D) His brother

Answer: His son

3. If all Bloops are Razzies, and all Razzies are Lazzies, are all Bloops definitely Lazzies?

- A) Yes
- B) No
- C) Cannot be determined
- D) Only some Bloops

Answer: Yes

4. What comes next in the sequence: 5, 11, 23, 47, ?

- A) 95
- B) 90
- C) 94
- D) 100

Answer: 95

5. If 5 people can build 5 tables in 5 days, how many days would it take 10 people to build 10 identical tables?

- A) 5 days
- B) 10 days
- C) 2.5 days
- D) 1 day

Answer: 5 days

6. Three boxes are labeled "Apples," "Oranges," and "Apples and Oranges" - but all three labels are wrong. You may pick one fruit from one box to correctly relabel all three. Which box should you pick from?

- A) The box labeled "Apples and Oranges"
- B) The box labeled "Apples"
- C) The box labeled "Oranges"
- D) It's impossible to determine

Answer: The box labeled "Apples and Oranges"

7. What comes next in the sequence: 1, 8, 27, 64, ?

- A) 125
- B) 100
- C) 120
- D) 110

Answer: 125

8. If 8 workers can build a wall in 10 days, how many days would it take 20 workers to build the same wall, at the same rate per worker?

- A) 4 days
- B) 5 days
- C) 8 days
- D) 2.5 days

Answer: 4 days

9. What comes next in the sequence: 1, 2, 4, 7, 11, 16, ?

- A) 22
- B) 21
- C) 23
- D) 20

Answer: 22

10. In a family: A is married to B. C is the son of A. D is the sister of C. E is the mother of A. F is the brother of E. How is F related to C?

- A) F is C's great-uncle
- B) F is C's uncle
- C) F is C's grandfather
- D) F is C's cousin

Answer: F is C's great-uncle

11. What comes next in the sequence: 6, 12, 21, 33, 48, ?

- A) 66
- B) 63
- C) 60
- D) 69

Answer: 66

12. If a clock's hour and minute hands overlap exactly at 12:00, at approximately what time will they next overlap?

- A) About 1:05
- B) Exactly 1:00
- C) About 1:10
- D) About 12:55

Answer: About 1:05

13. What comes next in the sequence: 2, 5, 10, 17, 26, ?

- A) 37
- B) 35
- C) 36
- D) 38

Answer: 37

14. A snail climbs 3 feet up a well each day but slips back 2 feet every night. If the well is 10 feet deep, how many days does it take the snail to reach the top?

- A) 8 days
- B) 10 days
- C) 7 days
- D) 9 days

Answer: 8 days

15. What comes next in the sequence: 1, 3, 6, 10, 15, ?

- A) 21
- B) 20
- C) 18
- D) 24

Answer: 21

16. If you rearrange all the letters of "DORMITORY," what common two-word phrase can you make?

- A) Dirty Room
- B) Roomy Dirt
- C) Moody Trio
- D) Dirt Moor

Answer: Dirty Room

17. What comes next in the sequence: 3, 4, 7, 11, 18, 29, ?

- A) 47
- B) 45
- C) 46
- D) 50

Answer: 47

18. What comes next in the sequence: 4, 12, 36, 108, ?

- A) 324
- B) 300
- C) 216
- D) 432

Answer: 324

19. A rectangular garden is 12 meters long and 8 meters wide. What is its perimeter?

- A) 40 meters
- B) 96 meters
- C) 20 meters
- D) 48 meters

Answer: 40 meters

20. If today is Friday, what day will it be in 10 days?

- A) Monday
- B) Sunday
- C) Tuesday
- D) Saturday

Answer: Monday

21. Complete the analogy: Library is to Books as Museum is to ____?

- A) Artifacts
- B) Buildings
- C) Tickets
- D) Visitors

Answer: Artifacts

22. What comes next in the sequence: 2, 4, 12, 48, 240, ?

- A) 1440
- B) 1200
- C) 960
- D) 1680

Answer: 1440

23. A car's odometer reads 45,678 km. After traveling another 234 km, what will it read?

- A) 45,912 km
- B) 45,902 km
- C) 45,922 km
- D) 45,890 km

Answer: 45,912 km

24. Which number is the odd one out: 8, 27, 64, 100, 125?

- A) 100
- B) 27
- C) 64
- D) 125

Answer: 100

25. What comes next in the sequence: 3, 10, 24, 52, 108, ?

- A) 220
- B) 216
- C) 224
- D) 212

Answer: 220

26. A train leaves at 2:45 PM and arrives at 6:20 PM. How long was the journey?

- A) 3 hours 35 minutes
- B) 3 hours 25 minutes
- C) 4 hours 5 minutes
- D) 3 hours 45 minutes

Answer: 3 hours 35 minutes

27. Complete the analogy: Seed is to Tree as Egg is to ____?

- A) Bird
- B) Nest
- C) Feather
- D) Wing

Answer: Bird

28. What comes next in the sequence: 2, 7, 17, 37, 77, ?

- A) 157
- B) 150
- C) 160
- D) 147

Answer: 157

29. If 15 books cost \$75, how much would 24 books cost at the same rate?

- A) \$120
- B) \$100
- C) \$110
- D) \$130

Answer: \$120

30. Which word doesn't belong: Whisper, Shout, Mumble, Jump?

- A) Jump

- B) Whisper
- C) Shout
- D) Mumble

Answer: Jump

31. What comes next in the sequence: 64, 32, 16, 8, ?

- A) 4
- B) 2
- C) 6
- D) 0

Answer: 4

32. A cyclist travels 15 km in 45 minutes. What is their speed in km/h?

- A) 20 km/h
- B) 15 km/h
- C) 25 km/h
- D) 18 km/h

Answer: 20 km/h

33. Complete the analogy: Winter is to Cold as Summer is to ____?

- A) Hot
- B) Rain
- C) Sun
- D) Season

Answer: Hot

34. What comes next in the sequence: 3, 8, 18, 38, 78, ?

- A) 158
- B) 150
- C) 160
- D) 148

Answer: 158

35. If a clock shows exactly 6:00, what is the angle between the hour and minute hands?

- A) 180 degrees
- B) 90 degrees
- C) 150 degrees
- D) 120 degrees

Answer: 180 degrees

36. Which number replaces the question mark: 12, 24, 48, 96, ?

- A) 192
- B) 144
- C) 180
- D) 168

Answer: 192

37. If a recipe for 4 people needs 2 cups of rice, how many cups are needed for 10 people?

- A) 5 cups
- B) 4 cups
- C) 6 cups
- D) 4.5 cups

Answer: 5 cups

1. In a room of 23 people, what is the approximate probability that at least two of them share the same birthday?

- A) About 50%
- B) About 6%
- C) About 23%
- D) About 99%

Answer: About 50%

2. What comes next in the sequence: 1, 2, 6, 24, 120, 720, ?

- A) 5040
- B) 4320
- C) 5760
- D) 6040

Answer: 5040

3. A man must cross a river with a wolf, a goat, and a cabbage, taking only one across at a time. Left alone, the wolf eats the goat, and the goat eats the cabbage. What must he take across first?

- A) The goat
- B) The wolf
- C) The cabbage
- D) Any item

Answer: The goat

4. What comes next in this "look-and-say" sequence: 1, 11, 21, 1211, 111221, ?

- A) 312211
- B) 213211
- C) 312121
- D) 132211

Answer: 312211

5. Four people must cross a bridge at night sharing one flashlight, which is needed for every crossing. They take 1, 2, 5, and 10 minutes respectively, and pairs move at the slower person's pace. What is the minimum total time for all four to cross?

- A) 17 minutes
- B) 19 minutes
- C) 15 minutes
- D) 21 minutes

Answer: 17 minutes

6. Which number does not belong in this set of otherwise perfect squares: 121, 144, 169, 200, 225?

- A) 200
- B) 121
- C) 169
- D) 225

Answer: 200

7. What comes next in the Fibonacci-style sequence: 0, 1, 1, 2, 3, 5, 8, 13, 21, 34, ?

- A) 55
- B) 52
- C) 54
- D) 56

Answer: 55

8. You have 8 balls, one of which is heavier than the rest (all others weigh the same). Using a balance scale, what is the minimum number of weighings needed to guarantee finding the heavier ball?

- A) 2
- B) 3
- C) 1
- D) 4

Answer: 2

9. What comes next in the sequence: 1, 4, 27, 256, ?

- A) 3125
- B) 2500
- C) 3000
- D) 4096

Answer: 3125

10. A father is 3 times as old as his son. In 12 years, he will be twice as old as his son. How old is the son now?

- A) 12
- B) 15
- C) 18
- D) 10

Answer: 12

11. What comes next in the sequence: 2, 6, 18, 54, 162, ?

- A) 486
- B) 480
- C) 500
- D) 450

Answer: 486

12. In a group where every person shakes hands with every other person exactly once, there are 66 total handshakes. How many people are in the group?

- A) 12
- B) 11
- C) 13
- D) 66

Answer: 12

13. What comes next in the alternating sequence: 7, 10, 8, 11, 9, 12, ?

- A) 10
- B) 13
- C) 8
- D) 12

Answer: 10

14. A bat and a ball together cost \$1.10. The bat costs \$1.00 more than the ball. How much does the ball cost?

- A) \$0.05
- B) \$0.10
- C) \$0.15
- D) \$0.01

Answer: \$0.05

15. What comes next in the sequence: 1, 3, 4, 7, 11, 18, 29, 47, ?

- A) 76
- B) 74
- C) 78
- D) 70

Answer: 76

16. There are 100 closed lockers and 100 people. Person 1 opens every locker, person 2 toggles every 2nd locker, person 3 toggles every 3rd, and so on through person 100. How many lockers remain open at the end?

- A) 10
- B) 50
- C) 100
- D) 1

Answer: 10

17. What comes next in the sequence: 2, 12, 36, 80, 150, ?

- A) 252
- B) 240
- C) 260
- D) 210

Answer: 252

18. What comes next in the sequence: 5, 9, 17, 33, 65, ?

- A) 129
- B) 125
- C) 133
- D) 121

Answer: 129

19. A is the brother of B. C is the daughter of B. What is A to C?

- A) Uncle
- B) Father
- C) Cousin
- D) Grandfather

Answer: Uncle

20. If all Zips are Zaps, and no Zaps are Zops, can any Zip be a Zop?

- A) No
- B) Yes
- C) Only some Zips
- D) Cannot be determined

Answer: No

21. What comes next in the sequence: 1, 6, 15, 28, 45, ?

- A) 66
- B) 60
- C) 63
- D) 70

Answer: 66

22. Five runners finish a race in order, except Elin, who finishes between Bina (2nd) and Chandra (4th). What position does Elin finish in?

- A) 3rd
- B) 2nd
- C) 4th
- D) 1st

Answer: 3rd

23. What comes next in the sequence: 2, 4, 16, 256, ?

- A) 65536
- B) 4096
- C) 16384
- D) 32768

Answer: 65536

24. A is twice as old as B. In 10 years, A will be 1.5 times as old as B. How old is B now?

- A) 10
- B) 15
- C) 20
- D) 8

Answer: 10

25. In a class, 60% of students are girls. If there are 18 boys, how many girls are there?

- A) 27
- B) 24
- C) 30
- D) 22

Answer: 27

26. What comes next in the sequence: 100, 95, 85, 70, 50, ?

- A) 25
- B) 30
- C) 20
- D) 35

Answer: 25

27. If the day before yesterday was Wednesday, what day is tomorrow?

- A) Saturday
- B) Friday
- C) Sunday
- D) Thursday

Answer: Saturday

28. What comes next in the sequence: 5, 6, 8, 11, 15, 20, ?

- A) 26
- B) 24
- C) 25
- D) 27

Answer: 26

29. A father's age is 4 times his son's age. In 20 years, the father will be twice as old as his son. What is the son's current age?

- A) 10
- B) 12
- C) 8

D) 15

Answer: 10

30. What comes next in the sequence: 2, 3, 7, 16, 32, ?

A) 57

B) 54

C) 60

D) 50

Answer: 57

31. In a group of 30 people, 18 like tea and 15 like coffee, with 8 liking both. How many like neither?

A) 5

B) 3

C) 7

D) 10

Answer: 5

32. What comes next in the sequence: 1, 5, 13, 25, 41, ?

A) 61

B) 57

C) 65

D) 55

Answer: 61

33. If a shirt originally priced at \$40 is discounted by 25%, what is the sale price?

A) \$30

B) \$32

C) \$28

D) \$35

Answer: \$30

34. A jar contains 40 coins, only \$1 and \$2 coins, worth \$65 in total. How many \$2 coins are there?

A) 25

B) 20

C) 30

D) 15

Answer: 25

35. What comes next in the sequence: 4, 5, 9, 14, 23, 37, ?

A) 60

B) 55

C) 65

D) 50

Answer: 60

36. If the probability of event A is 0.5 and event B is 0.3, and they are mutually exclusive, what is the probability of A or B?

A) 0.8

B) 0.15

C) 0.65

D) 0.2

Answer: 0.8

37. What comes next in the sequence: 8, 15, 29, 57, 113, ?

- A) 225
- B) 220
- C) 230
- D) 215

Answer: 225

Medium-Hard • Segment 4 (Q10–Q12)

1. A fair six-sided die is rolled twice. What is the probability that the sum of the two rolls is 7?

- A) $1/6$
- B) $1/12$
- C) $1/36$
- D) $1/4$

Answer: $1/6$

2. What comes next in the sequence: 1, 1, 2, 5, 14, 42, ?

- A) 132
- B) 126
- C) 140
- D) 120

Answer: 132

3. If the probability of an event is 0.3, what is the probability that the event does NOT occur, as a fraction?

- A) $7/10$
- B) $3/10$
- C) $1/3$
- D) $7/3$

Answer: $7/10$

4. What is the minimum number of people needed in a room to guarantee that at least two were born in the same month?

- A) 13
- B) 12
- C) 24
- D) 6

Answer: 13

5. What comes next in the sequence of primes: 2, 3, 5, 7, 11, 13, 17, 19, ?

- A) 23
- B) 21
- C) 22
- D) 24

Answer: 23

6. Solve for x: $x^2 - 5x + 6 = 0$. What are the two values of x?

- A) 2 and 3
- B) 1 and 6
- C) -2 and -3
- D) 3 and 4

Answer: 2 and 3

7. If a binary number is 1101, what is its decimal equivalent?

- A) 13
- B) 11
- C) 15
- D) 14

Answer: 13

8. A committee of 3 people is to be chosen from 6 people. How many different committees are possible?

- A) 20
- B) 18
- C) 15
- D) 24

Answer: 20

9. What comes next in the sequence: 1, 3, 7, 15, 31, ?

- A) 63
- B) 60
- C) 65
- D) 62

Answer: 63

10. If two fair dice are rolled, what is the probability of getting a double (both dice showing the same number)?

- A) $1/6$
- B) $1/12$
- C) $1/36$
- D) $1/2$

Answer: $1/6$

11. A is twice as old as B. Five years ago, A was three times as old as B. How old is B now?

- A) 10
- B) 15
- C) 5
- D) 20

Answer: 10

12. What comes next in the sequence: 1, 2, 5, 12, 29, ?

- A) 70
- B) 65
- C) 58
- D) 75

Answer: 70

13. In how many ways can 4 different books be arranged in a row on a shelf?

- A) 24
- B) 12
- C) 16
- D) 20

Answer: 24

14. What comes next in the sum-of-squares sequence: 1, 5, 14, 30, 55, ?

- A) 91
- B) 85
- C) 95

D) 80

Answer: 91

15. If $P(A) = 0.4$ and $P(B) = 0.5$, and A and B are independent events, what is $P(A \text{ and } B)$?

A) 0.2

B) 0.9

C) 0.1

D) 0.45

Answer: 0.2

16. What comes next in the sequence: 3, 6, 11, 18, 27, ?

A) 38

B) 36

C) 40

D) 34

Answer: 38

17. A number leaves remainder 3 when divided by 5, and remainder 2 when divided by 7. What is the smallest such positive number?

A) 23

B) 13

C) 33

D) 38

Answer: 23

Hard • Segment 5 (Q13–Q15)

1. What comes next in the sequence: 1, 2, 4, 7, 13, 24, 44, ?

A) 81

B) 78

C) 84

D) 75

Answer: 81

2. In a single-elimination knockout tournament with 64 players, how many total matches are played to determine a winner?

A) 63

B) 64

C) 32

D) 128

Answer: 63

3. What is the probability of getting exactly 2 heads when flipping a fair coin 3 times?

A) $\frac{3}{8}$

B) $\frac{1}{2}$

C) $\frac{1}{4}$

D) $\frac{1}{8}$

Answer: $\frac{3}{8}$

4. How many distinct ways can the letters of the word "MATHS" be arranged?

A) 120

B) 60

C) 24

D) 720

Answer: 120

5. If a fair coin is flipped 5 times, what is the probability of getting at least one head?

A) $31/32$

B) $1/32$

C) $1/2$

D) $15/16$

Answer: $31/32$

6. What comes next in the sequence: 1, 3, 6, 11, 18, 27, 38, ?

A) 51

B) 49

C) 53

D) 47

Answer: 51

7. In a lottery, you must choose 6 numbers from 1 to 49. How many different combinations are possible?

A) 13,983,816

B) 49,000,000

C) 6,000,000

D) 823,543

Answer: 13,983,816

8. What comes next in the sequence: 1, 4, 13, 40, 121, ?

A) 364

B) 360

C) 366

D) 363

Answer: 364

9. A biased coin has a 60% chance of landing heads. What is the probability of getting heads on two consecutive flips?

A) 0.36

B) 0.6

C) 0.3

D) 0.9

Answer: 0.36

10. What is the sum of the interior angles of a 12-sided polygon (dodecagon)?

A) 1800 degrees

B) 1440 degrees

C) 2160 degrees

D) 1080 degrees

Answer: 1800 degrees

11. What comes next in the sequence: 2, 5, 11, 23, 47, 95, ?

A) 191

B) 189

C) 193

D) 185

Answer: 191

12. The probability of rain tomorrow is 0.3, and the probability of rain the day after is 0.4 (independent). What is the probability it rains on both days?

- A) 0.12
- B) 0.7
- C) 0.35
- D) 0.24

Answer: 0.12

13. What comes next in the sequence: 1, 2, 4, 8, 15, 26, 42, ?

- A) 64
- B) 60
- C) 68
- D) 56

Answer: 64

14. How many diagonals does a regular octagon (8-sided polygon) have?

- A) 20
- B) 16
- C) 28
- D) 24

Answer: 20

15. What comes next in the sequence: 6, 24, 60, 120, 210, ?

- A) 336
- B) 300
- C) 360
- D) 280

Answer: 336

16. Two trains, 300 km apart, move toward each other at 60 km/h and 90 km/h. After how many hours will they meet?

- A) 2 hours
- B) 3 hours
- C) 2.5 hours
- D) 1.5 hours

Answer: 2 hours

17. What comes next in the Pell-number sequence: 1, 1, 3, 7, 17, 41, ?

- A) 99
- B) 95
- C) 103
- D) 89

Answer: 99
